Oracle 1z0-809 Exam Book - 1z0-809 Customized Lab Simulation

The learning material is available in three different easy-to-use forms. The first one is a PDF form. The students can save the 1z0-809 questions by taking out their prints or can access them on their smartphones, tablets, and laptops. The PDF form can be used anywhere anytime and is essential for applicants who like to learn from their smart devices. The second form is Java SE 8 Programmer II (1z0-809) web-based practice test which can be taken from browsers.

Oracle Java SE 8 Programmer II Sample Questions (Q25-Q30):

NEW QUESTION # 25

Given the code fragment:

```
public static void main(String[] args) {  
    ArrayList<String> myList = new ArrayList();  
    String[] myArray;  
    try {  
        while (true) {  
            myList.add("My String");  
        }  
    } catch (RuntimeException re) {  
        System.out.println("Caught a RuntimeException");  
    }  
    catch (Exception e) {  
        System.out.println("Caught an Exception");  
    }  
    System.out.println("Ready to use");  
}
```

What is the result?

- A. Execution terminates in the first catch statements, and Caught a RuntimeException is printed to the console.

- B. The code fails to compile because a throws keyword is required.
- C. Execution terminates in the second catch statement, and Caught an Exception is printed to the console.
- **D. A runtime error is thrown in the thread "main"**
- E. Execution completes normally, and Ready to use is printed to the console.

Answer: D

NEW QUESTION # 26

Given the code fragments:

```
class Caller implements Callable<String> {
    String str;
    public Caller (String s) {this.str=s;}
    public String call()throws Exception { return str.concat ("Caller");}
}
class Runner implements Runnable {
    String str;
    public Runner (String s) {this.str=s;}
    public void run () { System.out.println (str.concat ("Runner"));}
}
and
public static void main (String[] args) InterruptedException, ExecutionException {
    ExecutorService es = Executors.newFixedThreadPool(2);
    Future f1 = es.submit (new Caller ("Call"));
    Future f2 = es.submit (new Runner ("Run"));
    String str1 = (String) f1.get();
    String str2 = (String) f2.get();//line n1
    System.out.println(str1+ "."+ str2);
}
```

What is the result?

- A. The program terminates after printing:
Run Runner
Call Caller : Run
- B. A compilation error occurs at line n1.
- **C. The program prints:
Run Runner
Call Caller : null
And the program does not terminate.**
- D. An Execution is thrown at run time.

Answer: C

NEW QUESTION # 27

Given that data.txt and alldata.txt are accessible, and the code fragment:

```
public void writeFiles() throws IOException {
    BufferedReader br = new BufferedReader(new FileReader("data.txt"));
    BufferedWriter bw = new BufferedWriter(new FileWriter("alldata.txt"));
    String line = null;
    while ((line = br.readLine()) != null) {
        bw.append(line + "\n");
    }
    // line n1
}
```

What is required at line n1 to enable the code to overwrite alldata.txt with data.txt?

- A. br.close();
- B. bw.writeLn();
- **C. bw.flush();**
- D. br.flush();

Answer: C

NEW QUESTION # 28

Given the code fragment:

```
public class Employee {
    String name;
    boolean contract;
    double salary;
    Employee() {
        // line n1
    }
    public String toString() {
        return name + ":" + contract + ":" + salary;
    }
    public static void main(String[] args) {
        Employee e = new Employee();
        // line n2
        System.out.print(e);
    }
}
```

Which two modifications, when made independently, enable the code to print Joe:true:100.0?

- A) Replace line n2 with:
this.name = "Joe";
this.contract = true;
this.salary = 100;
- B) Replace line n1 with:
name = "Joe";
contract = TRUE;
salary = 100.0f;
- C) Replace line n1 with:
this.name = new String("Joe");
this.contract = new Boolean(true);
this.salary = new Double(100);
- D) Replace line n2 with:
e.name = "Joe";
e.contract = true;
e.salary = 100;
- E) Replace line n1 with:
this("Joe", true, 100);

- A. Option A
- B. Option C
- C. Option D
- D. Option B
- E. Option E

Answer: B,C

Explanation:

A is wrong because "Cannot use this. in a static context"

B is wrong because true is written in capital letters

E is wrong because "The constructor Employee(String, boolean, int) is undefined", there should be a parameterized constructor for class Employee

NEW QUESTION # 29

Given:

```

class Alpha {
    int ns;
    static int s;
    Alpha(int ns) {
        if (s < ns) {
            s = ns;
            this.ns = ns;
        }
    }
    void doPrint() {
        System.out.println("ns = " + ns + " s = " + s);
    }
}

And,

public class TestA {
    public static void main(String[] args) {
        Alpha ref1 = new Alpha(50);
        Alpha ref2 = new Alpha(125);
        Alpha ref3 = new Alpha(100);
        ref1.doPrint();
        ref2.doPrint();
        ref3.doPrint();
    }
}

```

What is the result?

- A. ns = 50 s = 50
ns = 125 s = 125
ns = 0 s = 125
- B. ns = 50 s = 50
ns = 125 s = 125
ns = 100 s = 100
- C. ns = 50 s = 125
ns = 125 s = 125
ns = 0 s = 125
- D. ns = 50 s = 125
ns = 125 s = 125
ns = 100 s = 125

Answer: C

NEW QUESTION # 30
