備

AZ-500認定試験に合格することは難しいようです。試験を申し込みたいあなたは、いまどうやって試験に準備すべきなのかで悩んでいますか。そうだったら、下記のものを読んでもください。いまAZ-500試験に合格するショートカットを教えてください。あなたを試験に一発合格させる素晴らしいAZ-500試験に関連する参考書が登場しますよ。それはPass4TestのAZ-500問題集です。気楽に試験に合格したければ、はやく試しに来てください。

Microsoft Azure Security Technologies 認定 AZ-500 試験問題 (Q494-Q499):

質問 # 494

You have an Azure subscription named Sub1 that contains the virtual machines shown in the following table.

You need to ensure that the virtual machines in RG1 have the Remote Desktop port closed until an authorized user requests access. What should you configure?

- A. just in time (JIT) VM access
- B. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- C. Azure Active Directory (Azure AD) conditional access
- D. an application security group

正解: A

解説:

Just-in-time (JIT) virtual machine (VM) access can be used to lock down inbound traffic to your Azure VMs, reducing exposure to attacks while providing easy access to connect to VMs when needed.

Note: When just-in-time is enabled, Security Center locks down inbound traffic to your Azure VMs by creating an NSG rule. You select the ports on the VM to which inbound traffic will be locked down. These ports are controlled by the just-in-time solution. When a user requests access to a VM, Security Center checks that the user has Role-Based Access Control (RBAC) permissions that permit them to successfully request access to a VM. If the request is approved, Security Center automatically configures the Network Security Groups (NSGs) and Azure Firewall to allow inbound traffic to the selected ports and requested source IP addresses or ranges, for the amount of time that was specified. After the time has expired, Security Center restores the NSGs to their previous states. Those connections that are already established are not being interrupted, however.

質問 # 495

You have two Azure subscriptions named Sub1 and Sub2 that contain the virtual networks shown in the following table.

You have an Azure Virtual Network Manager instance named AVNMM1 that has the following configurations:

* Management scope: Sub1

* Network groups:

* NetGrp1: Static membership that includes VNet1

* NetGrp2: Dynamic membership that has the following criteria: Tags that contain Red

* Security admin rule collection: SARule1

* Deployed to all Azure regions

You create two new virtual networks as shown in the following table.

Which virtual networks will have SARule1 applied?

- A. VNet1 and VNet2 only
- B. VNet1, VNet2, VNet3, and VNet4
- C. VNet2 and VNet3 only
- D. VNet2, VNet3, and VNet4 only
- E. VNet1, VNet2, and VNet3 only

正解: E

質問 # 496

You have the hierarchy of Azure resources shown in the following exhibit.

RG1, RG2, and RG3 are resource groups.

RG2 contains a virtual machine named VM1.

You assign role-based access control (RBAC) roles to the users shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

正解:

解説:

質問 # 497

You plan to create an Azure Kubernetes Service (AKS) cluster in an Azure subscription.

Valid Fast2test AZ-500 Exam PDF Dumps - New AZ-500 Real Exam Questions

The manifest of the registered server application is shown in the following exhibit.

You need to ensure that the AKS cluster and Azure Active Directory (Azure AD) are integrated.

Which property should you modify in the manifest?

- A. groupMembershipClaims
- B. keyCredentials
- C. accessTokenAcceptedVersion
- D. acceptMappedClaims

正解: A

Manage security operations

Testlet 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Litware, Inc. is a digital media company that has 500 employees in the Chicago area and 20 employees in the San Francisco area.

Existing Environment

Litware has an Azure subscription named Sub1 that has a subscription ID of 43894a43-17c2-4a39-8cfc-3540c2653ef4.

Sub1 is associated to an Azure Active Directory (Azure AD) tenant named litwareinc.com. The tenant contains the user objects and the device objects of all the Litware employees and their devices. Each user is assigned an Azure AD Premium P2 license. Azure AD Privileged Identity Management (PIM) is activated.

The tenant contains the groups shown in the following table.

The Azure subscription contains the objects shown in the following table.

<https://www.fast2test.com/AZ-500-practice-test.html> 56

Valid Fast2test AZ-500 Exam PDF Dumps - New AZ-500 Real Exam Questions

Azure Security Center is set to the Standard tier.

Requirements

Planned Changes

Litware plans to deploy the Azure resources shown in the following table.

Identity and Access Requirements

Litware identifies the following identity and access requirements:

- * All San Francisco users and their devices must be members of Group1.
- * The members of Group2 must be assigned the Contributor role to RG2 by using a permanent eligible assignment.
- * Users must be prevented from registering applications in Azure AD and from consenting to applications that access company information on the users' behalf.

Platform Protection Requirements

<https://www.fast2test.com/AZ-500-practice-test.html> 57

Valid Fast2test AZ-500 Exam PDF Dumps - New AZ-500 Real Exam Questions

Litware identifies the following platform protection requirements:

- * Microsoft Antimalware must be installed on the virtual machines in RG1.
- * The members of Group2 must be assigned the Azure Kubernetes Service Cluster Admin Role.
- * Azure AD users must be able to authenticate to AKS1 by using their Azure AD credentials.
- * Following the implementation of the planned changes, the IT team must be able to connect to VM0 by using JIT VM access.
- * A new custom RBAC role named Role1 must be used to delegate the administration of the managed disks in RG1. Role1 must be available only for RG1.

Security Operations Requirements

Litware must be able to customize the operating system security configurations in Azure Security Center.

Data and Application Requirements

Litware identifies the following data and applications requirements:

- * The users in Group2 must be able to authenticate to SQLDB1 by using their Azure AD credentials.
- * WebApp1 must enforce mutual authentication.

General Requirements

Litware identifies the following general requirements:

- * Whenever possible, administrative effort must be minimized.
- * Whenever possible, use of automation must be maximized.

質問 # 498

You have an Azure subscription that contains a user named Admin1 and a virtual machine named VM1. VM1 runs Windows Server 2019 and was deployed by using an Azure Resource Manager template. VM1 is the member of a backend pool of a public Azure Basic Load Balancer.

Admin1 reports that VM1 is listed as Unsupported on the Just in time VM access blade of Azure Security Center.

You need to ensure that Admin1 can enable just in time (JIT) VM access for VM1.

What should you do?

- A. Replace the Basic Load Balancer with an Azure Standard Load Balancer.
- B. Assign an Azure Active Directory Premium Plan 1 license to Admin1.
- C. Create and configure an additional public IP address for VM1.
- **D. Create and configure a network security group (NSG).**

正解: D

解説:

Explanation/Reference:
