

2V0-15.25 Test Questions Pdf & Latest 2V0-15.25 Dumps Files

CALIFORNIA STANDARDS TEST GRADE

Released Test Questions **Math** **5**

1 What is 6050.287 rounded to the nearest ten?
A 6050
B 6100
C 6050.29
D 6050.3
CSDE0124

2 The total land area for the United States is 3,537,438 square miles. What is this value rounded to the nearest thousand square miles?
A 3,500,000
B 3,537,000
C 3,538,000
D 3,540,000
CSDE0111

3 What is 40% of 250?
A 50
B 100
C 150
D 200
CSDE0127

4 What is $\frac{3}{8}$ written as a percent?
A 26.7%
B 30%
C 37.5%
D 50%
CSDE0112

5 What is the decimal 0.7 written as a fraction?
A $\frac{1}{7}$
B $\frac{3}{4}$
C $\frac{3}{7}$
D $\frac{7}{10}$
CSDE0107

6 A company donated 200 books to a local library. If 70 of them are fiction, what percent of the donated books are fiction?
A 35%
B 40%
C 60%
D 65%
CSDE0104

7 In a parking lot, 1 out of every 8 cars is blue. What percent of the cars in this lot are blue?
A 1.25%
B 7%
C 9%
D 12.5%
CSDE0103

- 7 -

We have three different versions of VMware Cloud Foundation 9.0 Support prep torrent for you to choose, including PDF version, PC version and APP online version. Different versions have their own advantages and user population, and we would like to introduce features of these versions for you. There is no doubt that PDF of 2V0-15.25 exam torrent is the most prevalent version among youngsters, mainly due to its convenience for a demo, through which you can have a general understanding and simulation about our 2V0-15.25 Test Braindumps to decide whether you are willing to purchase or not, and also convenience for paper printing for you to do some note-taking.

Nowadays, seldom do the exam banks have such an integrated system to provide you a simulation test. You will gradually be aware of the great importance of stimulating the actual exam after learning about our 2V0-15.25 study tool. Because of this function, you can easily grasp how the 2V0-15.25 practice system operates and be able to get hold of the core knowledge about the 2V0-15.25 Exam. In addition, when you are in the real exam environment, you can learn to control your speed and quality in answering questions and form a good habit of doing exercise, so that you're going to be fine in the 2V0-15.25 exam.

Latest 2V0-15.25 Dumps Files - Dumps 2V0-15.25 Questions

We all know that the 2V0-15.25 exam is not easy to pass and the certification is not easy to get. But where is a will, there is a way. if you are really determined, go buy 2V0-15.25 study materials now. With the help of 2V0-15.25 learning guide, your road will go

more smoothly. If you want to know more about our products, maybe you can use the trial version of 2V0-15.25 simulating exam first. Of course, you can also spend a few minutes looking at the feedbacks to see how popular our 2V0-15.25 exam questions are.

VMware Cloud Foundation 9.0 Support Sample Questions (Q12-Q17):

NEW QUESTION # 12

An administrator creates a tag for a virtual machine (VM) in VMware Cloud Foundation (VCF) Operations. When assigning the tag to the virtual machine in vCenter, the tag was not found. What is the cause of this error?

- A. The tag was not pushed to the vCenter instance.
- B. The tag was not pushed to Custom Groups.
- C. The vCenter version is incorrect.
- D. VM Tools is not installed.

Answer: A

Explanation:

In VMware Cloud Foundation 9.0 Operations, tags created inside VCF Operations do not automatically appear in vCenter. Tags must be explicitly synchronized ("pushed") to the selected vCenter instance before they become usable for VM tagging within vCenter. This is because VCF Operations maintains its own metadata store for tags, super metrics, groups, and policies.

The correct workflow is:

- * Create the tag in VCF Operations.
- * Push (synchronize) the tag to the appropriate vCenter instance.
- * The tag then appears in vCenter's Tags & Custom Attributes section.
- * Administrators can then assign the tag to VMs.

If the push step is skipped, the tag exists only inside VCF Operations and cannot be referenced by vCenter, which is exactly the symptom described: tag not found when attempting to assign it to a VM.

Option A is incorrect because Custom Groups do not affect vCenter tag visibility.

Option B is incorrect because tag synchronization is not tied to a specific vCenter version as long as the vCenter is officially supported by VCF 9.x.

Option D is irrelevant-VMware Tools has nothing to do with tag visibility.

NEW QUESTION # 13

An administrator recently deployed a new three-node VMware vSAN Express Storage Architecture (ESA) cluster to an existing workload domain. After creating a number of Virtual Machines (VMs), the administrator discovers that storage is being consumed a lot quicker than expected.

While investigating the issue, the administrator discovers that the datastore default policy has been set to RAID-1 by Auto-Policy Management rather than the expected RAID-5.

What is a possible cause?

- A. The RAID-5 policy is only supported on a vSAN ESA storage cluster.
- B. The vSAN ESA cluster has Host Rebuild Reserved enabled.
- C. The vSAN ESA cluster must have a minimum of four hosts.
- D. The vSAN storage policy has Force Provisioning enabled.

Answer: C

Explanation:

In vSAN Express Storage Architecture (ESA), Auto-Policy Management determines which default storage policies can be used based on the number of hosts in the cluster. RAID-5 and RAID-6 policies require a minimum number of hosts to satisfy fault domain and component placement rules.

For vSAN ESA, the minimum hosts required are:

- * RAID-1 (FTT=1) # minimum 3 hosts
- * RAID-5 (FTT=1) # minimum 4 hosts
- * RAID-6 (FTT=2) # minimum 6 hosts

In this scenario, the administrator deployed a three-host ESA cluster. Since RAID-5 requires at least four ESA-capable hosts, vSAN Auto-Policy Management automatically falls back to RAID-1, the highest level of resilience possible with the available cluster size.

This results in significantly higher storage consumption, which matches exactly what the administrator observed.

Option A is incorrect because RAID-5 is fully supported on ESA-but only with enough hosts.

Option C (Force Provisioning) does not change the default policy selected.
Option D (Host Rebuild Reserve) does not control RAID policy selection.

NEW QUESTION # 14

In VMware Cloud Foundation (VCF) Automation an administrator is troubleshooting an issue with a newly created Organization. When the Organization administrator attempts to create a Namespace, they receive an error "Failed to list VPC after selecting a region.

The administrator logs into the NSX Manager for the Region and does not see an NSX Project for the Organization. What could cause these symptoms?

- A. The Provider Administrator hasn't granted the Organization Administrator role to the First User.
- **B. The Provider Administrator hasn't set up the Organization's Networking Configuration for the selected Region.**
- C. The Organization Administrator hasn't created a Project in the selected Region.
- D. The Organization Administrator hasn't created a VPC in the selected Region.

Answer: B

Explanation:

In VMware Cloud Foundation 9.0 Automation, every Organization requires a properly configured Networking Configuration for each Region in which it operates. This configuration step—performed by the Provider Administrator—creates the NSX Project corresponding to the Organization, enabling Namespace creation, VPC visibility, and workload provisioning.

The error "Failed to list VPC after selecting a region" combined with the absence of an NSX Project in NSX Manager is a direct indicator that the Organization's Networking Configuration was never initialized. VCF Automation automatically creates the NSX Project only when the Provider Admin completes this step.

Option B is invalid because the Organization Administrator cannot create NSX Projects manually; they are system-generated during networking setup.

Option C is incorrect because role assignment affects administrative permissions, not NSX project creation.

Option D is also incorrect—the Organization Admin cannot create a VPC until the NSX Project exists.

NEW QUESTION # 15

An administrator has successfully mounted an NFS datastore as supplemental storage for a VMware Cloud Foundation (VCF) workload domain cluster. However, users report that data cannot be written to the datastore.

The administrator confirms the following:

- * The NFS share is visible in the vSphere Client.
- * Connectivity to the NFS server from the Virtual Machine.

What action should the administrator take next to troubleshoot the issue?

- A. Verify the NFS server is listed in the VMware Hardware Compatibility Guide.
- **B. Verify that the NFS server permissions are not set to read-only for the ESX host.**
- C. Verify the MTU size configuration on the NFS VMkernel port group.
- D. Reboot the ESX host to clear any file locks.

