

# 156-536 Exam Fee, 156-536 Valid Exam Bootcamp

DOWNLOAD the newest Pass4cram 156-536 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1UUcI-EQm\\_sjjcy4qdOhfp7tSZ3wMwO3E](https://drive.google.com/open?id=1UUcI-EQm_sjjcy4qdOhfp7tSZ3wMwO3E)

Pass4cram guarantee the best valid and high quality 156-536 study guide which you won't find any better one available. 156-536 training pdf will be the right study reference if you want to be 100% sure pass and get satisfying results. From our 156-536 free demo which allows you free download, you can see the validity of the questions and format of the 156-536 actual test. In addition, the price of the 156-536 dumps pdf is reasonable and affordable for all of you.

## CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.</li> </ul>

## Pass Guaranteed 2026 156-536: Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) –Trustable Exam Fee

If you are very busy, you can only take two or three hours a day to study our 156-536 study engine. Then I tell you this is enough! After ten days you can go to the exam. With such an efficient product, you really can't find the second one! In any case, many people have passed the exam after using 156-536 Training Materials. This is a fact that you must see. As long as you are still a sensible person, you will definitely choose 156-536 practice quiz. Don't hesitate! Time does not wait!

## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q20-Q25):

### NEW QUESTION # 20

One of the Data Security Software Capability protections included in the Harmony Endpoint solution is

- A. Remote Access VPN
- B. Memory Encryption
- C. Dynamic Data Protection
- D. Data Leak Firewall

**Answer: A**

### NEW QUESTION # 21

What is the default encryption algorithm in the Full Disk Encryption tab under Advanced Settings?

- A. AES-CBC 128 bit
- B. XTS-AES 256 bit
- C. XTS-AES 128 bit
- D. AES-CBC 256 bit

**Answer: B**

Explanation:

The default encryption algorithm for Full Disk Encryption (FDE) in Check Point Harmony Endpoint, as configured in the Advanced Settings tab, is XTS-AES 256 bit. This is explicitly stated in the CP\_R81.

20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 221, under the "Custom Disk Encryption Settings" section: "The default encryption algorithm is XTS-AES 256 bit."

This extract confirms that Option C is correct. The document further notes that administrators can choose between XTS-AES 256 bit and XTS-AES 128 bit, but 256 bit is the default, reflecting a preference for stronger encryption. XTS (XEX-based tweaked-codebook mode with ciphertext stealing) is specifically designed for disk encryption, providing better security than CBC (Cipher Block Chaining) modes.

\* Option A ("AES-CBC 128 bit") and Option B ("AES-CBC 256 bit") are incorrect because FDE uses XTS mode, not CBC, which

is less suited for disk encryption due to its vulnerabilities in this context.

\* Option D ("XTS-AES 128 bit") is a configurable option but not the default, as the guide specifies 256 bit as the standard setting.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 221: "Custom Disk Encryption Settings" (confirms XTS-AES 256 bit as the default algorithm).

## NEW QUESTION # 22

Does the Endpoint Client GUI provide automatic or manual prompting to protect removable storage media usage?

- A. Manual Only
- B. Either automatic or manual
- C. Automatic Only
- D. Neither automatic nor manual

**Answer: B**

Explanation:

The Endpoint Client GUI in Check Point Harmony Endpoint provides either automatic or manual prompting to protect removable storage media usage, depending on how the administrator configures the system. This functionality is part of the Media Encryption & Port Protection component, which allows flexible control over removable media such as USB drives. According to the CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 282, under the section "Working with Actions in a Media Encryption & Port Protection Rule," the documentation states:

"You can configure rules to automatically encrypt media or prompt users to encrypt or access media in a protected manner." This extract confirms that administrators can set policies to either automatically apply encryption (automatic prompting) or require user interaction (manual prompting) when removable media is detected. For example, an automatic rule might encrypt a USB drive without user intervention, while a manual rule might display a prompt in the Endpoint Client GUI asking the user to confirm encryption or access permissions. This dual capability makes Option B ("Either automatic or manual") the correct answer.

\* Option A ("Manual Only") is incorrect because the system supports automatic prompting, not just manual.

\* Option C ("Automatic Only") is incorrect because manual prompting is also an available option.

\* Option D ("Neither automatic nor manual") is false, as the documentation clearly describes both methods.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 282: "Working with Actions in a Media Encryption & Port Protection Rule" (describes the ability to configure automatic encryption or user prompts for removable media).

## NEW QUESTION # 23

How many security levels can you set when enabling Remote help on pre-boot?

- A. Four levels - Low security, Medium security, High security, Very High security
- B. Three levels - Low security, Medium security, High security
- C. One and only level - enable or disable security
- D. Two levels - Low and High security

**Answer: B**

## NEW QUESTION # 24

Which Endpoint capability ensures that protected computers comply with your organization's requirements and allows you to assign different security levels according to the compliance state of the endpoint computer?

- A. Capsule Cloud Compliance
- B. Full Disk Encryption
- C. Forensics and Anti-Ransomware
- D. Compliance Check

**Answer: D**

Explanation:

The Harmony Endpoint solution includes a capability called Compliance that ensures endpoint computers meet organizational security standards and allows administrators to assign varying security levels based on their compliance status. This is detailed in

theCP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 20, under "Endpoint Security Client":

"Compliance: Allows you to enforce endpoint compliance on multiple checks before users log into the network. You can check that the appropriate endpoint security components are installed, correct OS service pack are installed on the endpoint, only approved applications are able to run on the endpoint, appropriate anti- malware product and version is running on the endpoint." Further clarification is provided on page 377, under "Compliance":

"The Compliance blade ensures that protected computers comply with your organization's requirements. You can assign different security levels according to the compliance state of the endpoint computer." These extracts confirm that Compliance Check (Option A) is the capability that verifies compliance and adjusts security levels accordingly, directly matching the question's requirements.

The other options do not fit:

\* Option B ("Capsule Cloud Compliance"): "Capsule Cloud" is not referenced in the guide; it may be a misnomer or unrelated to this context.

\* Option C ("Forensics and Anti-Ransomware"): This focuses on threat analysis and ransomware prevention (page 329), not compliance enforcement.

\* Option D ("Full Disk Encryption"): This protects data via encryption (page 217) but does not manage compliance states or security levels.

Thus, Compliance Check is the correct answer.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 20: "Endpoint Security Client" (describes Compliance capability).

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 377: "Compliance" (details compliance enforcement and security levels).

## NEW QUESTION # 25

.....

Though our 156-536 study guide has three formats which can meet your different needs, PDF version, software version and online version, I love the PDF version the best. If you choose the PDF version, you can download our 156-536 exam material and print it for studying everywhere. And you can take notes on them as long as any new thoughts come to you. If a new version of the 156-536 learning guide comes out, we will send you a new link to your E-mail box and you can download it again.
