

Reliable SAP C-S4CPB-2602 Test Camp, C-S4CPB-2602 Latest Test Prep

Briefly speaking, our C-S4CPB-2602 training guide gives priority to the quality and service and will bring the clients the brand new experiences and comfortable feelings. As the pass rate of our C-S4CPB-2602 exam questions is high as 98% to 100%. Numerous of our loyal customers praised that they felt cool to study with our C-S4CPB-2602 Study Guide and pass the exam. The 24/7 service also let them feel at ease for they can contact with us at any time. What are you still hesitating for? Hurry to buy our C-S4CPB-2602 learning engine now!

Three Formats of Actual SAP C-S4CPB-2602 Exam Questions Offered By ActualCollection! SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) C-S4CPB-2602 genuine dumps are designed in the three best formats. The name of these three formats of ActualCollection SAP C-S4CPB-2602 exam questions is C-S4CPB-2602 PDF Questions formats, Web-based and desktop SAP C-S4CPB-2602 practice exam software. SAP C-S4CPB-2602 dumps pdf format will help you to immediately prepare for the SAP C-S4CPB-2602 exam.

100% Pass Quiz SAP Marvelous Reliable C-S4CPB-2602 Test Camp

Compared with products from other companies, our C-S4CPB-2602 practice materials are responsible in every aspect. After your purchase of our C-S4CPB-2602 exam braindumps, the after sales services are considerate as well. We have considerate after sales services with genial staff. They are willing to solve the problems of our C-S4CPB-2602 training guide 24/7 all the time. If you have any question that you don't understand, just contact us and we will give you the most professional advice immediately.

SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C_S4CPB_2602) Sample Questions (Q18-Q23):

NEW QUESTION # 18

SIMULATION

Create a Custom Launchpad Space and Page
Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a Launchpad Space and Page with the information below.

□

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z_EMPLOYEES_ALL_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z_ALL_EMP_#####

Space Description: General

Space Title: General

Page ID: Z_ALL_EMP_#####

Page Title: General

Page Description: General

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z_EMPLOYEES_ALL_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z_ALL_EMP_#####

Space Description: General

Space Title: General

Page ID: Z_ALL_EMP_#####

Page Title: General

Page Description: General

□

NEW QUESTION # 19

SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the Launchpad Space to your custom business role. Edit the Launchpad Page to add the applications listed below as tiles (standard "preferred" square tile) with the Section Title: Self-Services.

Manage My Timesheet

Concur Travel Expense

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to complete the launchpad setup for the custom all-employee role by:

assigning the custom Launchpad Space to the business role,

editing the Launchpad Page,

creating a section titled Self-Services,

adding the required applications as standard preferred square tiles:

Manage My Timesheet

Concur Travel Expense

Business Scenario Explanation

In the earlier tasks, you created:

a custom all-employee business role,

the required business catalog assignments,

a custom launchpad space and page.

This task completes that setup by adding the actual application tiles that end users will see on the launchpad.

The goal is to make it easy for employees to find the relevant self-service applications without searching manually.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values listed in the task.

The section title must be exactly:

Self-Services

The two tiles must be:

Manage My Timesheet

Concur Travel Expense

Save after editing the page.

Prerequisites

Before doing this task, the following should already exist:

custom business role:

Z_EMPLOYEES_ALL_#####

assigned business catalogs:

SAP_HCM_BC_EMP_PC

SAP_CON_BC_CTE_ESS_PC

custom launchpad space and page created for the role

page title and description:

General

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This is the app where the custom all-employee role is maintained. The launchpad space assignment and page navigation are controlled from here.

Step 2: Open the custom all-employee business role

In Maintain Business Roles:

Search for your custom business role:

Z_EMPLOYEES_ALL_#####

Open the role.

Example

If your suffix is 000013, the role is:

Z_EMPLOYEES_ALL_000013

Explanation:

You must work in the custom all-employee role because the launchpad space and page belong to this role.

Step 3: Open the Launchpad Spaces tab

Inside the role:

Click:

Launchpad Spaces

Explanation:

This tab shows which launchpad space is assigned to the role.

Step 4: Verify the Launchpad Space is assigned

Check that the assigned space exists.

In your execution, the assigned space followed this pattern:

Z_ALL_EMP_#####

Explanation:

The task says to assign the launchpad space to the custom business role.

If the space already appears in the assigned list, then this part is already complete.

If the space is not listed:

Click Add

Create or assign the required custom space

Save the role

Step 5: Open the assigned Launchpad Space

In the assigned launchpad spaces list:

Click the arrow > at the far right of the space row.

