

Professional 2V0-13.25–100% Free Actual Exam | Latest Braindumps 2V0-13.25 Book

What's more, part of that ExamBoosts 2V0-13.25 dumps now are free: https://drive.google.com/open?id=10kv30xvmSDXmZuQ13glsbr0ioxA_mZ2l

The VMware 2V0-13.25 exam practice questions are being offered in three different formats. These formats are VMware 2V0-13.25 web-based practice test software, desktop practice test software, and PDF dumps files. All these three VMware 2V0-13.25 exam questions format are important and play a crucial role in your VMware Cloud Foundation 9.0 Architect (2V0-13.25) exam preparation. With the VMware 2V0-13.25 exam questions you will get updated and error-free VMware Cloud Foundation 9.0 Architect (2V0-13.25) exam questions all the time. In this way, you cannot miss a single 2V0-13.25 exam question without an answer.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.

Topic 2	<ul style="list-style-type: none"> • Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 3	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 4	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.
Topic 5	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.

Get 100% Real Exam 2V0-13.25 Questions, Accurate & Verified Answers As Seen in the 2V0-13.25 Exam!

ExamBoosts offers 100% secure online purchase at all the time. We offer payments through Paypal-one of the most trusted payment providers which can ensure the safety shopping for 2V0-13.25 study torrent. Besides, before you choose our material, you can try our 2V0-13.25 free demo questions to check if it is valuable for you to buy our 2V0-13.25 practice dumps. You will get the latest and updated study dumps within one year after your purchase. So, do not worry the update and change in the actual test, you will be confident in the real test with the help of our 2V0-13.25 training torrent.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q21-Q26):

NEW QUESTION # 21

What are the benefits of using VMware vSphere with Broadcom hardware in a data center?

- A. Enhanced security
- B. Reduced hardware dependency
- C. Improved scalability
- D. Better load balancing

Answer: A,B,C,D

Explanation:

vSphere with Broadcom hardware enhances scalability, reduces hardware dependency, improves load balancing, and offers better security.

NEW QUESTION # 22

Which VMware features rely on Broadcom hardware to ensure high availability and disaster recovery?

- A. VMware Site Recovery Manager (SRM)
- B. VMware HA (High Availability)
- C. VMware vSphere Distributed Switch
- D. VMware Fault Tolerance

Answer: A,B,C,D

Explanation:

VMware HA, Fault Tolerance, Site Recovery Manager, and vSphere Distributed Switch all ensure high availability and disaster recovery.

NEW QUESTION # 23

What are the key Broadcom solutions for implementing disaster recovery in VMware environments?

- A. vSphere HA
- B. Broadcom RAID Controller
- C. vSAN
- D. Broadcom 25GbE Ethernet Adapter

Answer: A,B,C

Explanation:

vSphere HA, Broadcom RAID Controllers, and vSAN are key for implementing disaster recovery in VMware environments.

NEW QUESTION # 24

Which features of VMware NSX contribute to network security in VMware Cloud Foundation?

- A. Micro-segmentation
- B. Load balancing
- C. VPN integration
- D. Distributed firewall

Answer: A,D

Explanation:

VMware NSX provides micro-segmentation and a distributed firewall, which are critical for securing the network in VMware Cloud Foundation.

NEW QUESTION # 25

An architect is designing for a VMware Cloud Foundation (VCF) Instance. The following requirements and constraints were documented:

* The management domain cluster utilizes vSAN stretched as the principal storage.

* Company policy states that compute and storage capacity utilization must not exceed 90% at all times.

Which three statements should the architect consider when designing the solution to satisfy the requirements?

(Choose three.)

- A. Size and monitor the cluster for a maximum storage utilization of 90%.
- B. Size and monitor the cluster for a maximum compute peak utilization of < 45%.
- C. Use a homogenous cluster configuration.
- D. Use a heterogeneous cluster configuration.
- E. Size and monitor the cluster for a maximum compute peak utilization of < 90%.
- F. Size and monitor the cluster for a maximum storage utilization of 40%.

Answer: B,C,F
