

# Exam HPE7-A03 Review | HPE7-A03 Study Demo

2025 Latest Exams HPE7-A03 PDF Dumps and HPE7-A03 Exam Engine Free Share: <https://drive.google.com/open?id=1y8lsUxouZnv-DZ9vm90pi7LiG6ocfEfv>

You may urgently need to attend HPE7-A03 certificate exam and get the certificate to prove you are qualified for the job in some area. But what certificate is valuable and useful and can help you a lot? Passing the HPE7-A03 test certification can help you prove that you are competent in some area and if you buy our HPE7-A03 Study Materials you will pass the test almost without any problems for we are the trustful vendor of the HPE7-A03 practice guide for years.

As far as we know, our HPE7-A03 exam prep have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently. Our HPE7-A03 practice materials will not let your down. To lead a respectable life, our experts made a rigorously study of professional knowledge about this exam. We can assure you the proficiency of our HPE7-A03 Exam Prep. So this is a definitive choice, it means our HPE7-A03 practice materials will help you reap the fruit of success.

## Free PDF Fantastic HP - HPE7-A03 - Exam Aruba Certified Campus Access Architect Exam Review

You won't need anything else if you prepare for the exam with our HP HPE7-A03 Exam Questions. Our experts have prepared HP HPE7-A03 dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the HP HPE7-A03 Exam Preparation.

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q27-Q32):

### NEW QUESTION # 27

A global cruise line company needs to refresh its current fleet. They win refresh the insides' of the ship to be cost-effective and

increase their sustain ability. They Mill replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh Us current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins. 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF. of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single

OM2 pair to the IDF. the maximum length is 60 meters (200 ft). Each technical room is connected by a single

OM2 pail to the IDF. with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbEto handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running instantOS (less than 300 APs).

the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on the best practices and customer requirements, what is the correct LAN approach?

- A. management VLAN in the underlay, user VLANs in the overlay
- B. management and user VLANs in the underlay
- C. management VLAN in the overlay, user VLANs in the underlay
- D. management and user VLANs in the overlay

**Answer: A**

Explanation:

In the context of the ESP architecture from Aruba and the specific requirements of the cruise line company, the best practice would be to place management VLANs in the underlay and user VLANs in the overlay. This design allows for a clear separation of management traffic from user data, enhancing security and network performance. The management underlay ensures secure and reliable access to network infrastructure for administrative purposes, while the user overlay allows for flexible and dynamic segmentation of user traffic.

This approach is aligned with best practices for network design, where critical management traffic is isolated from user data to prevent unauthorized access and potential security breaches. It also supports the cruise line's need for a robust and secure network to ensure the operational reliability of paid guest Wi-Fi and other critical services.

#### NEW QUESTION # 28

identify the stakeholders when gathering information for the network design and new IDF/MDF design.

(Select two.)

- A. Network Operations manager
- B. Facility manager
- C. Help desk manager
- D. Chief Financial Officer

**Answer: A,C**

Explanation:

When designing a network and considering new Intermediate Distribution Frame/Main Distribution Frame (IDF/MDF) deployments, it's essential to gather information from various stakeholders to ensure the design meets all operational and organizational requirements. According to Aruba Campus Access learning resources, the Help Desk Manager and Network Operations Manager are crucial stakeholders in this process. The Help Desk Manager provides insights into common issues, user complaints, and service requests, which can influence network design decisions to improve user experience and operational efficiency. The Network Operations Manager, on the other hand, offers a technical perspective on network management, maintenance requirements, and operational challenges. Engaging with these stakeholders ensures that the network design is aligned with both user needs and

technical operational standards, contributing to a more resilient, efficient, and user-friendly network infrastructure.

### NEW QUESTION # 29

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada. They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or Interactive kiosks in the stores. The current Infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDF's located on floors one and two. The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

What are two primary concerns of the Stakeholder' (Select two.)

- A. cost of solution
- B. ease of access
- C. future proof
- D. expansion

**Answer: A,C**

Explanation:

For the stakeholders at ACME Retail, the primary concerns include the cost of the solution and ensuring that the solution is future-proof. Given the company's budget concerns, it is crucial that the chosen network infrastructure offers a good return on investment and aligns with their financial constraints. At the same time, considering the company's growth plans and the rapid evolution of technology, the solution must be scalable and adaptable to future needs. This involves selecting networking equipment and technologies that can support emerging trends, such as increased wireless device usage, cloud computing, and advanced security requirements, without necessitating frequent, costly upgrades. Balancing these concerns will help ACME Retail achieve its operational goals while positioning itself for sustainable growth and innovation.

### NEW QUESTION # 30

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1x neighborhood health centers and

125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City

- Dila Health Center is located in City A

- Mount Health Center is located in City B

- Rock Health Center is located in City C

- Branch clinics are located at different locations across the United States Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance

reporting.

- Seamless integration across wired, wireless. WAN, S0-8branch. IoT

\* Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.

