

Reliable CISSP Exam Syllabus & CISSP Reliable Test Syllabus

DOWNLOAD the newest PassExamDumps CISSP PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1lyTVqDvL-C--it9iBXjCNokgbeu1-U3d>

Only 20-30 hours on our CISSP learning guide are needed for the client to prepare for the test and it saves our client's time and energy. Most people may wish to use the shortest time to prepare for the test and then pass the test with our CISSP study materials successfully because they have to spend their most time and energy on their jobs, learning, family lives and other important things. Our CISSP Study Materials can satisfy their wishes and they only spare little time to prepare for exam.

Career opportunities after getting the ISC CISSP Certification exam

There are many possibilities of career growth after earning the CISSP certification by doing prep from **CISSP Dumps**. You can become a security analyst, senior manager in security, or become one of the most skilled men in the world with your ISC CISSP certification. After earning this certification, you can start with your own cybersecurity company and secure company.

ISC's CISSP team provides support to individuals through a publicly documented question and answer forum, a non-public LinkedIn group for credential holders only, and a private Facebook group for credential holders only. The career opportunities after getting the ISC CISSP Certification Exam are numerous. Having the certification shows that you have the knowledge and experience to apply this knowledge in a secure manner. As a result, you can easily get hired by IT companies, and you can enhance your employability and value of your skillset.

Pass Certify Reliable CISSP Exam Syllabus & Newest CISSP Reliable Test Syllabus Ensure You a High Passing Rate

The contents of CISSP exam torrent was all compiled by experts through the refined off textbooks. Hundreds of experts simplified the contents of the textbooks, making the lengthy and complex contents easier and more understandable. With CISSP study tool, you only need 20-30 hours of study before the exam. CISSP Guide Torrent provides you with a brand-new learning method. In the course of doing questions, you can memorize knowledge points. You no longer need to look at the complicated expressions in the textbook.

ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q1326-Q1331):

NEW QUESTION # 1326

Which of the following questions is less likely to help in assessing controls over hardware and software maintenance?

- A. Is access to all program libraries restricted and controlled?
- **B. Are integrity verification programs used by applications to look for evidences of data tampering, errors, and omissions?**
- C. Is there version control?!

- D. Are system components tested, documented, and approved prior to promotion to production?

Answer: B

Explanation:

Hardware and software maintenance access controls are used to monitor the installation of, and updates to, hardware and software to ensure that the system functions as expected and that a historical record of changes is maintained. Integrity verification programs are more integrity controls than software maintenance controls.

NEW QUESTION # 1327

How does Radio-Frequency Identification (RFID) assist with asset management?

- A. It uses biometric information for system identification.
- B. It uses two-factor authentication (2FA) for system identification.
- C. It transmits unique Media Access Control (MAC) addresses wirelessly.
- **D. It transmits unique serial numbers wirelessly.**

Answer: D

Explanation:

Radio-Frequency Identification (RFID) assists with asset management by transmitting unique serial numbers wirelessly. RFID is a technology that uses radio waves to identify and track objects, such as assets, inventory, or personnel. RFID consists of three main components: RFID tags, RFID readers, and RFID middleware. RFID tags are small devices that are attached or embedded in the objects to be identified and tracked. RFID tags contain a microchip that stores a unique serial number, and an antenna that transmits the serial number wirelessly. RFID readers are devices that emit radio signals to activate and communicate with the RFID tags. RFID readers receive and decode the serial numbers from the RFID tags, and send them to the RFID middleware. RFID middleware is a software application that connects the RFID readers and the RFID tags with the backend systems, such as databases or enterprise resource planning systems. RFID middleware processes and analyzes the data from the RFID tags, and provides the information and functionality for asset management. RFID assists with asset management by providing the following benefits:

It enables automatic and accurate identification and tracking of assets, without the need for manual scanning or human intervention. It improves the visibility and control of assets, as the RFID tags can provide real-time information about the location, status, and condition of the assets.

It reduces the cost and complexity of asset management, as the RFID tags can store and transmit more data than other identification methods, such as barcodes or labels, and can operate in harsh or remote environments.

NEW QUESTION # 1328

Where can the Open Web Application Security Project (OWASP) list of associated vulnerabilities be found?

- A. OWASP Software Assurance Maturity Model (SAMM) Project
- B. OWASP Mobile Project
- **C. OWASP Top 10 Project**
- D. OWASP Guide Project

Answer: C

Explanation:

The OWASP Top 10 Project is a project that provides a list of the most critical web application security risks and associated vulnerabilities. The OWASP Top 10 Project aims to raise awareness and educate developers, designers, architects, managers, and organizations about the consequences of the most common and impactful web application security weaknesses. The OWASP Top 10 Project also provides guidance on how to prevent, detect, and mitigate these risks and vulnerabilities. The OWASP Top 10 Project is updated periodically based on the feedback from the security community and the data from various sources.

NEW QUESTION # 1329

While reviewing the financial reporting risks of a third-party application, which of the following Service Organization Control (SOC)

reports will be the MOST useful?

- A. SOC 3
- **B. SOC 1**
- C. SOC for cybersecurity
- D. SOC 2

Answer: B

NEW QUESTION # 1330

Operations Security seeks to primarily protect against which of the following?

- A. object reuse
- B. facility disaster
- C. compromising emanations
- **D. asset threats**

Answer: D

Explanation:

The correct answer is asset threats. A threat is any circumstance or event with the potential to cause harm.

The most important reason for identifying threats is to know from what do the assets need protection and what is the likelihood that a threat will occur. Threats cannot be eliminated, but can be anticipated, and safeguards put in place to minimize their impact.

Operations Security provides audit and monitoring for mechanisms, tools and facilities which permit the identification of security events and documentation of subsequent corrective actions. Source: State of Nebraska - Information Security Systems (ISS) Security Officer Instruction Guide.

NEW QUESTION # 1331

.....

People who appear in the test of the Certified Information Systems Security Professional (CISSP) (CISSP) certification face the issue of not finding up-to-date and real exam dumps. PassExamDumps is here to resolve all of your problems with its actual and latest ISC CISSP Questions. You can successfully get prepared for the Certified Information Systems Security Professional (CISSP) (CISSP) examination in a short time with the aid of these test questions.
