If our customers want to evaluate the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) exam dumps before paying us, they can download a free demo as well.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

But with our platform, you can access updated SAP C-ACDET-2506 Practice Questions and pass the certification test on your first try. Don't let a lack of credible study materials hold you back - trust our platform to help you achieve your career goals.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q53-Q58):

NEW QUESTION # 53

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- B. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- **C. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location**
- D. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.

Answer: C

NEW QUESTION # 54

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- **A. Realize**
- B. Configure
- C. Deploy
- D. Setup

Answer: A

Explanation:

The Realize phase is where the core configuration activities happen. During Realize, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. Deploy is focused on cutover and go-live, while Configure and Setup are not formal SAP Activate phases for Ariba.

NEW QUESTION # 55

How do you format the Help Tip for a field?

- A. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.
- **B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting**
- C. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- D. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and use regular keyboard controls such as Ctrl-I, Ctrl-B

Answer: B

NEW QUESTION # 56

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. AMLExtension - AML customizations such as custom fields
- B. Template - project templates such as Contract templates
- **C. SupplierContact - contacts for the suppliers**
- D. DynamicForm - custom form templates (dForms)

Answer: C

Explanation:

The Intelligent Configuration Manager (ICM) migrates configuration types such as DynamicForms (dForms), AML Extensions (custom fields and enumerations), and Templates (contract or project templates). However, SupplierContactdata, which is master or transactional data, is not migrated through ICM because ICM focuses on configuration migration, not operational or transactional data. Supplier contact information is managed separately and must be migrated using appropriate master data processes.

NEW QUESTION # 57

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Partner Statement of Work
- B. Onboard Resource Center
- C. Inline Help
- **D. Deployment Description**

Answer: D

Explanation:

The Deployment Description document formally defines the scope, roles, and responsibilities of the SAP Deployment Lead within a specific SAP Ariba project. It provides clarity on tasks such as migration coordination, technical issue resolution, and stakeholder communication. Other documents like the Onboard Resource Center provide logistical support, the Partner Statement of Work focuses on partner deliverables, and Inline Help offers in-application guidance-not role definitions. The Deployment Description is the authoritative reference for deployment lead responsibilities.

NEW QUESTION # 58
