100% Pass 2025 High Pass-Rate SAP C_IBP_2502 Reliable Exam Practice

ValidDumps is a reputable and highly regarded platform that provides comprehensive preparation resources for the SAP Certified Associate - SAP IBP for Supply Chain (C_IBP_2502). For years, ValidDumps has been offering real, valid, and updated C_IBP_2502 Exam Questions, resulting in numerous successful candidates who now work for renowned global brands.

SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- A. Purge Non-Conforming Data
- B. Purge Master Data
- C. Purge Key Figure Data
- D. Purge Key Figure Data Outside Planning Area Planning Horizon

Answer: C

Explanation:

Planning operators in SAP IBP (via the Application Jobs app) manage data, including deletions. The question likely intends "delete key figure data for planning objects" in a version, not the objects themselves, per SAP IBP's terminology.

* Option A: Purge Master Data This is incorrect. This deletes master data (e.g., Products), not key figure data tied to planning objects in a version.

* Option B: Purge Key Figure Data Outside Planning Area Planning Horizon This is incorrect. This deletes data outside the horizon

across versions, not specific to a version's planning objects.

* Option C: Purge Key Figure Data This is correct. The Purge Key Figure Data operator deletes key figure values for specified planning objects (e.g., by filter) in a selected version, per SAP IBP's data management documentation.

* Option D: Purge Non-Conforming Data This is incorrect. This removes inconsistent data (e.g., orphaned records), not targeted deletion in a version.

Thus, C is the correct operator, per SAP IBP's official job capabilities.

NEW QUESTION # 46

What are some of the capabilities of the Planner Workspaces app? Note: There are 2 correct answers to this question.

- A. It supports sharing with other users or user groups
- **B. It supports embedding analytic stories as a workspace component**
- C. It supports simulating the effect of the changes
- **D. It supports favorites created in SAP IBP, add-in for Microsoft Excel**

Answer: B,D

Explanation:

The Planner Workspaces app in SAP IBP is a Fiori-based UI that integrates planning tools, analytics, and collaboration features for supply chain planners.

* Option A: It supports simulating the effect of the changes This is incorrect. While simulation is a feature in SAP IBP (e.g., via versions or scenarios in Excel), Planner Workspaces focuses on visualization and navigation, not direct simulation execution. Simulation occurs in other apps like Excel or Manage Scenarios.

* Option B: It supports favorites created in SAP IBP, add-in for Microsoft Excel This is correct.

Planner Workspaces integrates with the Excel add-in, allowing users to access their Excel favorites (e.g., planning views) directly within the workspace. This enhances usability by linking preferred tools, as per SAP IBP's documentation on Planner Workspaces.

* Option C: It supports embedding analytic stories as a workspace component This is correct.

Analytic stories (created in the Manage Analytics Stories app) can be embedded in Planner Workspaces, providing charts and insights alongside planning data. This is a key visualization feature, per SAP IBP's UI capabilities.

* Option D: It supports sharing with other users or user groups This is incorrect. Sharing is available in Excel (e.g., templates) or analytics apps, but Planner Workspaces doesn't have a native sharing function for workspaces themselves. Collaboration occurs via other mechanisms.

Thus, B and C are accurate capabilities of Planner Workspaces, aligning with SAP IBP's official feature set.

NEW QUESTION # 47

Analytics charts are created by the user in the Advanced Analytics application. What can the user do in the Advanced Analytics app? Note: There are 2 correct answers to this question.

- **A. Group data**
- B. Merge charts together
- **C. Apply filters on the data**
- D. Trigger export to Manage Analytics Stories

Answer: A,C

Explanation:

The Advanced Analytics app in SAP IBP allows users to create and customize charts for insights, with specific interactive features.

* Option A: Trigger export to Manage Analytics Stories This is incorrect. Charts are exported from Manage Analytics Stories, not Advanced Analytics directly; the flow is reversed.

* Option B: Merge charts together This is incorrect. Merging charts isn't a feature in Advanced Analytics; it supports individual chart creation.

* Option C: Apply filters on the data This is correct. Users can apply filters (e.g., by Product, Time) to refine chart data, a core feature, per SAP IBP's analytics documentation.

* Option D: Group data This is correct. Grouping (e.g., by Region) aggregates data in charts, a standard capability, per SAP IBP's Advanced Analytics guides.

Thus, C and D are actions in Advanced Analytics, per SAP IBP's official functionality.

NEW QUESTION # 48

Which of the following conditions are relevant for subtotals in the planning view? Note: There are 2 correct answers to this question.

- A. The total number of attributes that can use subtotal in the planning view can be restricted
- B. The total value can be added before or after the selected attribute
- C. The values of the attribute-based total at the highest attribute level in the planning level can be changed
- D. Only attribute-based totals can be added to the planning view

Answer: A,B

Explanation:

Subtotals in SAP IBP planning views (typically in the Excel add-in) allow users to aggregate key figure values by attributes (e.g., Product, Location) for analysis. Configuration and display options govern their behavior.

* Option A: The total value can be added before or after the selected attribute This is correct. In the planning view, subtotals can be positioned flexibly-either before (above) or after (below) the attribute values in the layout. This is configurable in the Excel template design, a standard feature per SAP IBP's planning view documentation.

* Option B: The total number of attributes that can use subtotal in the planning view can be restricted This is correct. The number of attributes for subtotals can be limited by the planning view's design or system performance settings (e.g., via global parameters or template complexity), ensuring usability and efficiency, as noted in SAP IBP's UI guidelines.

* Option C: The values of the attribute-based total at the highest attribute level in the planning level can be changed This is incorrect. Subtotals are calculated aggregates and not directly editable at the highest level unless disaggregated. The planning level defines editable data, not subtotal overrides.

* Option D: Only attribute-based totals can be added to the planning view This is incorrect. Subtotals can also be time-based (e.g., by week, month) or key figure-based, not just attribute-based, depending on the view's configuration.

Thus, A and B reflect SAP IBP's subtotal functionality in planning views, per official documentation.

NEW QUESTION # 49

You are configuring disaggregation for the KF1 key figure in the Planning Areas Model Configuration app.

Which methods can you use? Note: There are 3 correct answers to this question.

- A. Disaggregation according to user-defined expression
- B. Disaggregation according to a helper key figure
- C. Disaggregation in batch triggered by an application job
- D. Proportional disaggregation by using KF2 in the expression
- E. Disaggregation according to an equal split

Answer: A,B,D

Explanation:

Disaggregation in SAP IBP distributes aggregated key figure values (e.g., KF1) to lower planning levels, configured in the Planning Areas app. Methods depend on SAP IBP's calculation framework.

* Option A: Disaggregation according to user-defined expression This is correct. Users can define custom expressions (e.g., based on attributes or calculations) in the key figure's disaggregation settings, a flexible feature in SAP IBP, per configuration documentation.

* Option B: Disaggregation according to an equal split This is incorrect in this context. While equal split is a default disaggregation method, it's not explicitly configurable as a distinct option in the Planning Areas app; it's automatic when no other method is specified.

* Option C: Disaggregation in batch triggered by an application job This is incorrect. Disaggregation occurs in real-time or during planning runs, not as a batch job. Application jobs handle tasks like data copy, not disaggregation logic.

* Option D: Disaggregation according to a helper key figure This is correct. A helper key figure (e.g., historical sales) can guide disaggregation proportions, a standard method in SAP IBP, per key figure setup guides.

* Option E: Proportional disaggregation by using KF2 in the expression This is correct. KF1 can disaggregate proportionally based on another key figure (KF2) via an expression (e.g., $KF1 = KF1 * (KF2 / SUM(KF2))$), a supported method in SAP IBP.

Thus, A, D, and E are configurable disaggregation methods, per SAP IBP's official capabilities.

NEW QUESTION # 50

.....

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things.

Especially for candidates to take the C_IBP_2502 exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our C_IBP_2502 training quiz give full consideration to this problem. And we can claim that if you study our C_IBP_2502 study materials for 20 to 30 hours, you can pass the exam for sure.

C_IBP_2502 Valid Test Registration: https://www.validdumps.top/C_IBP_2502-exam-torrent.html

Please get back to your ValidDumps C_IBP_2502 Valid Test Registration Member's Area, click the 'Exam Engine' icon next to the desired exam and then click 'Request Authorization Code' button, When it comes to the service after sell, we may have some worries that we cannot have the privilege to enjoy the best service of our C_IBP_2502 study guide, SAP C_IBP_2502 Reliable Exam Practice We promise you will enjoy this study.

Wh Will Make It All Work, So it is fair to Exam C_IBP_2502 Certification Cost say a large number of the self employed aren't happy, Please get back to your ValidDumps Member's Area, click the 'Exam Engine' C_IBP_2502 icon next to the desired exam and then click 'Request Authorization Code' button.