Answer: B

Explanation:

In VMware Cloud Foundation 9.0, supplemental storage such as NFS is fully supported for workload domains when configured correctly. When an NFS datastore mounts successfully in vSphere but users cannot write data, the issue almost always lies in the export permissions on the NFS server. vSphere will allow mounting a read-only NFS export, but write operations will fail silently at the VM or guest OS level.

VCF documentation confirms that ESXi requires explicit read/write export permissions, typically configured per-host or by IP subnet, on the NFS server. Even if network connectivity and VM-level access appear healthy, incorrect server-side permissions prevent ESXi from executing write operations.

Option A is incorrect because NFS servers are not validated by the HCL for write capability.

Option B (rebooting the host) is unnecessary and unrelated to permission enforcement.

Option D (MTU mismatch) may cause performance issues, not write-access failures.

Thus, the next troubleshooting step is to verify that the ESXi hosts have read/write access on the NFS share, making C the correct answer.

NEW QUESTION # 16

An administrator logs into the vSphere client to check the health of a cluster. An alert appears on the cluster stating, "vSphere HA host status".

The administrator toggles vSphere HA off and on and the following error appears on the host "A general system error occurred: Failed to start fdm service on host".

What is the cause of this issue?

- A. The vmware-fdm service is disabled on the ESX host.
- B. vSphere HA startup policy is not configured correctly.
- C. vSphere HA Admission Control settings are not configured correctly.
- **D. The vmware-fdm vib is missing from the ESX host.**

Answer: D

Explanation:

vSphere High Availability (HA) depends on the FDM agent (Fault Domain Manager) that runs on every ESXi host in the cluster. When an administrator enables HA on a cluster, vCenter automatically installs or updates the vmware-fdm VIB on each participating ESXi host. This VIB contains the HA agent binaries and is mandatory for HA services to start.

The error encountered:

"A general system error occurred: Failed to start fdm service on host"

is a classic and well-documented symptom of a missing or corrupted vmware-fdm VIB. When vSphere HA is toggled off and on, vCenter attempts to reinstall or restart the FDM agent; if the VIB is not present, HA cannot deploy successfully, and the FDM service fails to start.

Why the other answers are incorrect:

- * A. The vmware-fdm service is disabled ESXi does not allow manual disabling of this system service in normal operations. If the service fails to start, the root cause is usually the absence or corruption of the VIB-not a disabled service.
- * C. Admission Control settings not configured correctly Admission Control errors affect VM failover capacity, not the ability to start FDM services.
- * D. HA startup policy not configured correctly There is no per-host HA startup policy that prevents FDM from starting.

NEW QUESTION # 17

.....

TrainingQuiz have a huge senior IT expert team. They use their professional IT knowledge and rich experience to develop a wide range of different training plans which can help you pass VMware certification 2V0-15.25 exam successfully. In TrainingQuiz you can always find out the most suitable training way for you to pass the exam easily. No matter you choose which kind of the training method, TrainingQuiz will provide you a free one-year update service. TrainingQuiz's information resources are very wide and also very accurate. When selecting TrainingQuiz, passing VMware Certification 2V0-15.25 Exam is much more simple for you.

Latest 2V0-15.25 Dumps Files: <https://www.trainingquiz.com/2V0-15.25-practice-quiz.html>

All of the traits above are available in this web-based 2V0-15.25 practice test of TrainingQuiz, VMware 2V0-15.25 Test Questions Pdf You can see our reviews and testimonials to make sure how genuine is our company, If you do, then trying the 2V0-15.25 exam torrent of us, we will make it easier for you to pass it successfully, VMware 2V0-15.25 Test Questions Pdf The trick to the success is simply to be organized, efficient, and to stay positive about it.

Market leaders in every industry are quietly incorporating as 2V0-15.25 much digital technology into their products, processes, and services as possible, access: Testing File Permissions.

All of the traits above are available in this web-based 2V0-15.25 Practice Test of TrainingQuiz, You can see our reviews and testimonials to make sure how genuine is our company.

High Pass Rate 2V0-15.25 Exam Guide - 2V0-15.25 Latest Practice Dumps

If you do, then trying the 2V0-15.25 exam torrent of us, we will make it easier for you to pass it successfully, The trick to the success is simply to be organized, efficient, and to stay positive about it.

Can I extend it?
