

Salesforce-AI-Specialist시험대비인증덤프, Salesforce-AI-Specialist최신업데이트덤프문제

2026 Itcertkr 최신 Salesforce-AI-Specialist PDF 버전 시험 문제집과 Salesforce-AI-Specialist 시험 문제 및 답변 무료 공유 : <https://drive.google.com/open?id=1rd5XDgE6JkclV2n21Z0FhrNYFmESWyc>

Itcertkr Salesforce Salesforce-AI-Specialist덤프 구매전 혹은 구매후 의문나는 점이 있으시면 한국어로 온라인서비스 혹은 메일로 상담 받으실수 있습니다. 기술 질문들에 관련된 문제들을 해결 하기 위하여 최선을 다 할것입니다. 고객님의 Itcertkr Salesforce Salesforce-AI-Specialist덤프와 서비스에 만족 할 수 있도록 저희는 계속 개발해 나갈 것입니다.

Salesforce Salesforce-AI-Specialist 시험요강:

주제	소개
주제 1	• Einstein Trust Layer: This section evaluates the skills of Salesforce AI specialists responsible for implementing security protocols and safeguarding data privacy. It emphasizes the security, privacy, and foundational features of the Einstein Trust Layer.
주제 2	• Generative AI in CRM Applications: This part of the exam assesses AI specialists' knowledge of generative AI within CRM systems. It covers the use of generative AI features in Einstein for Sales and Einstein for Service.
주제 3	• Model Builder: This portion of the exam focuses on Salesforce AI specialists' expertise in working with AI models within Salesforce environments. Candidates will need to demonstrate knowledge of when to use the Model Builder and how to configure standard, custom, or Bring Your Own Large Language Model (BYOLLM) generative models to meet business needs.
주제 4	• Agentforce Tools: In this topic, AI specialists get knowledge using agents when it is appropriate. Moreover, the topic explains the working of agents and reasoning engine powers Agentforce. Lastly, the topic focuses on managing and monitoring agent adoption.
주제 5	• Prompt Builder: This section evaluates the expertise of AI specialists working with Salesforce's AI tools. It focuses on the Prompt Builder feature, requiring candidates to understand its usage based on business needs.

Salesforce Salesforce-AI-Specialist최신 업데이트 덤프문제 - Salesforce-AI-Specialist시험덤프문제

Itcertkr 에서 제공해드리는 Salesforce Salesforce-AI-Specialist덤프는 아주 우수한 IT인증덤프자료 사이트입니다. IT업

계열리트한 강사들이 퍼펙트한 Salesforce Salesforce-AI-Specialist 덤프문제집을 제작하여 디테일한 시험문제와 답으로 여러분이 아주 간단히 Salesforce Salesforce-AI-Specialist 시험을 패스할 수 있도록 최선을 다하고 있습니다.

최신 AI Associate Salesforce-AI-Specialist 무료 샘플문제 (Q44-Q49):

질문 # 44

Universal Containers (UC) wants to enable its sales team to get insights into product and competitor names mentioned during calls. How should UC meet this requirement?

- A. Enable Einstein Conversation Insights, enable sales recording, assign permission sets, and customize insights with up to 50 products.
- B. Enable Einstein Conversation Insights, connect a recording provider, assign permission sets, and customize insights with up to 25 products.
- C. Enable Einstein Conversation Insights, assign permission sets, define recording managers, and customize insights with up to 50 competitor names.

정답: A

설명:

To provide the sales team with insights into product and competitor names mentioned during calls, Universal Containers should:

Enable Einstein Conversation Insights: Activates the feature that analyzes call recordings for valuable insights.

Enable Sales Recording: Allows calls to be recorded within Salesforce without needing an external recording provider.

Assign Permission Sets: Grants the necessary permissions to sales team members to access and utilize conversation insights.

Customize Insights: Configure the system to track mentions of up to 50 products and 50 competitors, providing tailored insights relevant to the organization's needs.

Option C accurately reflects these steps. Option A mentions defining recording managers but omits enabling sales recording within Salesforce. Option B suggests connecting a recording provider and limits customization to 25 products, which does not fully meet UC's requirements.

Reference:

Salesforce AI Specialist Documentation - Setting Up Einstein Conversation Insights: Provides instructions on enabling conversation insights and sales recording.

Salesforce Help - Customizing Conversation Insights: Details how to customize insights with up to 50 products and competitors.

Salesforce AI Specialist Exam Guide: Outlines best practices for implementing AI features like Einstein Conversation Insights in a sales context.

질문 # 45

An AI Specialist wants to ground a new prompt template with the User related list. What should the AI Specialist consider?

- A. The User related list is not supported in prompt templates.
- B. The User related list needs to be included on the record page.
- C. The User related list should have View All access.

정답: A

설명:

An AI Specialist wants to ground a new prompt template with the User related list. Grounding in prompt templates involves using data from related lists to provide context or additional information to the Large Language Model (LLM) when generating responses.

