And if you study with our OmniStudio-Developer exam questions, you are bound to pass the OmniStudio-Developer exam.

## Salesforce Certified OmniStudio Developer Sample Questions (Q93-Q98):

### NEW QUESTION # 93

Which JSON from the DRGetAccountDetails action would display all six values correctly in the Omniscript structure shown?  
BlkContacts is a Repeat Block.

□

- A. Option B
- B. Option D
- C. **Option A**
- D. Option C

**Answer: C**

Explanation:

From the OmniStudio OmniScript Documentation:

\* A Repeat Block (like BlkContacts) expects an array of objects.

- \* Each item in the array must contain fields that exactly match the UI elements inside the block.
- \* The parent JSON must include any top-level values used by individual input fields (like AccountName, AccountPhone).

Why the Other Options Are Incorrect:

- \* B. Uses Contacts instead of BlkContacts, and is incomplete/malformed.
- \* C. Repeats keys at the same level instead of using an array structure. This causes the data to overwrite and fail to display properly.
- \* D. Uses incorrect keys like "Name" and "Phone" instead of expected "ContactName" and "ContactPhone", breaking field binding.

#### NEW QUESTION # 94

Refer to the exhibit below.

What is the reason that the fields fail to display the fetched data?

- A. The typeHead key is not in the correct format.
- B. Lookup Mode is selected in the properties of the Type Ahead Block.
- C. FirstName, LastName, and BirthDate are not placed inside the Type Ahead Block.
- **D. Use Data JSON is Not selected in the properties of the Type Ahead Block.**

#### Answer: D

Explanation:

Explanation

The Use Data JSON property must be selected in the properties of the Type Ahead Block in order to display the fetched data in the fields. The Lookup Mode property is used to specify the type of lookup to perform. The FirstName, LastName, and BirthDate fields can be placed inside or outside the Type Ahead Block. The typeHead key is in the correct format.

#### NEW QUESTION # 95

A company wants to allow agents to send customers a quote for signature. The quote is a document created using a DocuSign template that has been prefilled with all of the quote details. The document will be emailed to one or more recipients for signature. How should a developer configure this functionality in OmniScript?

- A. Email Action
- B. PDF Acwm
- **C. DocuSign Envelope Action**
- D. DocuSign Signature Action

#### Answer: C

Explanation:

Explanation

A DocuSign Envelope Action can be used to create and send a document for signature using a DocuSign template. The developer can specify the template ID, recipient details, and prefill data in the action configuration.

#### NEW QUESTION # 96

A developer is creating a FlexCard for a new Community page. The FlexCard will display case information along with actions to close the case and update the case, and it will be styled using the Community's theme.

What must the developer do to configure the FlexCard for deployment in a Community?

- A. Add the FlexCard's API name to the FlexCard Player component
- **B. Set the Target property in Publish Options to "CommunityPage"**
- C. Set the Deployment property in Card Configuration to "Community"
- D. Configure the Component Visibility in the Custom Component

#### Answer: B

## NEW QUESTION # 97

A customer has a new Engagement Manager who is going to be the new Primary Contact for the Account.

What type of mapping does a DataRaptor Load use to create the new contact and then add it as the new Primary Contact?

- A. Linked Mapping
- B. Relationship Query
- C. Lookup Mapping
- D. Lookup Key

**Answer: A**

Explanation:

According to the DataRaptor Load Overview page, a Linked Mapping is used to "create or update multiple records in different objects that are related by lookup fields".

## NEW QUESTION # 98
