Choose 2 answers

- A. Select Self-Serve Portal components from the Energy and Utilities Cloud industry Process Library.
- B. Create an Experience cloud site to set up a sample digital experience site on your target org.
- C. Set up Utilities self-serve templates on your target org.
- D. Create customer community user profiles for the Utilities self-serve portal.

Answer: B,C

NEW QUESTION # 20

An administrator for an energy company recently built a new FlexCard that shows whether a customer is enrolled in autopay. How can the administrator put the new FlexCard in the Energy and Utilities Cloud Contact Center Console?

- A. Edit the Lightning Record or App Builder and place the FlexCard LIC onto the page.
- B. Create a VisualForce Page wrapper for the FlexCard and add it onto the page.
- C. Open the object's page layout and add the FlexCard LWC ante the layout.
- D. Create a Lightning Web Component wrapper for the FlexCard and add it onto the page.

Answer: A

NEW QUESTION # 21

A company's energy and utilities org uses Permission Set Licenses What are the two methods to control users access to features and functionality?

- A. Managed Package Licenses
- B. Sharing Settings
- C. Permission Sets
- D. Permission SetGroups

Answer: C,D

Explanation:

In Salesforce Energy and Utilities Cloud, as well as across the Salesforce platform, controlling user access to features and functionality can be effectively managed using Permission Sets and Permission Set Groups.

* Permission Sets are collections of settings and permissions that grant access to various tools and functions within Salesforce. They can be used to extend users' access rights without altering their primary profile.

* Permission Set Groups are a way to organize Permission Sets, making it easier to assign and manage access for users. They allow administrators to bundle multiple Permission Sets into a single assignment, streamlining the process of granting necessary permissions to users. These tools are essential for tailoring access controls to meet the specific needs of an organization and ensuring that users have the appropriate level of access to perform their roles. References= Salesforce documentation provides detailed information on managing user access with Permission Sets and Permission Set Groups, emphasizing their importance in configuring secure and functional access controls within the Salesforce platform: https://help.salesforce.com/articleView?id=perm_sets_overview.htm&type=5

NEW QUESTION # 22

Which four objects does the EnergyRuntimeServiceSFS sample permission set give View All and Modify All permissions to a user?

- A. Work Order. Work Type. Service Appointment. Service Territory
- B. Work Order. Work Order Line Item Work Procedure. Work Plan
- C. Work Order. Work Order Line item. Service Territory. Work Type
- D. Work Order. Work Order Line Item, Service Appointment, Work Type

Answer: D

Explanation:

The EnergyRuntimeServiceSFS sample permission set within Salesforce Energy and Utilities Cloud grants "View All" and "Modify All" permissions to a user for the following objects: A. Work Order, Work Order Line Item, Service Appointment, Work Type. These permissions ensure that users assigned to this permission set have comprehensive access to manage and update records related to service fulfillment, including detailing the work to be done (Work Order and Work Order Line Item), scheduling and managing appointments for service execution (Service Appointment), and defining the nature of the work (Work Type). This level of

access is critical for roles that are involved in the planning, scheduling, and execution of service orders within the utility sector. Reference = Salesforce documentation on service and field service management, including the configuration of permission sets for service operations, provides insights into the setup and customization of access controls for managing work orders and service appointments: https://help.salesforce.com/articleView?id=fs_perm_sets.htm&type=5
