- A. Endpoints will be quarantined through FortiSwitch
- B. Endpoints will be quarantined through EMS
- C. Endpoints will be banned on FortiGate
- D. An email notification will be sent for compromised endpoints

Answer: B

* The action specified for this trigger is "Quarantine FortiClient via EMS."

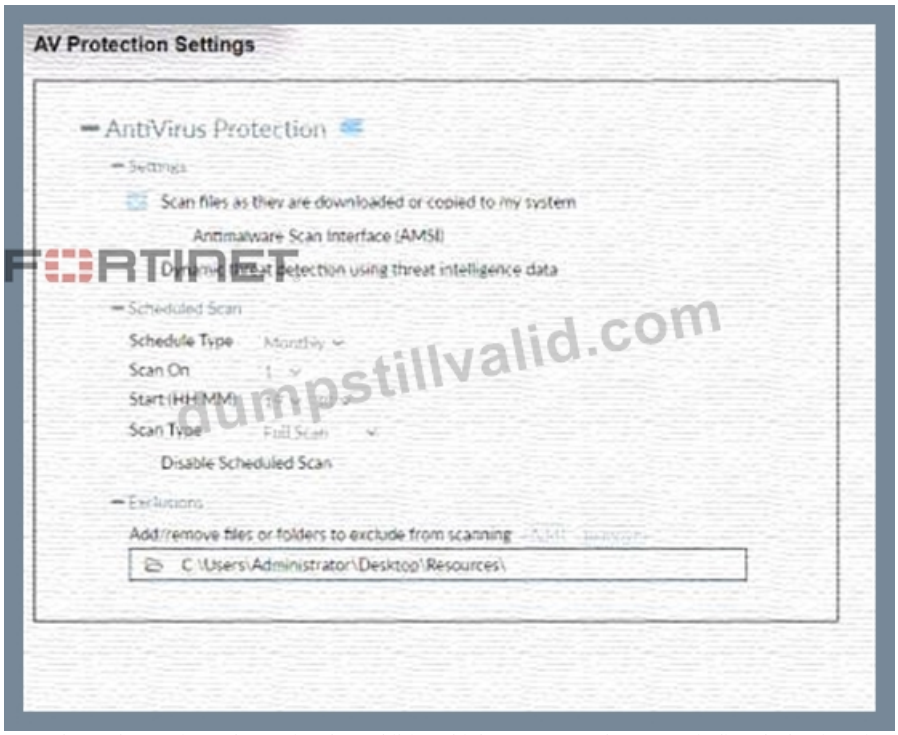
NEW QUESTION # 64
Refer to the exhibit.



Based on The settings shown in The exhibit, which statement about FortiClient behaviour is Hue?

- A. FortiClientblocks and deletes infected files after scanning them.
- B. FortiClient quarantines infected ties and reviews later, after scanning them.
- C. FortiClientcopies infected files to the Resources folder without scanning them.
- D. FortiClientscans infected files when the user copies files to the Resources folder.

Answer: D

Explanation:
Based on the settings shown in the exhibit, FortiClient is configured to scan files as they are downloaded or copied to the system. This means that if a user copies files to the "Resources" folder, which is not listed under exclusions, FortiClient will scan these files for infections. The exclusion path mentioned in the settings, "C:\Users\Administrator\Desktop\Resources", indicates that any files copied to this specific folder will not be scanned, but since the question implies that the "Resources" folder is not the same as the excluded path, FortiClient will indeed scan the files for infections.
