If this is what you want, why are you still hesitating?

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which two statements are correct about switch adoption?(Choose two.)

- A. Switch adoption uses SSH over TCP port 443.
- B. Greenfield switch adoption requires cloud-enabled switches with a claim or activation code.
- C. Brownfield switch adoption requires manual adoption and is used for switches that do not have a claim or activation code.
- D. Switch adoption requires Mist AP.

Answer: B,C

Explanation:

In Juniper Mist, Greenfield adoption applies to new, cloud-ready switches (such as EX4100, EX4400, and QFX series) using a claim or activation code to securely connect to the Mist cloud.

Brownfield adoption, however, supports switches already deployed or not factory-fresh. These are manually onboarded by configuring outbound management connectivity and adopting them through the Mist portal.

This distinction enables both new and legacy EX/QFX environments to be cloud-managed under Wired Assurance.

NEW QUESTION # 45

In the context of VXLAN, what is the role of a VTEP?

- A. To route Layer 3 traffic exclusively
- B. To encapsulate and de-encapsulate VXLAN packets
- C. To decrease network throughput
- D. To encrypt data traffic

Answer: B

NEW QUESTION # 46

In an EVPN-VXLAN deployment, what is the significance of route distinguishers and route targets?

- A. They both serve the same function in route separation
- B. Route distinguishers are used for route separation, while route targets define VPN membership
- C. They are optional components that can be omitted for small deployments
- D. Route targets are used for physical network design

Answer: B

NEW QUESTION # 47

Dynamic port configuration helps in managing which aspect of network operations?

- A. Ensuring ports are permanently disabled
- B. Static IP assignment
- C. Reducing the need for cable management
- D. Automatically adjusting port settings based on connected devices

Answer: D

NEW QUESTION # 48

Under which hierarchy level would you create a new site configuration?

- A. organization
- B. location
- C. clients
- D. access points

Answer: B

Explanation:

In Mist, sites represent the physical or logical grouping of devices within an organization.

You create and manage a site configuration under the Location hierarchy in the Mist UI.

Each site inherits organization-level settings but can override or customize specific configurations such as VLANs, templates, or switch settings.
