C_ABAPD_2507 Clear Exam & Exam C_ABAPD_2507 Tutorial

Our company concentrates on relieving your pressure of preparing the C_ABAPD_2507 exam. Getting the certificate equals to embrace a promising future and good career development. Perhaps you have heard about our C_ABAPD_2507 exam question from your friends or news. Why not has a brave attempt? You will certainly benefit from your wise choice. Now our C_ABAPD_2507 practice materials have won customers' strong support. Our sales volume is increasing every year. The great achievements benefit from our enormous input. First of all, we have done good job on researching the new version of the C_ABAPD_2507 exam question.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q59-Q64):

NEW QUESTION # 59

You have attached a system field to an input parameter of a CDS view entity as follows:

```
define view entity Z_ENTITY
```

```
with parameters
```

```
@Environment.systemField: #SYSTEM_LANGUAGE
```

```
language : spras
```

What are the effects of this annotation? (Select 2 correct answers)

- A. You can still override the default value with a value of your own.
- B. The value of sy-langu will be passed to the CDS view automatically when you use the CDS view in ABAP but not when you use it in another view entity.
- C. The value of sy-langu will be passed to the CDS view automatically both when you use the CDS view in ABAP and in

another CDS view entity (view on view).

- D. It is no longer possible to pass your own value to the parameter.

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation from Exact Extract:

* With @Environment.systemField: #SYSTEM_LANGUAGE, the system field sy-langu is automatically supplied as a default value for the parameter.

* This works both in ABAP and in view-on-view scenarios (A).

* Developers can still override this value when calling the view explicitly (B).

* Options C and D are incorrect: system fields are not limited to ABAP only, and overriding is allowed.

Study Guide Reference: ABAP CDS Guide - System Fields in View Parameters.

NEW QUESTION # 60

Which of the following ABAP SQL statements are valid? Note: There are 2 correct answers to this question.

- A. SELECT FROM /dmo/connection FIELDS r-i carrid, airpfrom u GROUP BY carrid, connid INTO TABLE @DATA(It_hits).
- B. SELECT FROM /dmo/connection FIELDS V O carrid, airpfrom, MAX(distance) AS dist_max, MIN(distance) AS dist_min INTO TABLE @DATA(It_hits)
- C. SELECT FROM /dmo/connection FIELDS carrid O airpfrom, MAX(distance) AS dist_max, MIN(distance) AS dist_min GROUP BY carrid, airpfrom INTO TABLE @DATA(It_hits)
- D. SELECT FROM /dmo/connection FIELDS V D MAX(distance) AS dist_max MIN(distance) AS dist_min INTO TABLE @DATA(It_hits).

Answer: B,C

Explanation:

The following are the explanations for each ABAP SQL statement:

A: This statement is valid. It selects the fields carrid, airpfrom, and the aggregate functions MAX(distance) and MIN(distance) from the table /dmo/connection, and groups the results by carrid and airpfrom. The aggregate functions are aliased as dist_max and dist_min. The results are stored in an internal table named It_hits, which is created using the inline declaration operator @DATA.

B: This statement is valid. It is similar to statement A, except that it does not specify the GROUP BY clause. This means that the aggregate functions are applied to the entire table, and the results are stored in an internal table named It_hits, which is created using the inline declaration operator @DATA.

C: This statement is invalid. It selects the aggregate functions MAX(distance) and MIN(distance) from the table /dmo/connection, but it does not specify any grouping or non-aggregate fields. This is not allowed in ABAP SQL, as the SELECT list must contain at least one non-aggregate field or a GROUP BY clause. The statement will cause a syntax error.

D: This statement is invalid. It selects the fields carrid and airpfrom from the table /dmo/connection, and groups the results by carrid and connid. However, the field connid is not included in the SELECT list, which is not allowed in ABAP SQL, as the GROUP BY clause must contain only fields that are also in the SELECT list. The statement will cause a syntax error.

NEW QUESTION # 61

Which of the following are valid sort operations for internal tables? Note: There are 3 correct answers to this question.

- A. SORT itab.
Sort a sorted table using
- B. SORT itab BY field1 field2.
Sort a standard table using
- C. SORT itab BY field1 ASCENDING field2 DESCENDING.
Sort a standard table using
- D. Sort a standard table using
SORT itab ASCENDING.
Sort a sorted table using
- E. SORT itab DESCENDING.

Answer: A,B,D

NEW QUESTION # 62

When you create an exception class, what does SAP recommend you do? Note: There are 3 correct answers to this question.

- A. Inherit from `cx_static_check`, if you want a warning at design time that the exception will not be caught.
- B. Define corresponding public attributes, if you want to pass context-specific values to placeholders of a message.
- C. Inherit from `cx_no_check`, if you want to reuse messages from a system exception class.
- D. Inherit from `cx_static_check`, if you want a warning at design time that the exception can never be raised.
- E. Implement interface `if_t100_message`, if you want to reuse messages from a message class.

Answer: A,B,E

NEW QUESTION # 63

Which of the following actions cause an indirect change to a database table requiring a table conversion? Note: There are 2 correct answers to this question.

- A. Renaming a field in a structure that is included in the table definition.
- B. Deleting a field from a structure that is included in the table definition.
- C. Shortening the length of a domain used in a data element that is used in the table definition.
- D. Changing the field labels of a data element that is used in the table definition.

Answer: B,C

NEW QUESTION # 64

.....

We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your SAP C_ABAPD_2507 certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our SAP C_ABAPD_2507 Exam questions than the other vendors.
