Oracle Cloud EPM Data Integration 2024 Implementation Professional Sample Questions (Q250-Q255):

NEW QUESTION # 250

What is a key benefit of direct integrations in Oracle Cloud EPM?

- A. It requires no authentication for data access
- B. It allows user-generated reports to be uploaded
- C. It eliminates the need for file-based data exchanges
- D. It supports historical data integration

Answer: C

Explanation:

Direct integrations allow data to flow directly from the source system into Oracle Cloud EPM, eliminating the need for file-based data exchanges and reducing processing time.

NEW QUESTION # 251

Which of the following steps should be taken if a data integration process is stuck in "In Progress" status for an extended time?

- A. Review the integration logs for potential issues
- B. Modify the data source connection settings
- C. Cancel the process and restart the data integration

- D. Increase user access permissions

Answer: A

Explanation:

If a data integration process is stuck in the "In Progress" status, reviewing the logs in the Workbench can help identify any issues that are preventing the process from completing.

NEW QUESTION # 252

When defining a new source application for data integration, which of the following must be specified?

- A. Data mappings
- B. Data visualization options
- C. Application category and connection details
- D. Database schema

Answer: C

Explanation:

When defining a new source application, the application category and connection details must be specified to enable data integration.

NEW QUESTION # 253

When configuring the EPM Integration Agent, which action must be taken to ensure it can access on- premise data?

- A. Assign a dedicated cloud administrator
- B. Set up a secure connection between the cloud and the on-premise data source
- C. Configure API calls to access cloud services
- D. Create a custom dashboard for on-premise systems

Answer: B

Explanation:

A secure connection, typically via VPN or other secure network protocols, must be established between Oracle Cloud and the on-premise data source.

NEW QUESTION # 254

Which of the following is a key feature of application-specific period mappings?

- A. It customizes period mappings for each individual application
- B. It automatically applies global period mappings to all applications
- C. It schedules data loads for each reporting cycle
- D. It restricts access to certain periods based on user roles

Answer: A

Explanation:

Application-specific period mappings allow customization of period mappings for each application, ensuring the correct alignment of periods based on the internal calendar of each application.
