## 100% Pass SPLK-3002 - Reliable Splunk IT Service Intelligence Certified Admin Reliable Test Duration

Our passing rate is very high to reach 99% and our SPLK-3002 exam torrent also boost high hit rate. Our SPLK-3002 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our study materials can improve your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You can choose the version which suits you mostly. Our Splunk IT Service Intelligence Certified Admin exam torrents simplify the important information and seize the focus to make you master the SPLK-3002 Test Torrent in a short time.

Splunk SPLK-3002 exam is designed to test the knowledge and skills of IT professionals who wish to become certified Splunk IT Service Intelligence (ITSI) Administrators. Splunk IT Service Intelligence Certified Admin certification exam is a comprehensive assessment of an individual's understanding of the Splunk platform, including ITSI, and their ability to use it to analyze and visualize data from various sources. SPLK-3002 exam measures the candidate's ability to design, configure, and administer ITSI components and integrate them with other Splunk components.

## Importance of Splunk SPLK-3002 Exam to secure your future

Among the candidates who are applying for the Splunk SPLK-3002 exam, many of them have a huge desire to pass this exam because they know that in the IT industry, Splunk SPLK-3002 certification is very much important. Bypassing the Splunk SPLK-3002 Certification Exam, you will be able to develop and enhance the skills to prove your abilities in the market. So becoming Splunk Certified Professional with Splunk SPLK-3002 certification would certainly be a great satisfaction for you and boost your career growth. We know that managing enterprise data is a complex task and Splunk SPLK-3002 Certification is essential for every person to master it. The best way to prepare for Splunk SPLK-3002 Exam is to get the latest and high quality study materials from **SPLK-3002 Dumps**.

We offer you the most accurate, authentic, and latest updated Splunk SPLK-3002 Certification Exam Questions and Answers with guarantee of success. License free dive deep in the SPLK-3002 Certification Exam and study the best available practice. Custom actual desktop practice exams are also available for you to prepare for the Splunk SPLK-3002 Exam. Demo based preparation material is also available for you to get started with the SPLK-3002 Certification Exam. Aliases directory of the most recent and updated Splunk SPLK-3002 Certification Exam Questions and Answers is also topic specific. This directory will help you to find the right Splunk SPLK-3002 Certification Exam assist. Apps head guide is also available for you to find the best apps for the SPLK-3002 Certification Exam. Entity plan and graph visualization app is also available for you to find the best app for the SPLK-3002 Exam.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q26-Q31):

### NEW QUESTION # 26

Which of the following are the default ports that must be configured on Splunk to use ITSI?

- A. SplunkWeb (8405), SplunkD (8519), and HTTP Collector (8628)
- B. SplunkWeb (8088), SplunkD (8089), and HTTP Collector (8000)
- C. SplunkWeb (8000), SplunkD (8089), and HTTP Collector (8088)
- D. SplunkWeb (8089), SplunkD (8088), and HTTP Collector (8000)

**Answer: C**

Explanation:

Reference:

C is the correct answer because ITSI uses the default ports of Splunk Enterprise for its communication and data collection. SplunkWeb uses port 8000, SplunkD uses port 8089, and HTTP Event Collector uses port 8088. These ports can be changed if needed, but they must match the configuration of Splunk Enterprise. Reference: Ports used by ITSI

### NEW QUESTION # 27

Which capabilities are enabled through "teams"?

- A. Teams allow searches against the itsi\_summary index.
- B. Teams allow restrictions to service content in UI views.
- C. Teams restrict notable event alert actions.
- D. Teams restrict searches against the itsi\_notable\_audit index.

**Answer: B**

Explanation:

D is the correct answer because teams allow you to restrict access to service content in UI views such as service analyzers, glass tables, deep dives, and episode review. Teams also control access to services and KPIs for editing and viewing purposes. Teams do not affect the ability to search against the itsi\_summary index, restrict notable event alert actions, or restrict searches against the itsi\_notable\_audit index. Reference: Overview of teams in ITSI

### NEW QUESTION # 28

For which ITSI function is it a best practice to use a 15-30 minute time buffer?

- A. Anomaly detection.
- B. Maintenance windows
- C. Adaptive thresholding.
- D. Correlation searches.

**Answer: C**

Explanation:

B is the correct answer because adaptive thresholding is a feature of ITSI that allows you to dynamically adjust KPI thresholds based on historical patterns and trends. Adaptive thresholding requires a time buffer of at least 15 minutes to calculate the thresholds based on the previous data points. The time buffer ensures that there is enough data to perform the calculations and avoid false positives or negatives. Reference: Configure adaptive thresholding for a KPI in ITSI

### NEW QUESTION # 29

Which of the following actions can be performed with a deep dive?

- A. Create a Multi-KPI alert from the deep dive's current state to warn of similar situations in the future.
- B. Create a custom service analyzer from selected deep dive lanes.
- C. Create an anomaly detection alert to show when the same pattern begins in the future.
- D. Create a predictive analysis model from the deep dive to warn of future service degradation.

**Answer: A**

Explanation:

Deep dives in Splunk IT Service Intelligence (ITSI) allow for an in-depth analysis of services and their KPIs over time, providing a detailed view of the operational health and performance trends. One of the powerful actions that can be performed with a deep dive is the creation of a Multi-KPI alert from the deep dive's current state. This functionality enables users to define alerts based on the complex conditions observed during the deep dive analysis, allowing for the early detection of similar situations in the future. By configuring a Multi-KPI alert directly from a deep dive, ITSI users can leverage their insights and observations to proactively monitor for patterns or conditions that may indicate potential service degradation or failure, enhancing the overall responsiveness and effectiveness of the IT monitoring strategy.

### NEW QUESTION # 30

What is the main purpose of the service analyzer?

- A. Monitor overall Service and KPI status.
- B. Trigger external alerts based on threshold violations.
- C. Display a list of All Services and Entities.
- D. Allow Analysts to add comments to Alerts.

**Answer: A**

Explanation:

Reference: <https://docs.splunk.com/Documentation/MSExchange/4.0.3/Reference/ServiceAnalyzer> The service analyzer is a dashboard that allows you to monitor the overall service and KPI status in ITSI. The service analyzer displays a list of all services and their health scores, which indicate how well each service is performing based on its KPIs. You can also view the status and values of each KPI within a service, as well as drill down into deep dives or glass tables for further analysis. The service analyzer helps you identify issues affecting your services and prioritize them based on their impact and urgency. The main purpose of the service analyzer is:

D). Monitor overall service and KPI status. This is true because the service analyzer provides a comprehensive view of the health and performance of your services and KPIs in real time.

The other options are not the main purpose of the service analyzer because:

A). Display a list of all services and entities. This is not true because the service analyzer does not display entities, which are IT components that require management to deliver an IT service. Entities are displayed in other dashboards, such as entity management or entity health overview.

B). Trigger external alerts based on threshold violations. This is not true because the service analyzer does not trigger alerts, which are notifications sent to external systems or users when certain conditions are met. Alerts are triggered by correlation searches or alert actions configured in ITSI.

C). Allow analysts to add comments to alerts. This is not true because the service analyzer does not allow analysts to add comments to alerts, which are notifications sent to external systems or users

### NEW QUESTION # 31

.....

The Splunk IT Service Intelligence Certified Admin (SPLK-3002) practice questions are designed by experienced and qualified SPLK-3002 exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of Splunk SPLK-3002 exam dumps.