Explanation:

This opens Space Details, where the page linked to the space can be accessed.

Step 6: Open the Pages tab

In Space Details:

Click:

Pages

Explanation:

A space can contain one or more pages.

This task requires you to edit the page content.

Step 7: Open the Launchpad Page

In the Pages list:

Open the page row by clicking the arrow > at the far right.

In your run, the page followed this pattern:

Z_ALL_EMP_#####

Explanation:

This opens Page Details, where the page content can be edited.

Step 8: Open Page Content

Inside Page Details:

Click the tab:

Page Content

Explanation:

This is the area where sections and application tiles are maintained.

Step 9: Click Edit

On the Page Content screen:

Click Edit

Explanation:

The page must be in edit mode before you can create sections or add app tiles.

Step 10: Enter the section title

In the section title field, enter exactly:

Self-Services

Explanation:

This creates the section in which the required employee self-service app tiles will be placed.

The title must match the task exactly.

Step 11: Add the tile "Concur Travel Expense"

On the right side of the page content screen, in the list of apps derived from the assigned catalogs:

Find:

Concur Travel Expense

Click:

Add

Explanation:

This adds the Concur employee self-service app tile into the Self-Services section.

Step 12: Add the tile "Manage My Timesheet"

Still on the right side app list:

Find:

Manage My Timesheet

Click:

Add

Explanation:

This adds the timesheet app tile into the same Self-Services section.

Step 13: Verify both tiles are visible in the section

After adding both apps, confirm that the page content now shows:

Concur Travel Expense

Manage My Timesheet

under the section:

Self-Services

Explanation:

This confirms the tiles were placed correctly on the page.

Step 14: Save the page

Click:

Save

Explanation:

This finalizes the page changes.

If you do not save, the tiles and section will not be retained.

Step 15: Verify the role is assigned to your business user

To verify the page and tiles from the home screen, make sure the custom all-employee role is assigned to your own business user.

Open:

Maintain Business Users

Then:

Open your own user

Open Assigned Business Roles

Confirm the role is assigned:

Z_EMPLOYEES_ALL_#####

Save if needed

Explanation:

Without role assignment, the launchpad space and page may not appear on the homepage for your user.

Step 16: Refresh the homepage

Go back to Home.

Then:

Refresh the browser or reload the session

Open the page/tab:

General

Explanation:

This ensures the launchpad updates and shows the newly added content.

Step 17: Verify the result on the homepage

On the General page, verify that you can see:

section title:

Self-Services

tile:

Concur Travel Expense

tile:

Manage My Timesheet

Explanation:

This is the final proof that the task was completed successfully.

Expected Result

After this task is completed successfully:

the custom launchpad space is assigned to the business role,

the page contains a section named Self-Services,

the page shows the tiles:

Concur Travel Expense

Manage My Timesheet

the tiles are visible on the launchpad homepage under the General page.

NEW QUESTION # 20

SIMULATION

Business Scenario You are working on an implementation project and need to create a test user in the system for demonstrating the professional services business processes to project managers during your upcoming Fit-to-Standard workshop. Follow the instructions below to create a new test user with a basic import of worker and work agreement data.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the Project Manager - Professional Services (BR_PROJECT_MANAGER_PROF) business role to the new user and save.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the Project Manager - Professional Services business role to the newly created test user so that the user can perform the professional-services processes required during the Fit-to-Standard workshop.

The required business role is:

Business Role ID: BR_PROJECT_MANAGER_PROF

Business Role Description: Project Manager - Professional Services

Business Scenario Explanation

In the previous task, a new test user was created for demonstrating professional services processes.

That new user now needs the correct project-manager authorization.

Without this business role, the test user will not have access to the project-manager apps, pages, and processes needed for the workshop demonstration.

This task connects the newly created user to the standard professional-services project manager role.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values as required.

The business role ID must be:

BR_PROJECT_MANAGER_PROF

Do not use a similar role or partial match.

Save at the end, otherwise the assignment remains incomplete.

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to the system.

Use the app search.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to maintain business users and assign business roles.

Since the new user was created in the previous task, this is the correct app to assign the new role.

Step 2: Search for the newly created Project Manager test user

In Maintain Business Users:

In the filter/search area, enter the user name of the new test user.

The required user name format is:

PM#####

□ Example

If your group number suffix is 0000457, then search for:

PM0000457

Click Go.

Explanation:

You must open the newly created project manager test user, not your own user.

