SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Development system
- B. Sandbox system
- C. Trial system
- D. Starter system
- E. Test system

Answer: B,D,E

Explanation:

* Sandbox system: This is an optional system that can be used to explore the SAP S/4HANA Cloud Public Edition capabilities and features before the implementation project starts. It is not connected to the starter system or the test system and does not have any data migration or configuration tools. It can be refreshed on demand by the customer1.

* Starter system: This is the first system that is provisioned for the customer after the contract is signed.

It is used to perform the fit-to-standard workshops, where the customer validates the standard processes and identifies the gaps and requirements. It also serves as the configuration system, where the customer configures the business processes using the SAP Central Business Configuration tool. The starter system is connected to the test system and can transfer the configuration and master data to it2.

* Test system: This is the second system that is provisioned for the customer after the starter system is configured. It is used to perform the integration testing, user acceptance testing, data migration, and cutover activities. It also serves as the production system, where the customer runs the live business processes after the go-live. The test system is connected to the starter system and can receive the configuration and master data from it3.

The systems that are not used to implement SAP S/4HANA Cloud Public Edition for a customer are:

* Trial system: This is a system that can be used to experience the SAP S/4HANA Cloud Public Edition solution for a limited time. It is not connected to any other system and does not have any data migration or configuration tools. It is not part of the

implementation project and does not require a contract⁴.

* Development system: This is a system that can be used to develop custom applications or extensions using the SAP Business Technology Platform. It is not part of the SAP S/4HANA Cloud Public Edition landscape and does not have any data migration or configuration tools. It requires a separate contract and license.

Answer: A,B

NEW QUESTION # 44

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Assign a different business role that provides access.
- **B. Use the search function to find the app.**
- C. Assign a launchpad space to the business role.
- D. Create a page and assign it to the launchpad space.

Answer: B

Explanation:

When an end user has been assigned a business role that grants access to only one specific application, and the app does not appear on the user's SAP Fiori Launchpad, the recommended action for the user is:

* Use the search function to find the app: The search function on the SAP Fiori Launchpad allows users to locate applications by

their name or related keywords. Even if the app is not immediately visible on the launchpad due to configuration issues or other reasons, using the search function can help the user access the app directly. This is a quick and effective way for users to access necessary applications when they encounter visibility issues on their launchpad.
