Cloud flow	☐ Power Automate portal only ☐ Power Automate Desktop only ☐ Either Power Automate portal or Power Automate for desktop
Desktop flow	☐ Power Automate portal only ☐ Power Automate Desktop only ☐ Either Power Automate portal or Power Automate for desktop

Explanation:

Answer Area

Flow type	Action
Cloud flow	☒ Power Automate portal only ☐ Power Automate Desktop only ☐ Either Power Automate portal or Power Automate for desktop
Desktop flow	☒ Power Automate portal only ☐ Power Automate Desktop only ☐ Either Power Automate portal or Power Automate for desktop

NEW QUESTION # 84

You need to package the automations. What should you do?

- A. Show dependencies within the solution.
- B. Remove unmanaged layers.
- C. Add existing components to the solution.
- **D. Add required components to each item within the solution.**

Answer: D

Explanation:

According to the scenario, you want to package all your automations into a single solution that can be easily deployed across environments. To do this, you need to add existing components to the solution, such as cloud flows, desktop flows, connections, and custom connectors. This way, you can bundle all your related resources into one package and export or import it as needed.

NEW QUESTION # 85

You need to determine the causes for the reported issues.

What are the causes? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Cause
New environment	☐ Flow checker did not run. ☐ Admin mode is turned on. ☐ Admin mode is turned off. ☐ A connector was added to a DLP policy.
FlowA	☐ The user is in the wrong environment. ☐ The user does not have the correct permissions.
Dataverse error	☐ There is no Microsoft Dataverse database provisioned. ☐ The user did not sign into Power Automate by using a Microsoft work account. ☐ Microsoft Dataverse was not shared with the user from the development environment.

Answer:

Explanation:

Answer Area

Issue	Cause
New environment	☒ Flow checker did not run. ☒ Admin mode is turned on. ☒ Admin mode is turned off. ☒ A connector was added to a DLP policy.
FlowA	☒ The user is in the wrong environment. ☒ The user does not have the correct permissions.
Dataverse error	☒ There is no Microsoft Dataverse database provisioned. ☒ The user did not sign into Power Automate by using a Microsoft work account. ☒ Microsoft Dataverse was not shared with the user from the development environment.

Explanation:
