Trend Micro Certified Professional for Deep Security Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following statements is true regarding Deep Security Relays?

- A. Both 32-bit and 64-bit Deep Security Agents can be promoted to a Deep Security Relay.
- B. Deep Security Relays are able to process Deep Security Agent requests during updates.
- **C. Deep Security Agents communicate with Deep Security Relays to obtain security up-dates.**
- D. Deep Security Agents promoted to Deep Security Relays no longer provide the security capabilities enabled by the Protection Modules.

Answer: C

NEW QUESTION # 13

The Intrusion Prevention Protection Module is enabled and a Recommendation Scan is run to identify vulnerabilities on a Windows Server 2016 computer. How can you insure that the list of recommendations is always kept up to date?

- **A. Enable "Ongoing Scans" to run a recommendation scan on a regular basis. This will identify new Intrusion Prevention rules to be applied.**
- B. New rules are configured to be automatically sent to Deep Security Agents when Recommendation Scans are run.
- C. Disabling, then re-enabling the Intrusion Prevention Protection Module will trigger a new Recommendation Scan to be run. New rules will be included in the results of this new scan.
- D. Recommendation Scans are only able to suggest Intrusion Prevention rules when the Protection Module is initially enabled.

Answer: A

Explanation:

Ongoing Scans is a feature that enables Deep Security to perform Recommendation Scans at a scheduled interval, ensuring new vulnerabilities or rule updates are continually identified and recommended for enforcement.

From the official documentation:

"Ongoing Scans enable Deep Security to regularly re-run recommendation scans, ensuring that newly discovered vulnerabilities and updated IPS rules are continuously recommended for application." References:

Trend Micro Deep Security Administrator's Guide: Recommendation Scans

Deep Security Help: Ongoing Recommendation Scans

NEW QUESTION # 14

Based on the details of event displayed in the exhibit, which of the following statements is false?

- A. The scan may be generated from an IP address which may be known to you. If so, the source IP address can be added to the reconnaissance whitelist.
- B. The Intrusion Prevention Protection Modules must be enabled to detect reconnaissance scans.
- C. You can create a firewall rule to permanently block traffic from the originating IP address.
- D. You can instruct the Deep Security Agents and Appliances to block traffic from the source IP address for a period of time.

Answer: A

NEW QUESTION # 15

What is the purpose of the override.properties file?

- A. This file contains the original out-of-the-box configuration properties for Deep Security Manager. This file is renamed to dsm.properties upon initialization of Deep Security Manager.
- B. This file allows properties to be tested on Deep Security Manager without affecting the original configuration.
- C. This file allows Deep Security Agents to override enforced behavior by providing new policy configuration details.
- D. This file is used to transfer policy settings from one installation of Deep Security Manager to another

Answer: B

Explanation:

The properties specified in this configuration file override the properties specified in the dsm.properties file.

This file can be created manually by a support engineer to modify product behavior without affecting the original configuration.

Explanation: Study Guide - page (42)

NEW QUESTION # 16

When viewing the details for a policy, as displayed in the exhibit, you notice that the Application Control Protection Module is not available. In this example, why would this Protection Modules not be available?

- A. The Application Control Protection Module is only supported on Linux computers, the policy details displayed are for Windows computers only.
- B. The Application Control Protection Modules has not been enabled for this tenant.
- C. The Application Control Protection Module has been disabled at the Base Policy level and is not displayed in the details for child policies.
- D. An Activation Code for the Application Control Protection Module has not been provided. Unlicensed Protection Modules will not be displayed.

Answer: D

Explanation:
