ISACA COBIT 2019 Foundation Sample Questions (Q159-Q164):

NEW QUESTION # 159
Innovation and differentiation are examples of:

- A. enterprise strategy design factors.
- B. enterprise objectives design factors.
- C. enterprise goal risk factors.

Answer: B

Explanation:
Explanation
Innovation and differentiation are examples of enterprise objectives design factors. Design factors are the characteristics or aspects of an enterprise that influence the design and implementation of a governance system. They include factors such as enterprise size, industry sector, risk profile, regulatory environment, sourcing model, etc. Enterprise objectives are the specific goals or targets that an enterprise sets to achieve its vision and mission. They are derived from the stakeholder drivers and needs, and are influenced by the design factors. Innovation and differentiation are two possible design factors that affect how an enterprise defines its objectives.12 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution

NEW QUESTION # 160
Within the COBIT goals cascade, stakeholder drivers are transformed into:

- A. the enterprise's governance framework.
- B. business unit performance metrics.
- C. the enterprise's actionable strategy.

Answer: C

Explanation:
Within the COBIT goals cascade, stakeholder drivers are transformed into the enterprise's actionable strategy. The COBIT goals cascade is a mechanism that helps enterprises to align their governance objectives with their stakeholder needs. It consists of four levels: stakeholder drivers, enterprise goals, alignment goals, and governance and management objectives. Stakeholder drivers are the needs or expectations of the internal or external stakeholders of the enterprise. Enterprise goals are the specific targets or outcomes that the enterprise sets to achieve its vision and mission. Alignment goals are the intermediate goals that link the enterprise goals with the governance and management objectives. Governance and management objectives are the desired outcomes of the governance system for information and technology. Stakeholder drivers are transformed into enterprise goals through a process of analysis, prioritization, and validation. Enterprise goals form the basis of the enterprise's actionable strategy.12 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance System

NEW QUESTION # 161
Which of the following is a guiding principle in the development of COBIT?

- A. COBIT includes relevant content from other related I&T standards, frameworks and regulations.
- B. COBIT aligns with other related and relevant I&T standards, frameworks and regulations
- C. COBIT serves as a comprehensive standalone framework that covers all relevant I&T-related activities.

Answer: B

Explanation:
Explanation
A guiding principle in the development of COBIT is that COBIT aligns with other related and relevant I&T standards, frameworks and regulations. This is based on the principle of integration, which states that
"governance of enterprise I&T should ensure integration into enterprise governance; alignment with other related standards, frameworks and regulations; and provision of a common language for all stakeholders" .
COBIT does not include or replace other standards, frameworks or regulations, but rather complements them by providing a holistic

and comprehensive approach to governance of enterprise I&T.

NEW QUESTION # 162

Which of the following frameworks has been used as a basis for developing guidance for the COBIT governance component of people, skills and competencies?

- **A. Skills Framework for the Information Age**
- B. Cyber Security Framework
- C. Sans Security Policy Framework

Answer: A

Explanation:
Explanation
The Skills Framework for the Information Age (SFIA) has been used as a basis for developing guidance for the COBIT governance component of people, skills and competencies. SFIA is a globally recognized framework that describes the skills required by professionals who work with information and technology2, p. 36. References: 2: COBIT 2019 Framework: Introduction and Methodology

NEW QUESTION # 163

The alignment goal titled "Enabling and supporting business processes by integrating applications and technology" is aligned to which IT balanced scorecard (BSC) dimension?

- **A. Internal**
- B. Customer
- C. Financial

Answer: A
