

Energy-and-Utilities-Cloud Examcollection Dumps - Energy-and-Utilities-Cloud Certified

P.S. Free & New Energy-and-Utilities-Cloud dumps are available on Google Drive shared by 2Pass4sure:
<https://drive.google.com/open?id=1cnLI7uBfjQLXkHBI5pP6sqKwIBLZ00p>

The primary reason behind their failures is studying from Salesforce Energy-and-Utilities-Cloud exam preparation material that is invalid. Due to the massive popularity of the Salesforce Energy and Utilities Cloud Accredited Professional Exam (Energy-and-Utilities-Cloud) exam, 2Pass4sure have come forward to offer authentic and real Selling Energy-and-Utilities-Cloud Exam Questions so that its valued customers can prepare successfully in a short time. The product provided by 2Pass4sure are available in three formats. These formats contain Salesforce Energy-and-Utilities-Cloud Exam Questions that are relevant to the Salesforce Energy and Utilities Cloud Accredited Professional Exam (Energy-and-Utilities-Cloud) actual exam. The Selling Salesforce Energy and Utilities Cloud Accredited Professional Exam (Energy-and-Utilities-Cloud) practice test material for 2Pass4sure are there to download after your purchase.

Salesforce Energy-and-Utilities-Cloud Exam Syllabus Topics:

Topic	Details
Topic 1	• Solution Design: Solution design evaluates expertise in mapping Energy and Utilities Cloud components to current architectures and crafting future state designs that fulfill business and data model requirements. Energy and Utilities Cloud professionals must demonstrate the ability to define architecture, processes, and security considerations while leveraging deployment tools.
Topic 2	• Implementation: The topic assesses the ability to configure Energy and Utilities Cloud to meet business models, manage licenses, set up order capture, and enable post-sales processes. It also measures proficiency in executing data migration, integrating third-party systems, and deploying relevant components.
Topic 3	• Test and Deploy Energy and Utilities Cloud Applications and Solutions: This topic evaluates the capacity of Energy and Utilities Cloud professionals to outline and execute a deployment plan that integrates Salesforce core and Vlocity components. Mastery includes validating processes, enabling user testing, and managing UAT milestones.

Topic 4	• Discovery: Mastering discovery ensures proficiency of Energy and Utilities Cloud professionals in understanding and documenting customer needs, aligning stakeholder requirements, and analyzing current business processes for Energy and Utilities Cloud solutions. This foundational topic measures the ability to identify gaps in processes and architecture compared to standard product capabilities.

Salesforce Energy-and-Utilities-Cloud Certified & Energy-and-Utilities-Cloud Related Content

The content and design of our Energy-and-Utilities-Cloud learning quiz are all perfect and scientific, and you will know it when you use this. Of course, we don't need you to spend a lot of time on our Energy-and-Utilities-Cloud exam questions. As long as you make full use of your own piecemeal time after 20 to 30 hours of study, you can go to the exam. The users of our Energy-and-Utilities-Cloud Study Materials have been satisfied with their results. I believe you are the next person to pass the exam!

Salesforce Energy and Utilities Cloud Accredited Professional Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

How is the Energy and Utilities Cloud solution installed on an org?

- A. Its included as part of core and will be deployed when licenses are purchased
- B. The functionality is unlocked based on the license types assigned to the org
- C. A specialized org that Salesforce creates with the solution installed is required
- **D. Its installed as a managed package and unmanaged components**

Answer: D

Explanation:

The Salesforce Energy and Utilities Cloud solution is typically installed in a Salesforce org as a combination of a managed package along with unmanaged components. The managed package includes the core functionalities and objects that are part of the Energy and Utilities Cloud framework, ensuring consistency and support across different orgs. The unmanaged components allow for customization and extension specific to the organization's needs, enabling them to tailor the solution to their unique business processes and requirements. References= The process for installing Salesforce Energy and Utilities Cloud, including the distinction between managed and unmanaged components, is detailed in the Salesforce documentation and the Energy and Utilities Cloud installation guide, available on the Salesforce website or through the Salesforce

NEW QUESTION # 57

What tool should be used to migrate configurations from sandbox to production when a customer has completed configuring OmniStudio components?

