Nowadays, seldom do the exam banks have such an integrated system to provide you a simulation test. You will gradually be aware of the great importance of stimulating the actual 312-85 exam after learning about our 312-85 study tool. Because of this function, you can easily grasp how the practice system operates and be able to get hold of the core knowledge about the 312-85 Exam. In addition, when you are in the real exam environment, you can learn to control your speed and quality in answering questions and form a good habit of doing exercise, so that you're going to be fine in the 312-85 exam.

The Certified Threat Intelligence Analyst (CTIA) certification exam is a professional qualification designed to equip individuals with the skills, knowledge, and abilities to analyze and respond to cyber threats effectively. Offered by the ECCouncil, the CTIA certification exam covers a range of topics related to threat intelligence, including threat identification, analysis, response, and dissemination. 312-85 Exam is designed for cybersecurity professionals, including incident responders, security analysts, threat intelligence analysts, and other professionals in the cybersecurity industry.

Taking and passing the CTIA certification exam demonstrates a high level of expertise in cybersecurity threat intelligence and validates the skills and knowledge required to identify and analyze potential cyber threats and vulnerabilities. It is an essential credential for professionals who are looking to enhance their career prospects and take their cybersecurity skills to the next level.

312-85 Latest Test Guide - Latest 312-85 Version

Dumpleader provides ECCouncil 312-85 exam questions for the 312-85 exam in PDF format. The 312-85 exam questions pdf file is easy to understand and can be downloaded on all smart devices. You can access your 312-85 practice exam questions pdf by downloading the 312-85 Exam Questions on your PC, laptop, Mac, tablet, and smartphone. You can use the 312-85 pdf questions at any time and anywhere you want, making exam preparation convenient and accessible from the comfort of your home.

ECCouncil 312-85 (Certified Threat Intelligence Analyst) certification exam is a highly sought after certification for professionals in the cybersecurity industry. 312-85 exam focuses on the skills and knowledge required to identify and prevent cyber threats through the use of threat intelligence. Certified Threat Intelligence Analyst certification is aimed at individuals who are looking to enhance their knowledge of threat intelligence and those who want to excel in their careers in the cybersecurity industry.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q13-Q18):

NEW QUESTION # 13

SecurityTech Inc. is developing a TI plan where it can drive more advantages in less funds. In the process of selecting a TI platform, it wants to incorporate a feature that ranks elements such as intelligence sources, threat actors, attacks, and digital assets of the organization, so that it can put in more funds toward the resources which are critical for the organization's security.

Which of the following key features should SecurityTech Inc. consider in their TI plan for selecting the TI platform?

- A. Open
- B. Search
- C. Workflow
- D. Scoring

Answer: D

NEW QUESTION # 14

Tyrion, a professional hacker, is targeting an organization to steal confidential information. He wants to perform website footprinting to obtain the following information, which is hidden in the web page header.

Connection status and content type

Accept-ranges and last-modified information

X-powered-by information

Web server in use and its version

Which of the following tools should the Tyrion use to view header content?

- A. Burp suite
- B. Vanguard enforcer
- C. AutoShun
- D. Hydra

Answer: A

Explanation:

Burp Suite is a comprehensive tool used for web application security testing, which includes functionality for viewing and manipulating the HTTP/HTTPS headers of web page requests and responses. This makes it an ideal tool for someone like Tyrion, who is looking to perform website footprinting to gather information hidden in the web page header, such as connection status, content type, server information, and other metadata that can reveal details about the web server and its configuration. Burp Suite allows users to intercept, analyze, and modify traffic between the browser and the web server, which is crucial for uncovering such hidden information.

NEW QUESTION # 15

John, a professional hacker, is trying to perform APT attack on the target organization network. He gains access to a single system of a target organization and tries to obtain administrative login credentials to gain further access to the systems in the network using

various techniques.

What phase of the advanced persistent threat lifecycle is John currently in?

- A. Search and exfiltration
- B. Initial intrusion
- C. Persistence
- **D. Expansion**

Answer: D

Explanation:

The phase described where John, after gaining initial access, is attempting to obtain administrative credentials to further access systems within the network, is known as the 'Expansion' phase of an Advanced Persistent Threat (APT) lifecycle. This phase involves the attacker expanding their foothold within the target's environment, often by escalating privileges, compromising additional systems, and moving laterally through the network. The goal is to increase control over the network and maintain persistence for ongoing access.

This phase follows the initial intrusion and sets the stage for establishing long-term presence and eventual data exfiltration or other malicious objectives. References:

NEW QUESTION # 16

Jame, a professional hacker, is trying to hack the confidential information of a target organization. He identified the vulnerabilities in the target system and created a tailored deliverable malicious payload using an exploit and a backdoor to send it to the victim. Which of the following phases of cyber kill chain methodology is Jame executing?

- A. Installation
- B. Reconnaissance
- **C. Weaponization**
- D. Exploitation

Answer: C

NEW QUESTION # 17

Alison, an analyst in an XYZ organization, wants to retrieve information about a company's website from the time of its inception as well as the removed information from the target website.

What should Alison do to get the information he needs.

- A. Alison should run the Web Data Extractor tool to extract the required website information.
- B. Alison should use SmartWhois to extract the required website information.
- C. Alison should recover cached pages of the website from the Google search engine cache to extract the required website information.
- **D. Alison should use <https://archive.org> to extract the required website information.**

Answer: D

Explanation:

To retrieve historical information about a company's website, including content that may have been removed or altered, Alison should use the Internet Archive's Wayback Machine, accessible at <https://archive.org>. The Wayback Machine is a digital archive of the World Wide Web and other information on the Internet, providing free access to snapshots of websites at various points in time. This tool is invaluable for researchers and analysts looking to understand the evolution of a website or recover lost information. References:
