

Latest Associate-Cloud-Engineer Learning Material & Reliable Associate-Cloud-Engineer Test Voucher

BONUS!!! Download part of Itcertkey Associate-Cloud-Engineer dumps for free: https://drive.google.com/open?id=1M2j6FfPYrAF8rLz17lBuhED8B_yDZr9

Nowadays, everyone lives so busy every day, and we believe that you are no exception. If you want to save your time, it will be the best choice for you to buy our Associate-Cloud-Engineer study torrent. Because the greatest advantage of our study materials is the high effectiveness. As a powerful tool for a lot of workers to walk forward a higher self-improvement, Itcertkey continue to pursue our passion for advanced performance and human-centric technology. We aimed to help some candidates who have trouble in pass their Associate-Cloud-Engineer Exam and only need few hours can grasp all content of the exam. In recent years, our test torrent has been well received and have reached 99% pass rate with all our dedication.

With our APP online version of our Associate-Cloud-Engineer learning guide, the users only need to open the App link, you can quickly open the learning content in real time in the ways of the Associate-Cloud-Engineer study materials, can let users anytime, anywhere learning through our App, greatly improving the use value of our Associate-Cloud-Engineer Exam Prep, but also provide mock exams, timed test and on-line correction function, achieve multi-terminal equipment of common learning.

Perfect Latest Associate-Cloud-Engineer Learning Material – 100% Efficient Reliable Google Associate Cloud Engineer Exam Test Voucher

Downloading the Associate-Cloud-Engineer free demo doesn't cost you anything and you will learn about the pattern of our practice exam and the accuracy of our Associate-Cloud-Engineer test answers. We constantly check the updating of Associate-Cloud-Engineer vce pdf to follow the current exam requirement and you will be allowed to free update your pdf files one-year. Don't hesitate to get help from our customer assisting.

Google Associate Cloud Engineer Exam Sample Questions (Q136-Q141):

NEW QUESTION # 136

Your company has developed a new application that consists of multiple microservices. You want to deploy the application to

Google Kubernetes Engine (GKE), and you want to ensure that the cluster can scale as more applications are deployed in the future. You want to avoid manual intervention when each new application is deployed. What should you do?

- A. Deploy the application on GKE, and add a HorizontalPodAutoscaler to the deployment.
- B. Create a separate node pool for each application, and deploy each application to its dedicated node pool.
- C. Deploy the application on GKE, and add a VerticalPodAutoscaler to the deployment.
- **D. Create a GKE cluster with autoscaling enabled on the node pool. Set a minimum and maximum for the size of the node pool.**

Answer: D

Explanation:

Explanation

https://cloud.google.com/kubernetes-engine/docs/how-to/cluster-autoscaler#adding_a_node_pool_with_autoscal

NEW QUESTION # 137

You are configuring service accounts for an application that spans multiple projects. Virtual machines (VMs) running in the web-applications project need access to BigQuery datasets in crm-databases-proj. You want to follow Google-recommended practices to give access to the service account in the web- applications project. What should you do?

- **A. Give bigquery.dataViewer role to crm-databases-proj and appropriate roles to web-applications.**
- B. Give "project owner" role to crm-databases-proj and bigquery.dataViewer role to web- applications.
- C. Give "project owner" role to crm-databases-proj and the web-applications project.
- D. Give "project owner" for web-applications appropriate roles to crm-databases- proj

Answer: A

Explanation:

You just need read access for DB at the project.

NEW QUESTION # 138

You want to send and consume Cloud Pub/Sub messages from your App Engine application. The Cloud Pub/Sub API is currently disabled. You will use a service account to authenticate your application to the API. You want to make sure your application can use Cloud Pub/Sub. What should you do?

- A. Rely on the automatic enablement of the Cloud Pub/Sub API when the Service Account accesses it.
- **B. Enable the Cloud Pub/Sub API in the API Library on the GCP Console.**
- C. Grant the App Engine Default service account the role of Cloud Pub/Sub Admin.
Have your application enable the API on the first connection to Cloud Pub/Sub.
- D. Use Deployment Manager to deploy your application.
Rely on the automatic enablement of all APIs used by the application being deployed.

Answer: B

NEW QUESTION # 139

You received a JSON file that contained a private key of a Service Account in order to get access to several resources in a Google Cloud project. You downloaded and installed the Cloud SDK and want to use this private key for authentication and authorization when performing gcloud commands. What should you do?

- A. Place the private key file in your home directory and rename it to "GOOGLE_APPUCATION_CREDENTIALS".
- **B. Use the command gcloud auth activate-service-account and point it to the private key**
- C. Place the private key file in the installation directory of the Cloud SDK and rename it to "credentials ison"
- D. Use the command gcloud auth login and point it to the private key

Answer: B

Explanation:

<https://cloud.google.com/sdk/docs/authorizing>

NEW QUESTION # 140

You need to manage a third-party application that will run on a Compute Engine instance. Other Compute Engine instances are already running with default configuration. Application installation files are hosted on Cloud Storage. You need to access these files from the new instance without allowing other virtual machines (VMs) to access these files. What should you do?

- A. Create the instance with the default Compute Engine service account Grant the service account permissions on Cloud Storage.
- B. Create a new service account and assign this service account to the new instance Add metadata to the objects on Cloud Storage that matches the metadata on the new instance.
- **C. Create the instance with the default Compute Engine service account Add metadata to the objects on Cloud Storage that matches the metadata on the new instance.**
- D. Create a new service account and assign this service account to the new instance Grant the service account permissions on Cloud Storage.

Answer: C

Explanation:

Explanation

<https://cloud.google.com/iam/docs/best-practices-for-using-and-managing-service-accounts> If an application uses third-party or custom identities and needs to access a resource, such as a BigQuery dataset or a Cloud Storage bucket, it must perform a transition between principals. Because Google Cloud APIs don't recognize third-party or custom identities, the application can't propagate the end-user's identity to BigQuery or Cloud Storage. Instead, the application has to perform the access by using a different Google identity.

NEW QUESTION # 141

.....

Whether you are a student or a professional who has already taken part in the work, you must feel the pressure of competition now. However, no matter how fierce the competition is, as long as you have the strength, you can certainly stand out. It's not easy to become better. Our Associate-Cloud-Engineer exam questions can give you some help. After using our Associate-Cloud-Engineer Study Materials, you can pass the Associate-Cloud-Engineer exam faster and you can also prove your strength. Of course, our Associate-Cloud-Engineer study materials can bring you more than that. You will have a brighter future with the help of our Associate-Cloud-Engineer exam questions.
