Answer: C,D

NEW QUESTION # 23

Refer to the exhibit, which shows the Authentication Reputation list on a FortiMail device running in gateway mode.

Sender Reputation				
Authentication Reputation				
Delete Add to Exempt List View Blocked History				
Refresh Previous 1 / 1 Next Last Records per page: 50				
IP	Location	Violation	Access	Expiry Time
10.0.1.254	ZZ (Reserved)	Mail	CLI, Mail, Web	5 minutes

Why was the IP address blocked?

- A. The IP address had consecutive IMAP login failures to FortiMail.
- B. The IP address had consecutive SSH login failures to FortiMail.
- C. The IP address had consecutive SMTPS login failures to FortiMail.
- D. The IP address had consecutive administrative password failures to FortiMail.

Answer: C

Explanation:

Because the device's Authentication Reputation list shows a "Mail" violation and is blocking mail access (along with CLI and Web), it indicates repeated failures of the mail-protocol login. In gateway mode FortiMail only tracks SMTP (SMTPS) authentication failures under the "Mail" category, not IMAP, so consecutive SMTPS login failures triggered the block.
