Cisco 300-710 Practice Test - The Key To Fast Exam

The second format of Securing Networks with Cisco Firepower (300-710) is the web-based practice exam that can be taken online through browsers like Firefox, Chrome, Safari, MS Edge, Internet Explorer, and Microsoft Edge. You don't need to install any

excessive plugins or Software to attempt the web-based Practice 300-710 Exam. All operating systems also support the web-based practice exam.

Prerequisites

This test does not have any official prerequisites. However, the applicants should have a deep understanding of fundamental routing protocols and TCP/IP. It is also recommended that they are familiar with VPN, firewall, and IPS (Intrusion Prevention Systems) concepts. The intended audience for Cisco 300-710 SNCF is Technical Support Personnel, Security Administrators, Security Consultants, Cisco Integrators & Partners, System Engineers, and Network Administrators, among others. Irrespective of the experience level of the examinees, it is critical to get acquainted with the topics of the certification test in advance.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q361-Q366):

NEW QUESTION # 361
A security engineer is configuring an Access Control Policy for multiple branch locations These locations share a common rule set and utilize a network object called INSIDE_NET which contains the locally significant internal network subnets at each location What technique will retain the policy consistency at each location but allow only the locally significant network subnet within the applicable rules?

- A. creating a unique ACP per device
- B. utilizing a dynamic ACP that updates from Cisco Talos
- C. utilizing policy inheritance
- D. creating an ACP with an INSIDE_NET network object and object overrides

Answer: D

NEW QUESTION # 362
An administrator is working on a migration from Cisco ASA to the Cisco FTD appliance and needs to test the rules without disrupting the traffic. Which policy type should be used to configure the ASA rules during this phase of the migration?

- A. Intrusion
- B. identity
- C. Access Control
- D. Prefilter

Answer: C

Explanation:
Reference:
https://www.cisco.com/c/en/us/td/docs/security/firepower/migration-tool/migration-guide/ASA2FTD-with-FP-M

NEW QUESTION # 363
In which two ways do access control policies operate on a Cisco Firepower system? (Choose two.)

- A. They can block traffic based on Security Intelligence data.
- B. The system performs a preliminary inspection on trusted traffic to validate that it matches the trusted parameters.
- C. The system performs intrusion inspection followed by file inspection.
- D. File policies use an associated variable set to perform intrusion prevention.
- E. Traffic inspection can be interrupted temporarily when configuration changes are deployed.

Answer: A,E

Explanation:
Section: Configuration
Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/60/configuration/guide/fpmc-config-guide-v60/Access_Control_Using_Intrusion_and_File_Policies.html

NEW QUESTION # 364

Which two conditions must be met to enable high availability between two Cisco FTD devices? (Choose two.)

- A. same DHCP/PPoE configuration
- B. same NTP configuration
- C. same number of interfaces
- D. same host name
- E. same flash memory size

Answer: B,C

Explanation:

https://www.cisco.com/c/en/us/support/docs/security/firepower-management-center/212699-configure-ftd-high-a Conditions In order to create an HA between 2 FTD devices, these conditions must be met:
Same model
Same version (this applies to FXOS and to FTD - (major (first number), minor (second number), and maintenance (third number) must be equal)) Same number of interfaces Same type of interfaces Both devices as part of same group/domain in FMC Have identical Network Time Protocol (NTP) configuration Be fully deployed on the FMC without uncommitted changes Be in the same firewall mode: routed or transparent.
Note that this must be checked on both FTD devices and FMC GUI since there have been cases where the FTDs had the same mode, but FMC does not reflect this.
Does not have DHCP/Point-to-Point Protocol over Ethernet (PPPoE) configured in any of the interface Different hostname (Fully Qualified Domain Name (FQDN)) for both chassis. In order to check the chassis hostname navigate to FTD CLI and run this command

NEW QUESTION # 365

An organization wants to secure traffic from their branch office to the headquarter building using Cisco Firepower devices, They want to ensure that their Cisco Firepower devices are not wasting resources on inspecting the VPN traffic. What must be done to meet these requirements?

- A. Configure the Cisco Firepower devices to ignore the VPN traffic using prefilter policies
- B. Enable a flexconfig policy to re-classify VPN traffic so that it no longer appears as interesting traffic
- C. Tune the intrusion policies in order to allow the VPN traffic through without inspection
- D. Configure the Cisco Firepower devices to bypass the access control policies for VPN traffic.

Answer: D

Explanation:
When you configure the Cisco Firepower devices to bypass the access control policies for VPN traffic, the devices will not inspect the VPN traffic and thus will not waste resources on it. This is the best option to ensure that the VPN traffic is not wasting resources on the Cisco Firepower devices.
