212-82 Exam Quiz, 212-82 Test Topics Pdf

If you prefer to study by your mobile phone, our 212-82 study materials also can meet your demand, because our learning system can support all electronic equipment. You just need to download the online version of our 212-82 preparation questions, and you can use our products by any electronic equipment. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our 212-82 Study Materials.

ECCouncil Certified Cybersecurity Technician Sample Questions (Q14-Q19):

NEW QUESTION # 14
A software company is developing a new software product by following the best practices for secure application development. Dawson, a software analyst, is checking the performance of the application on the client's network to determine whether end users are facing any issues in accessing the application.
Which of the following tiers of a secure application development lifecycle involves checking the performance of the application?

- A. Testing
- B. Quality assurance (QA)
- C. Development
- D. Staging

Answer: A

Explanation:
The testing tier of a secure application development lifecycle involves checking the performance of the application on the client's network to determine whether end users are facing any issues in accessing the application. Testing is a crucial phase of software development that ensures the quality, functionality, reliability, and security of the application. Testing can be done manually or automatically using various tools and techniques, such as unit testing, integration testing, system testing, regression testing, performance testing, usability testing, security testing, and acceptance testing

NEW QUESTION # 15
Stephen, a security professional at an organization, was instructed to implement security measures that prevent corporate data leakage on employees' mobile devices. For this purpose, he employed a technique using which all personal and corporate data are isolated on an employee's mobile device. Using this technique, corporate applications do not have any control of or communication with the private applications or data of the employees.
Which of the following techniques has Stephen implemented in the above scenario?

- A. Full device encryption
- B. Geofencing
- C. OTA updates
- D. Containerization

Answer: D

NEW QUESTION # 16
Zayn, a network specialist at an organization, used Wireshark to perform network analysis. He selected a Wireshark menu that provided a summary ol captured packets, IO graphs, and flow graphs. Identify the Wireshark menu selected by Zayn in this scenario.

- A. Status bar
- B. Analyze
- C. Statistics
- D. Packet list panel

Answer: C

Explanation:
Statistics is the Wireshark menu selected by Zayn in this scenario. Statistics is a Wireshark menu that provides a summary of captured packets, IO graphs, and flow graphs. Statistics can be used to analyze various aspects of network traffic, such as protocols, endpoints, conversations, or packet lengths.

NEW QUESTION # 17
Grace, an online shopping enthusiast, purchased a smart TV using her debit card. During online payment. Grace's browser redirected her from the e-commerce website to a third-party payment gateway, where she provided her debit card details and the OTP received on her registered mobile phone. After completing the transaction, Grace logged Into her online bank account and verified the current balance in her savings account, identify the state of data being processed between the e-commerce website and payment gateway in the above scenario.

- A. Data in use
- B. Data in transit
- C. Data at rest
- D. Data in inactive

Answer: B

Explanation:
Data in transit is the state of data being processed between the e-commerce website and payment gateway in the above scenario.
Data in transit is the data that is moving from one location to another over a network, such as the internet. Data in transit can be vulnerable to interception, modification, or theft by unauthorized parties. Therefore, data in transit should be protected using

encryption, authentication, and secure protocols2. Reference: Data in Transit

NEW QUESTION # 18

Giovanni, a system administrator, was tasked with configuring permissions for employees working on a new project. Hit organization used active directories (ADs) to grant/deny permissions to resources Giovanni created a folder for AD users with the required permissions and added all employees working on the new project in it. Identify the type of account created by Giovanni in this scenario.

- A. Shared account
- B. Croup-based account
- C. Third-party account
- D. Application account

Answer: B

Explanation:
Group-based account is the type of account created by Giovanni in this scenario. An account is a set of credentials, such as a username and a password, that allows a user to access a system or network. An account can have different types based on its purpose or usage. A group-based account is a type of account that allows multiple users to access a system or network with the same credentials and permissions. A group-based account can be used to simplify the management of users and resources by assigning them to groups based on their roles or functions. In the scenario, Giovanni was tasked with configuring permissions for employees working on a new project. His organization used active directories (ADs) to grant/deny permissions to resources. Giovanni created a folder for AD users with the required permissions and added all employees working on the new project in it. This means that he created a group-based account for those employees. A third-party account is a type of account that allows an external entity or service to access a system or network with limited permissions or scope. A shared account is a type of account that allows multiple users to access a system or network with the same credentials but different permissions. An application account is a type of account that allows an application or software to access a system or network with specific permissions or functions.

NEW QUESTION # 19

......
