In order to survive in the society and realize our own values, learning our HPE6-A86 Study Materials is the best way. Never stop improving yourself. The society warmly welcomes struggling people.

HPE Network Switching Associate Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

A Network Operator is troubleshooting a user's report of being unable to access a specific external website, `corp.example.com`. The operator can successfully ping the website's IP address (198.51.100.10) from the user's gateway switch, confirming basic Layer 3 reachability.

The operator now suspects a DNS resolution issue.

The operator needs a command that will:

1. Use the switch's configured DNS servers.
2. Attempt to resolve the hostname `corp.example.com` to an IP address.
3. Display the resulting IP address if successful.

Which of the following commands is the correct tool to perform this DNS validation task directly from the switch?

- A. `show dns client`
- B. `show hosts`
- C. `traceroute corp.example.com`
- D. `ping corp.example.com`

Answer: D

NEW QUESTION # 79

A Network Operator is in a data center and needs to quickly provision a new HPE Aruba Networking CX switch. The operator has their smartphone and wants to perform the initial configuration, connect the switch to Aruba Central, and check its status without using a laptop.

Which tool is specifically designed for this on-site, mobile-first workflow?

- A. Aruba Central via a web browser.
- B. The serial console port.
- C. **The Aruba CX Mobile App.**
- D. The REST API.

Answer: C

NEW QUESTION # 80

Which user group exists by default on a CX 8400 series switch?

- A. servicedesk
- B. helpdesk
- C. support
- D. **operators**

Answer: D

Explanation:

The CX 8400 series switch includes a predefined operators user group by default, which provides limited operational access suitable for monitoring and basic troubleshooting tasks without full administrative privileges.

NEW QUESTION # 81

A security auditor asks whether you use any insecure management protocols to configure your CX-6200 switches from their factory default state. What can you tell them?

- A. No, Telnet and HTTPS are enabled by default.
- B. Yes, Telnet is enabled by default.
- C. **No, SSH and HTTPS are enabled by default.**
- D. Yes, HTTP is enabled by default.

Answer: C

Explanation:

From the factory default state, CX-6200 switches have secure management protocols enabled, specifically SSH for CLI access and HTTPS for web access, ensuring encrypted communication for device configuration.

NEW QUESTION # 82

What is a characteristic of Static Link Aggregation Group?

- A. It dynamically negotiates and manages the formation of LAGs.
- B. Static LAGs provide automatic failover and load-balancing capabilities.
- C. **The aggregation of links is manually configured by network administrators.**
- D. It utilizes protocols like LACP for automatic link aggregation.
