

Easiest and Quick Way to Crack International Code Council Fire-Inspector-II Exam

P.S. Free 2026 International Code Council Fire-Inspector-II dumps are available on Google Drive shared by ActualCollection:
<https://drive.google.com/open?id=1ty3HXKYBrJ5Qcn1YZDuo3dwLDAAv1IXF>

If you really intend to pass the Fire-Inspector-II exam, our software will provide you the fast and convenient learning and you will get the best study materials and get a very good preparation for the exam. The content of the Fire-Inspector-II guide torrent is easy to be mastered and has simplified the important information. What's more, our Fire-Inspector-II prep torrent conveys more important information with less questions and answers. The learning is relaxed and highly efficiently.

The contents of Fire-Inspector-II exam torrent was all compiled by experts through the refined off textbooks. Hundreds of experts simplified the contents of the textbooks, making the lengthy and complex contents easier and more understandable. With Fire-Inspector-II study tool, you only need 20-30 hours of study before the exam. Fire-Inspector-II Guide Torrent provides you with a brand-new learning method. In the course of doing questions, you can memorize knowledge points. You no longer need to look at the complicated expressions in the textbook.

Here's an Instant Way to Crack International Code Council Fire-Inspector-II Exam

You can trust top-notch 67 - Fire Inspector II Exam (Fire-Inspector-II) exam questions and start preparation with complete peace of mind and satisfaction. The Fire-Inspector-II exam questions are real, valid, and verified by International Code Council Fire-Inspector-II certification exam trainers. They work together and put all their efforts to ensure the top standard and relevancy of Fire-Inspector-II Exam Dumps all the time. So we can say that with International Code Council Fire-Inspector-II exam questions you will get everything that you need to make the Fire-Inspector-II exam preparation simple, smart, and successful.

International Code Council 67 - Fire Inspector II Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

Horizontal exits shall not comprise more than ____ of the required exits from any floor area in a Group I-2 occupancy.

- A. 3/4
- B. 2/3
- C. 1/2
- D. 1/3

Answer: C

Explanation:

For Group I-2 occupancies (such as hospitals, nursing homes, and similar healthcare facilities), horizontal exits are used to improve

fire safety by allowing occupants to move to a safer area without using stairs or elevators.

IFC 2021, Section 1026.1 (Horizontal Exits - General Requirements) states that:

Horizontal exits shall not comprise more than one-half (1/2) of the required exits from any floor area in a Group I-2 occupancy.

This ensures that at least 50% of the required exits remain traditional vertical or exterior exits, maintaining a balance between horizontal and traditional egress routes.

Correct answer: B. 1/2

NEW QUESTION # 57

The maximum combined quantity of Class II and III liquids which may be stored in a flammable liquids storage cabinet is ___ gallons.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Reference to Flammable Liquids Storage Cabinet Requirements:

According to The International Fire Code (IFC 2021), Section 5704.3.2 and NFPA 30 (Flammable and Combustible Liquids Code), Section 9.5.3, the maximum amount of Class II and Class III liquids that can be stored in a flammable liquids storage cabinet is 120 gallons.

This limit ensures safe containment, fire protection, and reduced risk of liquid ignition or spillage.

Understanding Class II and III Liquids:

Class II liquids: Flash point between 100°F and 140°F (e.g., diesel fuel, kerosene).

Class III liquids: Flash point above 140°F (e.g., motor oil, cooking oils).

While these liquids are less volatile than Class I liquids, they still pose a fire risk, requiring proper storage in approved cabinets.

Clarification of Incorrect Answer Choices:

A: 10 gallons # Incorrect

Too low; IFC and NFPA allow up to 120 gallons in storage cabinets.

B: 60 gallons # Incorrect

This is the maximum for Class I liquids, but Class II and III liquids are allowed up to 120 gallons.

D: 240 gallons # Incorrect

Exceeds the allowable limit per IFC 5704.3.2 and NFPA 30, which set the maximum at 120 gallons per cabinet.

Conclusion:

The correct and verified answer is C (120 gallons) as per IFC 5704.3.2 and NFPA 30, ensuring compliance with flammable liquids storage safety standards.

NEW QUESTION # 58

Given: In organic coating processes where Class I liquids are exposed to the air, Class I, Division I electrical installations are required to be outside the immediate vicinity of pumps or equipment.

"Immediate vicinity" means in addition to a vertical distance a zone extending from the vapor liberation point ___ ft. horizontally in all directions.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

In organic coating processes where Class I liquids are exposed to air, fire codes require Class I, Division I electrical installations in hazardous locations to prevent ignition of flammable vapors.

The "immediate vicinity" around pumps or equipment where vapors may accumulate extends 10 feet horizontally from the vapor liberation point in all directions.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 1503.2.1 (Electrical Installations in Organic Coating Processes) IFC 1503.2.1 requires that electrical components must be rated for Class I, Division I within 10 feet of vapor sources.

This prevents ignition hazards in locations with flammable vapors.

2. NFPA 33 - Standard for Spray Application Using Flammable or Combustible Materials (2021 Edition) - Section 6.5.2 NFPA 33, Section 6.5.2 states that a 10-foot horizontal zone is considered hazardous and requires Class I, Division I electrical installation. Detailed Explanation of Answer Choices:

Option A (Incorrect): 5 feet is too short and does not provide sufficient protection from vapor migration.

Option B (Correct): 10 feet is the correct required distance per IFC 1503.2.1 and NFPA 33.

Option C (Incorrect): 20 feet is beyond the required hazardous zone.

Option D (Incorrect): 50 feet is excessive and not required by code.

Thus, the correct and verified answer is: B. 10.

NEW QUESTION # 59

What is the maximum number of students permitted in a classroom that measures 20 ft. x 30 ft., and which contains four fixed 4 ft. x 8 ft. tables?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

To determine the maximum number of students permitted in a classroom, we must follow the occupant load calculation based on the 2021 International Building Code (IBC) and International Fire Code (IFC).

Step 1: Calculate the Room Area

The classroom measures 20 ft. x 30 ft., so the total area is:

$$20 \times 30 = 600 \text{ sq. ft. } 20 \times 30 = 600 \text{ sq. ft.}$$

Step 2: Subtract the Area Occupied by Fixed Tables

Each table measures 4 ft. x 8 ft., so its area is:

$$4 \times 8 = 32 \text{ sq. ft. per table } 4 \times 8 = 32 \text{ sq. ft. per table}$$

$$32 \times 4 = 128 \text{ sq. ft. occupied by tables } 32 \times 4 = 128 \text{ sq. ft. occupied by tables}$$

$$32 \times 4 = 128 \text{ sq. ft. occupied by tables}$$

Step 3: Determine the Usable Space for Students

$$600 - 128 = 472 \text{ sq. ft. available } 600 - 128 = 472 \text{ sq. ft. available}$$

Step 4: Apply the Occupant Load Factor According to 2021 IBC Table 1004.5 (Occupant Load Factor), the factor for a classroom with tables and chairs is 20 sq. ft. per person.

$$472 \div 20 = 23.6 \quad 472 \div 20 = 23.6$$

Since the occupant load must be rounded down, the maximum number of students is 24.

Reference to Fire Inspector Documentation:

1. 2021 International Building Code (IBC) - Table 1004.5 (Occupant Load Factor) A classroom with tables and chairs requires 20 sq. ft. per occupant.

This method ensures compliance with egress and fire safety requirements.

2. 2021 International Fire Code (IFC) - Section 1004.1 (Occupant Load Determination) The IFC states that occupant load is based on net usable floor area and must follow IBC Table 1004.5.

Detailed Explanation of Answer Choices:

Option A (Incorrect): 12 students would be too low based on the calculations.

Option B (Correct): 24 students is the accurate calculation following IBC 1004.5.

Option C (Incorrect): 30 students would exceed the available space per code.

Option D (Incorrect): 40 students is far above the allowed maximum.

Thus, the correct and verified answer is: B. 24.

NEW QUESTION # 60

Horizontal exits shall not comprise more than ____ of the required exits from any floor area in a Group I-2 occupancy.

- A. 3/4
- B. 2/3
- **C. 1/2**
- D. 1/3

Answer: C

Explanation:

For Group I-2 occupancies (such as hospitals, nursing homes, and similar healthcare facilities), horizontal exits are used to improve fire safety by allowing occupants to move to a safer area without using stairs or elevators.

IFC 2021, Section 1026.1 (Horizontal Exits - General Requirements) states that:

Horizontal exits shall not comprise more than one-half (1/2) of the required exits from any floor area in a Group I-2 occupancy.

This ensures that at least 50% of the required exits remain traditional vertical or exterior exits, maintaining a balance between horizontal and traditional egress routes.

NEW QUESTION # 61

.....

The Fire-Inspector-II web-based practice exam requires no installation so you can start your preparation instantly right after you purchase. With thousands of satisfied customers around the globe, questions of the 67 - Fire Inspector II Exam (Fire-Inspector-II) exam dumps are real so you can pass the 67 - Fire Inspector II Exam (Fire-Inspector-II) certification on the very first attempt. Hence, it reduces your chances of failure and you can save money and time as well. International Code Council exam questions come in three formats i.e., web-based practice test, desktop practice test software, and PDF dumps.

Pass Fire-Inspector-II Guide: <https://www.actualcollection.com/Fire-Inspector-II-exam-questions.html>

The content of our Fire-Inspector-II practice engine is chosen so carefully that all the questions for the Fire-Inspector-II exam are contained, International Code Council Fire-Inspector-II Relevant Answers It's up to your decision now, International Code Council Fire-Inspector-II Relevant Answers Yes, RealVCE can help you, International Code Council Fire-Inspector-II Relevant Answers So we have advantages not only on the content but also on the displays, In order to solve customers' problem in the shortest time, our Pass Fire-Inspector-II Guide - 67 - Fire Inspector II Exam guide torrent provides the twenty four hours online service for all people.

All the tools you need to create graphics are Fire-Inspector-II located on the toolbox, A virtual reality tour takes you to the Great Western Sydney Reserve, The content of our Fire-Inspector-II practice engine is chosen so carefully that all the questions for the Fire-Inspector-II exam are contained.

2026 Pass-Sure Fire-Inspector-II: 67 - Fire Inspector II Exam Relevant Answers

It's up to your decision now, Yes, RealVCE can Fire-Inspector-II Passing Score help you, So we have advantages not only on the content but also on the displays, In order to solve customers' problem in the shortest time, Fire-Inspector-II Latest Exam Discount our 67 - Fire Inspector II Exam guide torrent provides the twenty four hours online service for all people.