- A. Salesforce Export Wizard
- B. IDX Workbench
- C. DataLoader.io
- **D. OmniStudio DataPacks**

Answer: D

Explanation:

When migrating configurations, especially those related to OmniStudio components from a sandbox to production environment in Salesforce, OmniStudio DataPacks are the recommended tool. OmniStudio DataPacks, part of the Salesforce DevOps toolkit, allow for the bundling and deployment of complex configurations and metadata associated with OmniStudio components. This tool is specifically designed to handle the intricate dependencies and settings of OmniStudio components, ensuring a seamless and error-free migration process. Reference = Salesforce documentation on OmniStudio deployment and migration strategies emphasizes the use of OmniStudio DataPacks for effective configuration migrations. This is outlined in the Salesforce OmniStudio Developer Guide,

which provides detailed instructions on using DataPacks for deploying OmniStudio solutions:
<https://developer.salesforce.com/docs/atlas.en-us.omnistudio.meta/omnistudio/>

NEW QUESTION # 58

An energy company wants to accurately price quotes for new, small and medium businesses, which two scenarios would require integration to a third-party system?

- A. Credit ratings are actively used as a pricing input for small and medium business customers
- B. The potential customer began their journey using WhatsApp.
- C. Some customers existed on a legacy billing system from previous contracts
- D. Meter technical data is required from the Distributed System Operator (DSO) in order to confirm supply is possible

Answer: A,D

Explanation:

For accurately pricing quotes for new, small, and medium business customers, integration with third-party systems is necessary in scenarios where meter technical data is required from the Distributed System Operator (DSO) to confirm supply capability (B), and where credit ratings are used as a pricing input (D). Integrating with the DSO's systems ensures accurate supply feasibility assessments, while integrating with credit rating agencies provides the necessary financial risk insights to inform pricing decisions effectively. References= Salesforce Energy and Utilities Cloud documentation on pricing and quoting emphasizes the need for accurate data, which may require integration with external systems for meter data and credit assessments. Information on integrating Salesforce with external systems for enhanced quoting accuracy can be found in Salesforce's integration and API documentation: <https://developer.salesforce.com/docs/atlas.en-us.api.meta/api/>

NEW QUESTION # 59

When considering data mastery in Energy and Utilities Cloud, which two types of data should remain mastered in the relevant legacy application?

- A. Case related data
- B. Contact data
- C. Meter reading data
- D. Billing related data

Answer: C,D

Explanation:

In the context of data mastery in Salesforce Energy and Utilities Cloud, certain types of data should remain mastered in the relevant legacy applications due to their specialized nature and the complexities involved in their management. These include: C. Meter Reading Data: Typically generated by systems dedicated to capturing and processing readings from energy meters. This data is central to billing and consumption analysis and often requires specialized systems to manage. D. Billing Related Data: Involves complex calculations, tariff management, and financial transactions. Legacy billing systems are usually deeply integrated with financial management processes and may be subject to regulatory compliance requirements. Keeping these data types mastered in their respective legacy systems while integrating them with Salesforce for visibility and customer service can offer the best balance of specialized control and comprehensive customer management. References= Salesforce Energy and Utilities Cloud documentation often discusses integration strategies for legacy systems, particularly for critical and complex data types like meter readings and billing information, highlighting best practices for achieving a comprehensive view of customer data: https://developer.salesforce.com/docs/atlas.en-us.industries_energy_and_utilities.meta/industries_energy_and_utilities/

NEW QUESTION # 60

An energy company implementing Energy and Utilities Cloud needs to generate a contract from its proposals that include up to 100 line items, with its template already built in a DOCX file. According to the new company branding, custom fonts were used.

- A. Client-Side generation, as Server-Side doesn't support DOCX templates
- B. Client-Side generation, as this doesn't have a high number of line items
- C. Using the Contract Lifecycle Management, which Document Generation mechanism should the administrator recommend?
- D. Server-Side generation, as Client-Side doesn't support custom fonts
- E. Server-Side generation, as this has a high number of line items

Answer: B

NEW QUESTION # 61

.....

Facing the incoming Salesforce Energy-and-Utilities-Cloud Exam, you may feel stained and anxious, suspicious whether you could pass the exam smoothly and successfully. Actually, you must not impoverish your ambition. Our suggestions are never boggle at difficulties. It is your right time to make your mark. Preparation of exam without effective materials is just like a soldier without gun.
