## Free PDF Quiz NCP-DB-6.10 - Newest Online Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Test

Our company has always been following the trend of the NCP-DB-6.10 certification. Our research and development team not only study what questions will come up in the NCP-DB-6.10 exam. The content of our NCP-DB-6.10 practice materials is chosen so carefully that all the questions for the exam are contained. And our study materials have three formats which help you to read, test and study anytime, anywhere. This means with our products you can prepare for exams efficiently. If you desire a NCP-DB-6.10 Certification, our products are your best choice.

## Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q45-Q50):

### NEW QUESTION # 45

An administrator needs to restore a source database from a point in time at 21:50, but the restore option is not available. What could explain the matter?

- A. Selected Restore time is not available.
- B. Point in time must be within the most recent range.
- **C. Logs to Backup must be run first.**
- D. Change to snapshot option.

**Answer: C**

**Explanation:**

The provided exhibit shows the NDB Time Machine restore interface for October 31, 2024, with a Point-in-Time (PIT) restore option selected at 21:50. However, the restore option is unavailable, as indicated by the question. The exhibit includes a warning "Logs to Backup: The database may contain additional logs. Backup any remaining logs before restore or they will be lost." This suggests that PIT restore requires continuous log retention, and if logs since the last snapshot (at 01:10:00) are not backed up, the restore to 21:50 cannot proceed. Running the "Logs to Backup" operation ensures all transaction logs are captured, enabling PIT restore by allowing NDB to replay logs to the desired point.

#### NEW QUESTION # 46

An administrator needs to perform LCM upgrades on an AHV cluster registered with NDB. The cluster hosts NDB-provisioned database server VMs that are part of a database server cluster.

What should the administrator do to allow the DB Server VMs to stay available while the cluster is being upgraded?

- A. Update Nutanix Cluster
- **B. Set VM-Host Affinity**
- C. Unset VM-Host Affinity
- D. Remove Nutanix Cluster

**Answer: B**

**Explanation:**

The correct answer is B because setting VM-Host affinity ensures that the DB Server VMs are not migrated to another host during the LCM upgrade process. This way, the DB Server VMs can continue to serve the database requests without interruption. Option A is incorrect because updating the Nutanix cluster does not prevent the DB Server VMs from being moved to another host. Option C is incorrect because removing the Nutanix cluster from NDB will make the DB Server VMs unmanaged by NDB and lose the benefits of NDB features. Option D is incorrect because unsetting VM-Host affinity will allow the DB Server VMs to be migrated to another host during the LCM upgrade process, which may cause downtime or performance degradation.

#### NEW QUESTION # 47

What is the first step to install NDB on a Nutanix AHV cluster?

- A. NDB is offered as a SaaS service and doesn't require any installations.
- B. Run LCM update to get the latest version of NDB.
- C. Open Prism Central and enable the NDB VM in the settings menu.
- D. **Download the QCOW2 image file of NDB and upload it to Prism Element.**

#### Answer: D

Explanation:

To install NDB on a Nutanix AHV cluster, you need to download the QCOW2 image file of NDB from the Nutanix Support Portal and upload it to Prism Element. This image file contains the NDB software and the CentOS operating system. After uploading the image, you need to create a VM from the image and configure the network settings. Then, you need to register the NDB VM with Prism Central and enable the NDB service in the settings menu.

#### NEW QUESTION # 48

What is the main purpose of using a Database Profile during database creation?

- A. Manage database patch bundles
- B. **Apply a standardized set of configurations to a database instance**
- C. Generate capacity forecasting reports
- D. Define the storage location of backups

#### Answer: B

Explanation:

Database Profiles define reusable settings-CPU/Memory, storage layout, and DB parameters-to ensure consistent and predictable deployments.

#### NEW QUESTION # 49

An administrator has been asked to provision a new Oracle single instance database, but cannot proceed with the first step of the wizard. Which statement best describes the current situation?

- A. A snapshot must be taken on the original DB.
- B. **Software profile is missing.**
- C. No remote clusters are configured.
- D. Time Machine is not configured.

#### Answer: B

Explanation:

When an administrator cannot proceed with the first step of the wizard to provision a new Oracle single instance database in NDB, the most likely reason is that a software profile for Oracle is missing. NDB requires a software profile (which defines the database version, patches, and configuration) to provision a database instance. Without a profile created from a Reference: VM or uploaded manually, the wizard cannot proceed, as it relies on this profile to configure the instance correctly.

#### NEW QUESTION # 50

.....

With the Software version of our NCP-DB-6.10 exam questions, you will find that there are no limits for the amount of the computers when download and installation and the users. You can use our NCP-DB-6.10 study materials to stimulate the exam to adjust yourself to the atmosphere of the real exam and adjust your speed to answer the questions. The other two versions also boost the strength and applicable method and you could learn our NCP-DB-6.10 training quiz by choosing the most suitable version to according to your practical situation.

**Training NCP-DB-6.10 Materials:** <https://www.examstorrent.com/NCP-DB-6.10-exam-dumps-torrent.html>

We are not only providing valid and accurate NCP-DB-6.10 exam torrent with cheap price but also our service are also the leading position, We build close relationships with customers who come from many countries around the world and win great reputation, so you can totally trust us and our Training NCP-DB-6.10 Materials - Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 exam questions, Yes, don't worry.

Decide on a Physical Topology, XP Behind the Scenes Changes, We are not only providing valid and accurate NCP-DB-6.10 exam torrent with cheap price but also our service are also the leading position.

## Pass Guaranteed Quiz Nutanix - NCP-DB-6.10 –Valid Online Test

We build close relationships with customers who come from many NCP-DB-6.10 countries around the world and win great reputation, so you can totally trust us and our Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 exam questions.

Yes, don't worry, As we all know there is no such thing as a free lunch, With our great efforts, our NCP-DB-6.10 practice dumps have been narrowed down and targeted to the NCP-DB-6.10 examination.