The role assignment in this task belongs to the imported test user created in Task 4.

□ Step 3: Open the new business user record

From the search results:

Click the user entry with:

User Name = PM#####

Open the detail page.

Explanation:

This opens the worker/business user record where the Project Manager role will be assigned.

□ Step 4: Verify that you are on the correct user

Before editing, confirm the business user details are correct.

Typical expected values are:

User Name = PM#####

First Name = Project

Last Name = Manager #####

E-Mail = PM#####@dummy.sap.com

Explanation:

This check is important because assigning the role to the wrong user would cause the simulation validation to fail.

Step 5: Switch to Edit mode

On the business user detail page:

Click Edit

Explanation:

Edit mode is required so the role list can be changed.

Step 6: Open the "Assigned Business Roles" tab

Inside the business user record:

Click the tab:

Assigned Business Roles

Explanation:

This tab shows all roles currently assigned to the new test user and is the correct place to add the project manager role.

Step 7: Click Add

In the Assigned Business Roles section:

Click Add

The system opens the popup:

Add Business Roles

Explanation:

This popup is used to search and add standard SAP-delivered business roles to the user.

Step 8: Search for the Project Manager role

In the Add Business Roles popup:

In the filter field for business role ID, enter:

BR_PROJECT_MANAGER_PROF

Click Go

Select:

Project Manager - Professional Services

Business Role ID: BR_PROJECT_MANAGER_PROF

Explanation:

This is the exact standard business role required by the task.

It provides the professional-services project manager access for the test user.

Step 9: Add the role

After selecting the role:

Click OK or Apply

Explanation:

At this point, the role is added to the user in draft mode, but the change is not yet final until saved.

Step 10: Save the business user

Back on the user detail page:

Click Save

Explanation:

This is the final required step.

If you do not save, the role assignment will not be stored and the task will not be completed successfully.

Step 11: Verify the assignment

After saving, confirm that the user now has the role:

Project Manager - Professional Services

BR_PROJECT_MANAGER_PROF

Explanation:

This confirms that the new test user is now properly prepared for later professional-services process demonstrations.

Expected Result

After the task is completed:

the new test user PM##### exists,

the role BR_PROJECT_MANAGER_PROF is assigned,

the user is saved successfully,

the user can later be used as a professional-services project manager in the workshop scenario.

NEW QUESTION # 21

SIMULATION

Create a Custom Business Role with Restrictions

Business Scenario:

You are building a custom business role with restrictions to ensure the end users assigned the role have only the minimum level of access necessary to complete their core job tasks. The end users are project managers based in the United States. They should only be able to create projects, edit projects, and access projects that are occurring in the United States. They should not be able to staff any resources outside of the United States. Write, Read, and Value Help access should be restricted to only the United States for all relevant fields.

Prerequisites:

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note: Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Use the template for the business role Project Manager - Professional Services (SAP_BR_PROJECT_MANAGER_PROF) to create a new business role with the following information:

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom business role for project managers in the United States by using the standard SAP template role Project Manager - Professional Services and then restricting the role so users only have the minimum access needed for their job.

The template role used is:

Template Business Role ID: SAP_BR_PROJECT_MANAGER_PROF

Template Business Role Description: Project Manager - Professional Services The new custom role must be created with exact values defined in the task.

Business Scenario Explanation

In this simulation, you are building a restricted custom role for project managers who work only in the United States.

The goal is to ensure that these end users:

can create and edit projects,

can access only projects occurring in the United States,

cannot work with projects or staffing outside the US,

have only the minimum level of authorization needed.

This is done in two major parts:

Create a new custom business role from the standard SAP template

Restrict the role values so only US-related data is allowed

Important Notes

Always replace ##### with the last 6 digits of your group number.

Every value must be entered exactly as shown.

Even one missing space or incorrect character can cause the simulation validation to fail.

You must also create and assign a launchpad space as part of the custom role creation.

Required Values for Role Creation

Use the following values exactly as shown in the task image.

Parameter

Value

New Business Role ID

BR_PROJECT_MANAGER_PROF_US_#####

New Business Role Description

Project Manager - Professional Services - US - #####

Option for Launchpad Spaces

Create and Assign Spaces Based on Space Templates

New Space ID

ZBR_PROJECT_MANAGER_PROF_US_#####

Activate IAM Apps

Yes (check the box)

Example

If your suffix is 000457, the values become:

BR_PROJECT_MANAGER_PROF_US_000457

Project Manager - Professional Services - US - 000457

ZBR_PROJECT_MANAGER_PROF_US_000457

Detailed Step-by-Step Procedure

Part 1: Open the standard template role

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to maintain standard and custom business roles.

Because this task requires creating a custom role from an existing template, this is the correct starting app.

Step 2: Search for the template role

Inside Maintain Business Roles:

In the search/filter area, search for:

SAP_BR_PROJECT_MANAGER_PROF

or

Project Manager - Professional Services

Open the standard SAP template role.

Explanation:

You must start from the standard template role because the task explicitly says to use the template for:

Project Manager - Professional Services

SAP_BR_PROJECT_MANAGER_PROF

Part 2: Create the custom role from the template

Step 3: Click "Create Derived Business Role"

On the template role page:

Click:

Create Derived Business Role

Explanation:

This function creates a customer-specific copy based on the standard SAP business role template.

It preserves the delivered role content but allows you to define your own role ID, description, restrictions, and launchpad space.

Step 4: Enter the custom role information

In the creation popup, enter the values exactly as follows:

Template = SAP_BR_PROJECT_MANAGER_PROF

New Business Role ID = BR_PROJECT_MANAGER_PROF_US_#####

New Business Role Description = Project Manager - Professional Services - US - ##### Option for Launchpad Spaces = Create and Assign Spaces Based on Space Templates New Space ID = ZBR_PROJECT_MANAGER_PROF_US_##### Activate

IAM Apps = checked Explanation:

These values define the new custom project manager role that will later be restricted to US-only access.

The space option is important because the task expects the role to include its own launchpad space.

Step 5: Confirm creation

Click OK

Explanation:

SAP now creates the custom role derived from the template and assigns the new launchpad space at the same time.

Part 3: Verify the newly created custom role

Step 6: Review the new custom role

After creation, SAP opens the new custom role.

Verify:

Business Role ID = BR_PROJECT_MANAGER_PROF_US_#####

Business Role Description = Project Manager - Professional Services - US - ##### Business Role Template ID = SAP_BR_PROJECT_MANAGER_PROF Explanation:

This confirms the derived role was created correctly from the right SAP template.

Part 4: Maintain role restrictions

Step 7: Open "Maintain Restrictions"

On the custom role page:

Click:

Maintain Restrictions

Explanation:

This is the most important part of the task.

You are not only creating a role - you are also limiting the role so it only allows US-related values.

Step 8: Understand the rule for restriction maintenance

The PDF/task logic is:

Fields explicitly listed in the restriction table → keep them Restricted and enter the required values All other fields not listed in the task table → set them to Not Maintained Explanation:

This is essential.

If extra fields remain restricted or blank, the role may not validate correctly.

The safest approach is:

only maintain the required fields,

mark all unrelated fields as Not Maintained.

□ Part 5: Enter the required US restrictions

From your exercise run, the maintained values included restrictions such as:

Keep these kinds of fields restricted with US/1710 values where required Examples from your run:

Bank Country/Region Key

Read, Value Help = US

Value Help = US

Company Code

use 1710 only where the task table explicitly requires it

Purchasing Organization

use 1710 where required

Valuation Area

use 1710 where required

Explanation:

These are the exact business restrictions that make the role usable only for the intended geography and business scope.

Step 9: Set unrelated restriction fields to "Not Maintained"

For every field not included in the task's restriction list, choose:

Not Maintained

Examples from your screenshots included fields like:

Accounting Principle

Authorization Group for Business Partners

Billing Type

These should be Not Maintained unless they are explicitly listed in the task's required restriction table.

Explanation:

This removes unnecessary access and matches the task wording that all other fields should be set to Not Maintained.

□ Step 10: Save the restrictions

After all required values are entered and unrelated fields are marked Not Maintained:

Click Save

Explanation:

This saves the restriction profile of the role.

If you do not save here, the role will remain incomplete or in draft.

Part 6: Verify launchpad space and page creation

Step 11: Go to Launchpad Spaces

In the custom role:

Open the tab:

Launchpad Spaces

Verify that the assigned space exists:

ZBR_PROJECT_MANAGER_PROF_US_#####

Explanation:

Because you selected Create and Assign Spaces Based on Space Templates, SAP should have created and assigned the launchpad space automatically.

Step 12: Verify the created space

Open the assigned space and confirm:

the custom space exists,

it is customer-managed,

the pages are assigned correctly.

Explanation:

This proves that the new business role has its own launchpad structure as required by the task.