- All-access points must support the following features and specifications: 802.11ax (WI-FI 6E Certified)

- Security options Including WPA3. 802.11X with Radius secure authentication

- Identify and authenticate every wireless and wired device

- End-to-end role-based security

- Seamless mobility across the hospital for medical teams, patients, and visitors

- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site

- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs

- Fully redundant branch solution with dynamic path selection to the hospital XYZ Regional Hospital is looking for an NAC solution to address its security challenges-Requirements:

- fully redundant NAC solution for management and authentication

- wireless and wired authentication for the main hospital will be handled locally The IT director of XYZ Regional Hospital is interested in a solution for nurse workstation tracking. What solution would meet the customer's requirements? (Select three.)

- A. Aruba Tags Configuration App
- B. Aruba User Experience Insight
- C. Airwave
- D. Client insight
- E. Map Subscription
- F. Asset Tracking Subscription

**Answer: B,E,F**

Explanation:

For nurse workstation tracking, Aruba User Experience Insight can provide insights into how applications and network services are performing, which can help in understanding user experiences across the hospital network. The Asset Tracking Subscription is a crucial component for keeping track of physical assets such as nurse workstations. The Map Subscription would complement the asset tracking by providing detailed maps of the hospital's interior, enabling precise location tracking of the workstations. These solutions together would allow the hospital to effectively track and manage their resources, ensuring that nurses can find workstations quickly and efficiently, which is essential in a fast-paced medical environment.

### NEW QUESTION # 31

A global furniture retail company called 'No-Stair Inc.' requests you design their new WLAN infrastructure for a global footprint. Each location of No-Stair Inc.' has a similar layout: three small manager offices, a warehouse, and a 'retail' area. The 'retail' area and the warehouse together amount to 95% of the location. The IT department of the company is minimally engaged in their LAN refresh so the CTO of the company has shared the information below Current WLAN Infrastructure is based on the 802.11n in "WIFI4Less" access-points series (both model 2013- INT (2.4 only Internal antenna) and model 2019-EXT (dual-band external antenna only)). These AP models are standalone without any centralized management. Last year 'No-Stair Inc' ran a project called secure. It' ensuring that all needed network security was implemented to be fully compliant with their security standards. During this project, they also upgraded the AAA infrastructure to handle the increased AAA requests. No additional Wi-Fi or security requirements are listed for this WLAN refresh, which means that 'No-Stair Inc.' will continue to use bridged SSIDs. with local breakout into different VLANs.

The CTO of No-Stair Inc.' understands the need for you to ask additional questions to deliver the design The questions may be sent in written form and will be answered within two weeks.

Which additional question is correct in order to collect needed information for the WLAN design?

- A. Who is the campus switch vendor?
- B. What type of fiber connection is used between the core and access layer switches?
- C. Is there a current RF survey report that you can share?
- D. Is there enough cooling in the MDF?

**Answer: C**

Explanation:

An RF (Radio Frequency) survey report is crucial for WLAN design as it provides detailed information about the current wireless environment, including signal strengths, interference sources, coverage gaps, and the effectiveness of the existing WLAN

infrastructure. For a company like 'No-Stair Inc.' that is planning to refresh its WLAN across a global footprint, understanding the current RF conditions in each location is essential. This information helps in designing a WLAN infrastructure that can meet the specific needs of different areas within the locations, such as the retail area and warehouse, ensuring optimal coverage, performance, and user experience. An RF survey report would allow the designer to make informed decisions regarding the placement of new access points, the selection of appropriate antennas, and the configuration of WLAN parameters to improve coverage and capacity while minimizing interference.

## NEW QUESTION # 32

.....

According to different kinds of questionnaires based on study condition among different age groups, our HPE7-A03 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for HPE7-A03 exams, thus inspiring them obtain the targeted HPE7-A03 certificate successfully. There are many advantages of our HPE7-A03 question torrent that we are happy to introduce you and you can pass the HPE7-A03 exam for sure.

**HPE7-A03 Study Demo:** <https://www.exams4sures.com/HP/HPE7-A03-practice-exam-dumps.html>

Maybe there are many materials for HPE7-A03 valid exam, but the HPE7-A03 exam pdf provided by our website can ensure you the accuracy and profession. In order to keep our privacy of our customers who have purchased our HPE7-A03 training materials, our elite developed the privacy protection software to protect their private information, HP Exam HPE7-A03 Review Just send your score report to our support when you failed, we will refund after confirmation.

You can customize and save the work area HPE7-A03 Positive Feedback to suit your work style, Is this thing working, Maybe there are many materials for HPE7-A03 valid exam, but the HPE7-A03 exam pdf provided by our website can ensure you the accuracy and profession.

## Pass Guaranteed HP - HPE7-A03 - Aruba Certified Campus Access Architect Exam Unparalleled Exam Review

In order to keep our privacy of our customers who have purchased our HPE7-A03 training materials, our elite developed the privacy protection software to protect their private information.

Just send your score report to our support when you failed, HPE7-A03 we will refund after confirmation, Respectable company, We help you get all around comfortable services.
