- D. Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).
- E. Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.

Answer: B,D,E

Explanation:

Step 1 - Understanding the question

This question asks about the System View Dashboard in SAP Cloud ALM and how it helps maintain a clean core and support upgrades for SAP S/4HANA.

A "clean core" means keeping the SAP system as standard as possible, reducing unnecessary custom code or modifications that can complicate upgrades.

Step 2 - Evaluate each option

Option A: Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.

This is correct.

The System View Dashboard helps identify extensions and modifications that might impact system upgrades.

It provides visibility into the system landscape and highlights potential upgrade risks due to custom code or integrations.

Option B: Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.

This is incorrect.

The System View Dashboard does not perform cost analysis. Its purpose is monitoring system health, readiness, and upgrade-related insights, not financial evaluation.

Option C: Performance Benchmarking: Compare performance against industry peers.

This is incorrect.

Performance benchmarking is not part of the System View Dashboard. It focuses on system version, tool readiness, and upgrade preparation, not performance comparisons.

Option D: Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).

This is correct.

The dashboard checks whether key monitoring and analysis tools-like SAP EarlyWatch Alerts or other SAP monitoring services-are active.

These tools provide valuable data to support clean-core management and help ensure system stability before and after upgrades.

Option E: Version insights: Ensure your installed SAP S/4HANA product version is up to date.

This is correct.

The dashboard provides insights into the installed product version, ensuring that the system is on a supported release and highlighting if an upgrade is due.

This directly supports upgrade planning and helps keep the core system clean and current.

Step 3 - Final Answer

The correct answers are A. Upgrade preparation, D. Tool readiness, and E. Version insights.