Expected Result

After this task is completed successfully:

a new custom role exists based on SAP_BR_PROJECT_MANAGER_PROF,

the role uses the exact required ID and description,

the role has a custom launchpad space,

IAM apps are activated,

restrictions are maintained for US-only access,

all irrelevant fields are set to Not Maintained,

the role is saved successfully.

NEW QUESTION # 22

SIMULATION

Set up an Integration Scenario

Business Scenario

You are responsible for setting up the Bank Integration with File Interface (1EG). During an actual implementation, you would first download the Set-up Instructions for the business process from SAP Signavio Process Navigator. In this practical exam, all the information will be provided to you, so you do not need to download the Set-up Instructions.

Prerequisites

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Your Task

Create a Communication System with the information listed below and save.

Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a Communication System for the integration scenario Bank Integration with File Interface (1EG).

This communication system will later be used in the communication arrangement and will reference the communication user created in the previous task.

Business Scenario Explanation

In this scenario, you are setting up:

Bank Integration with File Interface (1EG)

In SAP S/4HANA Cloud, the technical setup typically requires:

a Communication User

a Communication System

a Communication Arrangement

In Task 13, you created the communication user.

In Task 14, you now create the communication system and link that previously created communication user for inbound communication.

The communication system represents the external or technical integration partner definition used in the scenario.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values shown in the task.

Do not change capitalization, underscores, or spacing.

The communication user assigned in this task must be the one created in the previous step:

1EG_COMM_USER_#####

Required Values

Use the following values exactly as shown in the task image.

Example

If your suffix is 000013, then the values become:

System ID = 1EG_SYSTEM_000013

System Name = Bank Integration with File Interface

Host Name = DUMMY

Inbound Communication User = 1EG_COMM_USER_000013

Step 1: Open the app "Communication Systems"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the search bar or app finder.

Search for:

Communication Systems

Open the app.

Explanation:

This app is used to create and maintain technical communication systems for integration scenarios.

Because the task explicitly asks to create a Communication System, this is the correct app.

Step 2: Start creating a new Communication System

Inside the Communication Systems app:

Click:

New

Explanation:

This starts the creation of a new communication system record.

Step 3: Enter the System ID

In the communication system creation screen, enter:

System ID = 1EG_SYSTEM_#####

Example

If your suffix is 000013, enter:

1EG_SYSTEM_000013

Explanation:

This is the technical ID of the communication system.

It must exactly match the task requirement.

Step 4: Enter the System Name

In the System Name field, enter exactly:

Bank Integration with File Interface

Explanation:

This is the descriptive name of the communication system and must be entered exactly as provided.

Step 5: Enter the Host Name

In the Host Name field, enter exactly:

DUMMY

Explanation:

For this simulation, the host is not a real productive endpoint.

The task explicitly requires the placeholder value DUMMY.

Step 6: Maintain the inbound communication user

Locate the section for:

Users for Inbound Communication

Then:

Click Add or select the entry field/value help

Choose the communication user created in the previous task:

1EG_COMM_USER_#####

Example

If your suffix is 000013, select:

1EG_COMM_USER_000013

Explanation:

This is a critical link between the communication user and the communication system.

Without assigning the previously created communication user, the communication system setup is incomplete.

Step 7: Verify the inbound user assignment

After adding the inbound communication user, confirm that the selected user is:

1EG_COMM_USER_#####

Explanation:

This confirms that the system will use the correct technical user for inbound communication in the later communication arrangement.

Step 8: Review all entered values

Before saving, check the following:

System ID = 1EG_SYSTEM_#####

System Name = Bank Integration with File Interface

Host Name = DUMMY

Users for Inbound Communication = 1EG_COMM_USER_#####

Explanation:

This review helps avoid validation issues caused by incorrect naming, missing underscores, or selecting the wrong communication user.

Step 9: Save the Communication System

Click:

Save

Explanation:

This finalizes the creation of the communication system.

Without saving, the communication system will not exist for the next task.

Step 10: Verify the saved Communication System

After saving, confirm that the communication system exists and displays the correct values:

1EG_SYSTEM_#####

Bank Integration with File Interface

Host = DUMMY

inbound user = 1EG_COMM_USER_#####

Explanation:

This confirms the system is successfully created and ready for the communication arrangement setup in the next step.

Expected Result

After this task is completed successfully:

the communication system exists,

the system ID matches the required naming pattern,

the system name is correct,

the host name is DUMMY,

the previously created communication user is assigned for inbound communication, the system is saved successfully.

NEW QUESTION # 23

.....
