### Utilizing The SPLK-1003 Latest Test Bootcamp, Pass The Splunk Enterprise Certified Admin

Just download the Splunk Enterprise Certified Admin (SPLK-1003) PDF dumps file and start the Splunk Enterprise Certified Admin (SPLK-1003) exam questions preparation right now. Whereas the other two Splunk Enterprise Certified Admin (SPLK-1003) practice test software is concerned, both are the mock Splunk SPLK-1003 Exam Dumps and help you to provide the real-time Splunk Enterprise Certified Admin (SPLK-1003) exam environment for preparation.

### Splunk Enterprise Certified Admin Sample Questions (Q195-Q200):

#### NEW QUESTION # 195

Windows can prevent a Splunk forwarder from reading open files. If files need to be read while they are being written to, what type of input stanza needs to be created?

- A. Monitor
- **B. MonitorNoHandle**
- C. Upload
- D. Tail Reader

#### Answer: B

Explanation:

The correct answer is C. MonitorNoHandle.

MonitorNoHandle is a type of input stanza that allows a Splunk forwarder to read files on Windows systems as Windows writes to them. It does this by using a kernel-mode filter driver to capture raw data as it gets written to the file<sup>1</sup>. This input stanza is useful for files that get locked open for writing, such as the Windows DNS server log file<sup>2</sup>.

The other options are incorrect because:

A: Tail Reader is not a valid input stanza in Splunk. It is a component of the Tailing Processor, which is responsible for monitoring files and directories for new data<sup>3</sup>.

B: Upload is a type of input stanza that allows Splunk to index a single file from a local or network file system. It is not suitable for files that are constantly being updated, as it only indexes the file once and does not monitor it for changes<sup>4</sup>.

D: Monitor is a type of input stanza that allows Splunk to monitor files and directories for new data. However, it may not work for files that Windows prevents Splunk from reading while they are open. In such cases, MonitorNoHandle is a better option<sup>2</sup>.

A Splunk forwarder is a lightweight agent that can forward data to a Splunk deployment. There are two types of forwarders: universal and heavy. A universal forwarder can only forward data, while a heavy forwarder can also perform parsing, filtering, routing, and aggregation on the data before forwarding it<sup>5</sup>.

An input stanza is a section in the inputs.conf configuration file that defines the settings for a specific type of input, such as files, directories, network ports, scripts, or Windows event logs. An input stanza starts with a square bracket, followed by the input type and the input path or name. For example, [monitor:///var/log] is an input stanza for monitoring the /var/log directory.

6: inputs.conf - Splunk Documentation

#### NEW QUESTION # 196

Which of the methods listed below supports multi-factor authentication?

- **A. Security Assertion Markup Language (SAML)**
- B. Lightweight Directory Access Protocol (LDAP)
- C. OpenID

- D. Single Sign-on (SSO)

**Answer: A**

Explanation:

Explanation

SAML is an open standard for exchanging authentication and authorization data between parties, especially between an identity provider and a service provider<sup>1</sup>. SAML supports multi-factor authentication by allowing the identity provider to require the user to present two or more factors of evidence to prove their identity<sup>2</sup>. For example, the user may need to enter a password and a one-time code sent to their phone, or scan their fingerprint and face.

#### NEW QUESTION # 197

In which phase do indexed extractions in props.conf occur?

- A. Parsing phase
- B. Indexing phase
- C. Searching phase
- D. Inputs phase

**Answer: A**

Explanation:

The following items in the phases below are listed in the order Splunk applies them (ie LINE\_BREAKER occurs before TRUNCATE).

Input phase

inputs.conf

props.conf

CHARSET

NO\_BINARY\_CHECK

CHECK\_METHOD

CHECK\_FOR\_HEADER (deprecated)

PREFIX\_SOURCETYPE

sourcetype

wmi.conf

regmon-filters.conf

Structured parsing phase

props.conf

INDEXED\_EXTRATIONS, and all other structured data header extractions

Parsing phase

props.conf

LINE\_BREAKER, TRUNCATE, SHOULD\_LINEMERGE, BREAK\_ONLY\_BEFORE\_DATE, and all other line merging settings

TIME\_PREFIX, TIME\_FORMAT, DATETIME\_CONFIG (datetime.xml), TZ, and all other time extraction settings and rules

TRANSFORMS which includes per-event queue filtering, per-event index assignment, per-event routing SEDCMD

MORE\_THAN, LESS\_THAN transforms.conf stanzas referenced by a TRANSFORMS clause in props.conf LOOKAHEAD,

DEST\_KEY, WRITE\_META, DEFAULT\_VALUE, REPEAT\_MATCH Reference:

Configuration parameters and the data pipeline

#### NEW QUESTION # 198

When would the following command be used?

```
./splunk check-integrity -index [ index name ] [ -verbose ]
```

- A. To verify the integrity of a local bucket.
- B. To verify the integrity of a SmartStore index.
- C. To verify the integrity of a local index.
- D. To verify the integrity of a SmartStore bucket.

**Answer: A**

Explanation

To verify the integrity of a local bucket. The command `./splunk check-integrity -bucketPath [bucket path] [-verbose]` is used to verify the integrity of a local bucket by comparing the hashes stored in the `l1Hashes` and `l2Hash` files with the actual data in the bucket1. This command can help detect any tampering or corruption of the data.

### NEW QUESTION # 199

When using license pools, volume allocations apply to which Splunk components?

- A. Indexes
- B. Search Heads
- C. Heavy Forwarders
- D. Indexers

**Answer: D**

Explanation:

Reference:<https://docs.splunk.com/Documentation/Splunk/8.2.3/Admin/Groups,stacks,pools,andothert terminology> When using license pools, volume allocations apply to indexers. A license pool is a group of indexers that share a certain amount of daily indexing volume. The license pool specifies how much data each indexer can index per day, as well as which indexes are available for each indexer. Therefore, option A is the correct answer. References: Splunk Enterprise Certified Admin | Splunk, [Set up and manage license pools - Splunk Documentation]

### NEW QUESTION # 200
