- A. After each upgrade
- B. During the Discover phase
- C. During the Deployment phase
- D. After the Realize phase

正解: B

解説:

The Digital Discovery Assessment (DDA) is a strategic tool used early in the SAP S/4HANA Cloud Public Edition implementation to align customer requirements with SAP capabilities and plan the project effectively.

* Option A: After each upgradeIncorrect. DDAs are not used post-upgrade, as they focus on initial project planning. * Option B: After the Realize phaseIncorrect. The Realize phase focuses on configuration and testing, not discovery. The SAP Activate Methodology Guidenotes, "The DDA is conducted before the implementation begins, not after the Realize phase, which is for solution build and validation."

* Option C: During the Discover phaseCorrect. The DDA is run during the Discover phase to assess requirements and define the project scope. TheSAP S/4HANA Cloud Implementation Guideexplains, "The DigitalDiscovery Assessment is conducted during the Discover phase to capture customer requirements, integration needs, and project timelines, forming the foundation for the implementation."

* Option D: During the Deployment phaseIncorrect. The Deploy phase focuses on go-live and cutover, not discovery activities. TheSAP S/4HANA Cloud Study Guideclarifies, "The Deploy phase is for system activation, not for running assessments like the DDA, which occurs pre-project." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide(SAP Help Portal,<https://help.sap.com>): "The Digital Discovery Assessment is a critical activity in the Discover phase, used to gather requirements, assess solution fit, and plan the SAP S/4HANA Cloud Public Edition implementation."

* SAP Activate Methodology Guide(SAP Community,<https://community.sap.com>): "During the Discover phase, the Digital Discovery Assessment is run to define the project scope, ensuring alignment between customer needs and SAP Best Practices."
