PRINCE2 Agile Foundation Sample Questions (Q84-Q89):

NEW QUESTION # 84
What needs to happen when new detailed requirements are added to a timebox?

- A. Formal change control should be applied
- B. Requirements of a similar level of effort should be removed
- C. More people should be added to the delivery team
- D. The delivery milestones should be reviewed and re-planned

Answer: B

NEW QUESTION # 85
In which process should the requirements for delivery of specialist products be agreed?

- A. Starting up a project
- B. Managing a stage boundary
- C. Managing product delivery
- D. Initiating a project

Answer: C

Explanation:
The Managing Product Delivery process includes agreeing on and controlling the requirements for the delivery of specialist products. This process ensures that team managers understand the scope and quality expectations before work begins and that delivery aligns with the project plan.
Initiating a project and starting up a project establish overall direction but do not handle detailed delivery requirements. Managing a stage boundary reviews progress and plans the next stage.
This process maintains clarity and accountability for delivery within PRINCE2's framework, facilitating effective control over specialist products.