Key Consideration:

* Unsupported Related Lists in Prompt Templates:

* Limitation: The User related list is not supported in prompt templates for grounding purposes.

* Reason: Salesforce restricts certain objects and related lists from being used in prompt templates to maintain data security and integrity. The User object often contains sensitive information and is subject to strict access controls.

* Impact: Attempting to use the User related list in a prompt template will not work as expected because the system does not support it.

Why Options A and B are Incorrect:

* Option A (The User related list should have View All access):

* Incorrect: Even with View All access, the User related list is still not supported in prompt templates.

* Security Concerns: Granting View All access to the User object is a significant security risk and not a recommended practice.

* Option B (The User related list needs to be included on the record page):

- * Incorrect: Including the User related list on the record page does not affect its availability in prompt templates.
- * Irrelevance: The placement of the related list on the record page does not change the system's ability to access it in a prompt template.

References:

- * Salesforce AI Specialist Documentation - Prompt Templates Limitations:
- * Details the objects and related lists that are not supported in prompt templates.
- * Salesforce Help - Data Access in Prompt Templates:
- * Explains how data access and security considerations affect the use of objects in prompt templates.
- * Salesforce Trailhead - Understanding Prompt Template Grounding:
- * Provides insights into grounding prompt templates and the limitations involved.

Conclusion:

Since the User related list is not supported in prompt templates, the AI Specialist must consider alternative approaches. They might need to redesign the prompt template to use supported objects or related lists, or explore other methods to incorporate necessary user information while adhering to Salesforce's data access policies.

질문 # 46

Universal Containers (UC) wants to enable its sales team to use AI to suggest recommended products from its catalog. Which type of prompt template should UC use?

- A. Record summary prompt template
- **B. Flex prompt template**
- C. Email generation prompt template

정답: B

설명:

Universal Containers (UC) wants to enable its sales team to leverage AI to recommend products from its catalog. The best option for this use case is a Flex prompt template.

A Flex prompt template is designed to provide flexible, customizable AI-driven recommendations or responses based on specific data points, such as product information, customer needs, or sales history. This template type allows the AI to consider various inputs and parameters, making it ideal for generating product recommendations dynamically.

In contrast:

A Record summary prompt template (Option A) is used to summarize data related to a specific record, such as generating a quick summary of a sales opportunity or account, but not for recommending products.

An Email generation prompt template (Option C) is tailored for crafting email content and is not suitable for suggesting products based on a catalog.

Given the need for dynamic recommendations that pull from a product catalog and potentially other sales data, the Flex prompt template is the correct approach.

Salesforce Reference:

Salesforce Prompt Templates Overview: <https://help.salesforce.com/s/articleView?id=000391407&type=1> Flex Prompt Template

Usage: https://developer.salesforce.com/docs/atlas.en-us.salesforce_ai.meta/salesforce_ai/prompt_flex_template

질문 # 47

An AI Specialist needs to create a prompt template to fill a custom field named Latest Opportunities Summary on the Account object with information from the three most recently opened opportunities.

How should the AI Specialist gather the necessary data for the prompt template?

- **A. Create a flow to retrieve the opportunity information.**
- B. Select the Account Opportunity object as a resource when creating the prompt template.
- C. Select the latest Opportunities related list as a merge field.

정답: A

설명:

To gather the necessary data for populating the Latest Opportunities Summary custom field on the Account object with information from the three most recently opened opportunities, the AI Specialist should create a flow. A flow can be configured to query and retrieve the required opportunity records based on criteria such as their open date. Once the flow has gathered the necessary data, it can be used in a prompt template or other automation processes to populate the custom field on the Account record.

Option A is correct because creating a flow allows for dynamic data retrieval and control over the logic for selecting the most recent

opportunities.

Option B and Option C do not provide sufficient control or data retrieval capabilities needed for this scenario.

Reference:

Salesforce Flow Documentation: <https://help.salesforce.com/s/articleView?id=sf.flow.htm>

질문 # 48

A data scientist needs to view and manage models in Einstein Studio. The data scientist also needs to create prompt templates in Prompt Builder.

Which permission sets should an AI Specialist assign to the data scientist?

- A. Prompt Template Manager and Prompt Template User
- B. Prompt Template User and Data Cloud Admin
- C. Data Cloud Admin and Prompt Template Manager

정답: C

설명:

To allow a data scientist to view and manage models in Einstein Studio and create prompt templates in Prompt Builder, the AI Specialist should assign the Data Cloud Admin and Prompt Template Manager permission sets.

* Data Cloud Admin provides access to manage and oversee models within Einstein Studio.

* Prompt Template Manager gives the user the ability to create and manage prompt templates within Prompt Builder.

* Option A is correct because it assigns the necessary permissions for both managing models and creating prompt templates.

* Option B and Option C are incorrect as they do not provide the correct combination of permissions for managing models and building prompts.
