NEW QUESTION # 71

Lucy, a preschooler, learns through play. She likes to build puzzles and cook with her mother. According to the psychosocial stages of development, Lucy is in which stage?

- A. initiative vs. guilt
- B. trust vs. mistrust
- C. identity vs. role confusion

Answer: A

Explanation:

According to Erik Erikson's psychosocial stages of development, the initiative vs. guilt stage occurs during the preschool years (ages 3-6). During this stage, children assert themselves more frequently through directing play and other social interaction. Learning through play, exploration, and engaging in activities such as building puzzles or cooking fits this stage. Children develop initiative when encouraged and supported in their efforts; if not, they may develop guilt over their needs and desires.
