The quality of our C_SAC_2501 learning materials can withstand the test of practice.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample

Questions (Q56-Q61):

NEW QUESTION # 56
You are creating a styling rule for a table. What is the context?

- A. The highest level in the table
- B. The most granular level in the table
- C. The table header
- D. The location of the cursor

Answer: D

NEW QUESTION # 57
In a data model, what can you use to further describe a dimension?

- A. Measure
- B. Variable
- C. Data action
- D. Property

Answer: D

Explanation:
In a data model within SAP Analytics Cloud, Properties are used to further describe dimensions. Properties provide additional context or metadata for dimension members, such as descriptions, classifications, or other attributes that help to better understand and analyze the data within the dimension. This makes properties essential for detailed data analysis and reporting.

NEW QUESTION # 58
You want to use an input control to filter data appearing in a story. At what level is the filter applied?

- A. Calculation
- B. Story
- C. Component
- D. Page

Answer: D

Explanation:
When using an input control to filter data in a SAP Analytics Cloud story, the filter is applied at the Page level. This means that the selected filter criteria will affect all the components (tables, charts, etc.) on that particular page, allowing for a cohesive and consistent view of the data filtered according to the chosen parameters.

NEW QUESTION # 59
Where can you create a blank planning version?

- A. In the planning model
- B. In a data cell
- C. In the version dimension
- D. In version management

Answer: D

Explanation:
A blank planning version in SAP Analytics Cloud can be created within the Version Management feature. This area of the platform allows users to manage different versions of their data, such as budgets, forecasts, and what-if scenarios. Creating a blank version provides a clean slate for planning activities, without pre-existing data, enabling users to start fresh with their assumptions and inputs.

NEW QUESTION # 60
How can you help a user enter data faster in a planning story? Note: There are 2 correct answers to this question.

- A. Enable Optimize Recommended Planning Area in the model.
- B. Enable unbooked data in the story.
- C. Select fluid data entry mode in the story.
- D. Set Size Limits for Planning Performance in the model.

Answer: A,C

NEW QUESTION # 61
