

Efficient C_ACDET_2506 Answers Free Supply you Fast-Download Valid Dumps Pdf for C_ACDET_2506: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite to Study casually

P.S. Free 2025 SAP C_ACDET_2506 dumps are available on Google Drive shared by SureTorrent:
<https://drive.google.com/open?id=1NAKZUyA02QshxJpYL9KIQnb8Plmgt3Cz>

After the user has purchased our C_ACDET_2506 learning materials, we will discover in the course of use that our product design is extremely scientific and reasonable. Details determine success or failure, so our every detail is strictly controlled. For example, our learning material's Windows Software page is clearly, our C_ACDET_2506 Learning material interface is simple and beautiful. There are no additional ads to disturb the user to use the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite qualification question. Once you have submitted your practice time, C_ACDET_2506 study tool system will automatically complete your operation.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

C_ACDET_2506 Study Materials - C_ACDET_2506 Actual Test & C_ACDET_2506 Exam Guide

To ensure that the C_ACDET_2506 dumps PDF format remains up to date, the SAP C_ACDET_2506 questions in it are regularly revised to reflect any modifications to the C_ACDET_2506 exam content. This commitment to staying current and aligned with the C_ACDET_2506 Exam Topics ensures that candidates receive the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) updated questions.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q14-Q19):

NEW QUESTION # 14

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- B. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- C. Publish the form template within the test site in order to add the form fields in the package.
- D. Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.
- E. Discard any other packages that appear in My Action Items.

Answer: A,B,D

Explanation:

When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.

* Enumerations (B): These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.

* String Resource Files (C): These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.

* Flex Master Data (E): Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them. Discarding unrelated packages (A) or publishing form templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately. SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

NEW QUESTION # 15

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. The templates are migrated by the tool, but the data must be loaded manually later.
- B. Neither the templates nor the data is migrated using the tool.
- C. Both the templates and their data are fully migrated by the tool.
- D. Only the data of the flex master data templates is migrated; templates must be created manually.

Answer: A

Explanation:

In SAP Ariba, the migration tool (Intelligent Configuration Manager - ICM) migrates flex master data templates (the structure and definitions), but it does not migrate the actual master data records. The master data itself must be manually exported from the source and imported into the target environment after templates are migrated. This separation helps ensure data integrity and allows for more controlled migration processes.

NEW QUESTION # 16

A customer requests a dynamic list from CSV. Which field type supports that?

- A. Computed Field
- B. Single-Select Enum
- C. Flex Master Data-based field
- D. Hyperlink

Answer: C

Explanation:

The Flex Master Data (FMD)-based field type supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.

Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.

Hyperlink fields store URLs, unrelated to selection lists.

FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

NEW QUESTION # 17

Which of the following can be used to define relation types and establish a custom relationship? (Select 2 correct answers)

- A. A standard class such as `ariba.basic.core.CommodityCode`
- B. A custom Form Template such as `vrealm_1936.formDoc_18697.LessonsLearned`
- C. A custom Flex Master Data Template such as `vrealm_1936.fmd_58984.Hospital`
- D. A custom Enumeration such as `Contracts_Contract_Type`

Answer: A,C

Explanation:

In SAP Ariba, relation types can be defined using custom Flex Master Data (FMD) templates and standard classes such as `ariba.basic.core.CommodityCode`. These define valid relationships between fields, allowing dependent picklists or filtering logic in forms. Custom enumerations are static lists and are not used to establish dynamic relations, and custom form templates are for form layouts and do not define data relationships.

NEW QUESTION # 18

What are the key characteristics of a Bluefield deployment scenario? Note: There are 2 correct answers to this question.

- A. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed
- B. Many team members have a naive perception of deploying software solutions
- C. The Test site has been configured using the SAP Bluefield template
- D. The Production site may have live transactions

Answer: A,D

NEW QUESTION # 19

.....

SureTorrent SAP C_ACDET_2506 dumps contain required materials for the candidates. Once you purchase our products, all

problems will be readily solved. You can try to use our free demo and download pdf real questions and answers before you make a decision. These exam simulations will help you to understand our products. Widespread scope and regularly update are the outstanding characteristic of SureTorrent SAP C_ACDET_2506 braindump. By choosing it, all IT certifications are ok.
