GISP Exam Prep Latest 2023 Graded A+

Certification

a process, often voluntary, by which individuals who have demonstrated a level of expertise in the profession are identified to the public and other stakeholders by a third party

What did URISA explore in 1999?

Formed a committee to explore GIS certification and this work led to the creation of the GIS Certification Institute

Surveyors

determine exact position of features and the angles and distances between them. Surveyors may collect attributes as they collect locations such as x,y,z values, time, and other attributes

Mappers

create visual representations of real world locations and use thematic mapping to show locations and attributes

Photogrammetrists

Find positions of features and the angles and distances between them by measuring from photographs and analyze data to determine landcover

CAD (Computer Aided Drafting)

Use AutoCad and Microstation to create detailed plans for structures and collect some attributes

How is GIS different than CAD, Photogrammetrists, & Cartographers?

You can take the GIAC GICSP desktop practice exam on Windows computers. Fast2test has come up with this new style format in which you can easily track the records of your previous progress. So, you will understand how much you have improved or how much you need improvement for passing exam. The Global Industrial Cyber Security Professional (GICSP) (GICSP) practice exam will also boost your time management skills.

To save you from loss of money and time, Fast2test is offering a product that is specially designed to help you pass the Global Industrial Cyber Security Professional (GICSP) (GICSP) exam on the first try. The GIAC GICSP Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop GICSP Practice Test software, web-based Global Industrial Cyber Security Professional (GICSP) (GICSP) practice exam, and GICSP dumps PDF format.

Free GIAC GICSP Exam Questions - Reliable GICSP Test Forum

Using an updated Global Industrial Cyber Security Professional (GICSP) (GICSP) exam dumps is necessary to get success on the first attempt. So, it is very important to choose a GIAC GICSP exam prep material that helps you to practice actual GIAC GICSP Questions. Fast2test provides you with that product which not only helps you to memorize real GIAC GICSP questions but also allows you to practice your learning.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which of the following is a key security concern when designing Level 3 of the Purdue Reference Architecture in an ICS?
Response:

- A. Protecting the interface between the ICS network and the business network
- B. Increasing network throughput
- C. Managing physical access to the control room
- D. Ensuring real-time process control

Answer: A

NEW QUESTION # 61

What is a primary goal of conducting post-incident analysis in an ICS environment?
Response:

- A. To manage financial transactions
- B. To reduce system performance
- C. To determine the root cause of the incident and improve future defenses
- D. To develop new business models

Answer: C

NEW QUESTION # 62

What is a key security concern when using wireless technologies in an ICS environment?
Response:

- A. Limited bandwidth
- B. Lack of device interoperability
- C. Susceptibility to eavesdropping and interception
- D. Inability to perform real-time monitoring

Answer: C

NEW QUESTION # 63

Which type of process is described below?

The Station A stamping machine receives 250 Kg of rolled stock from Roller Station B, which it stamps into bearings.

- A. Distributed
- B. Continuous
- C. Discrete
- D. Batch

Answer: C

Explanation:

The process described involves transforming raw rolled stock into discrete products-bearings-by stamping them at Station A. This is characteristic of a discrete process (D), where distinct, countable items are produced (bearings), typically involving individual units or assemblies.

Batch processes (C) involve processing material in defined lots or batches, but the emphasis here is on individual item production.

Continuous processes (B) run nonstop with materials continuously flowing, common in chemical plants but not in stamping.

Distributed (A) refers to control architecture rather than process type.

GICSP defines discrete manufacturing processes as producing distinct items, requiring specific cybersecurity considerations around

control logic and equipment.

NEW QUESTION # 64

What does the following command accomplish?

```
$ chroot /home/jdoe /bin/bash
```

- A. Grants the jdoe user account root privileges when using a bash shell
- **B. Changes the root directory (/) to /home/jdoe for the associated user**
- C. Assigns root privileges to the /home/jdoe and /bin/bash directories
- D. Modifies ownership of the /home/jdoe and /bin/bash directories to root

Answer: B

Explanation:

The chroot command changes the apparent root directory (/) for the current running process and its children to the specified directory-in this case, /home/jdoe.

This "jails" the shell (bash) into /home/jdoe, limiting file system access to that subtree.

It does not change ownership (A), grant privileges (B or C), but provides a confined environment (sandbox).

GICSP discusses chroot as a containment and security mechanism in ICS system hardening.
