### Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q85-Q90):

#### NEW QUESTION # 85

Shift is one of the key elements in defining project and resource calendars.

Which two additional key elements are required to define the project and resource calendars? (Choose two.)

- A. Accounting Calendar
- B. Schedule Exceptions
- C. Workday Patterns
- D. Expenditure Type
- E. Time off

**Answer: B,C**

Explanation:

Shift is one of the key elements in defining project and resource calendars. Two additional key elements that are required to define the project and resource calendars are:

\* Schedule Exceptions: These are dates or periods that override the regular workday patterns and shifts of a calendar. They can be used to define holidays, vacations, or other special events that affect the availability of resources or projects.

\* Workday Patterns: These are patterns of working and nonworking days that repeat over a period of time. They can be used to define the standard working days and hours for a calendar. Time off, expenditure type, and accounting calendar are not key elements in defining project and resource calendars. Time off is an attribute of a resource assignment that reduces the availability of a resource.

Expenditure type is a classification of costs that determines how they are processed and accounted.

Accounting calendar is a calendar that defines the accounting periods and dates for transactions.

### NEW QUESTION # 87

A consulting services company is currently working on a business transformation project for your client, which spans multiple years. At the first period close, the consulting services company has recognized revenue and the accounting entry created is:

Dr Unbilled Receivables 40,000

Cr Revenue 40,000

At the end of the period, the client is sent an associated bill. What would be the corresponding invoice accounting entry? (Choose the best answer.)

- A. Dr Unearned Revenue 40,000Cr Accounts Receivables 40,000
- B. Dr Accounts Receivables 40,000Cr Revenue 40,000
- C. Dr Unearned Revenue 40,000Cr Revenue 40,000
- **D. Dr Accounts Receivables 40,000Cr Unbilled Receivables 40,000**

When the invoice is created, the unbilled receivables balance is reduced and the accounts receivables balance is increased by the invoice amount. ### NEW QUESTION # 88

Identify three correct statements about project types. (Choose three.)

- A. Classifications can be assigned at project type.
- **B. Summarization options can be specified at project type.**
- C. Project type can be enabled for both billing and capitalization.
- **D. Project type can be associated with multiple project units.**
- **E. Project type can be used as a source in subledger accounting.**

**Answer: B,D,E**

Explanation:

Project type is a classification that defines the common attributes and processing options for projects. Some of the correct statements about project type are:

\* Project type can be used as a source in subledger accounting. This allows you to create accounting rules based on the project type attribute.

\* Summarization options can be specified at project type. This allows you to control how the project transactions are summarized for reporting and performance purposes.

\* Project type can be associated with multiple project units. This allows you to share the same project type across different business units or organizations. Project type cannot be enabled for both billing and capitalization, as these are mutually exclusive options.

Classifications cannot be assigned at project type, but at project or task level. Reference:
