## Skills measured on the Exam MB-330

As mentioned above, each candidate must demonstrate their ability to implement product information management, inventory management, supply chain processes, warehouse and transportation management, and master planning. Thus, according to the MB-330 exam skills outline, which can be found on the official exam page, the test includes questions from five main areas:

- **Implementing and management of Supply Chain processes.** In other words, candidates have to show their competence in Procurement and sourcing alongside common sales and marketing features.
- **Implementing Inventory management.** This means demonstrating skills in the management of inventory activities, and Inventory management configuration.
- **Implementing master planning.** Finally, candidates show their skills in master planning and forecasting configuration together with master plans and manage planned orders running.
- **Implementing warehouse management and transportation management.** According to this exam domain to take the test you should configure warehouse management, perform warehouse management processes, as well as implement transportation management on the associate level.
- **Implementing management for product information.** So, you should be able to create, configure and manage products for the supply chain management. Moreover, each candidate has to demonstrate an ability to manage inventory pricing and costing.
