Salesforce Energy and Utilities Cloud Accredited Professional Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

A utility customer runs the majority of their current processes using backoffice CIS, billing, and other thirdparty integrations. As part of the enterprise digital transformation initiative to improve end-to-end experiences, they chose Energy and Utilities Cloud with an incremental rollout strategy, beginning with employee transformation.

What solution component of Energy and Utilities Cloud should be recommended and mapped to get them started on the transformation journey?

- A. utility 360
- B. utility Cx
- C. Partner Management

Answer: A

NEW QUESTION # 49

Which four objects does the EnergyRuntimeServiceSFS sample permission set give View All and Modify All permissions to a user?

- A. Work Order. Work Order Line Item Work Procedure. Work Plan
- B. Work Order. Work Type. Service Appointment. Service Territory
- C. Work Order. Work Order Line item. Service Territory. Work Type
- **D. Work Order. Work Order Line Item, Service Appointment, Work Type**

Answer: D

Explanation:

The EnergyRuntimeServiceSFS sample permission set within Salesforce Energy and Utilities Cloud grants "View All" and "Modify All" permissions to a user for the following objects: A. Work Order, Work Order Line Item, Service Appointment, Work Type. These permissions ensure that users assigned to this permission set have comprehensive access to manage and update records related to service fulfillment, including detailing the work to be done (Work Order and Work Order Line Item), scheduling and managing appointments for service execution (Service Appointment), and defining the nature of the work (Work Type). This level of access is critical for roles that are involved in the planning, scheduling, and execution of service orders within the utility sector. Reference = Salesforce documentation on service and field service management, including the configuration of permission sets for service operations, provides insights into the setup and customization of access controls for managing work orders and service appointments: https://help.salesforce.com/articleView?id=fs_perm_sets.htm&type=5

NEW QUESTION # 52

An energy utility company is implementing the Customer Acquisition Management application. The application should support unauthenticated self-serve portal users.

What's the preferred method to configure the application security to meet the requirement?

- A. The Customer Acquisition Management application cannot support unauthenticated self-serve portal users.
- B. A consultant should assign an EnergyRuntimeSales sample permission set to the Guest User profile and an

EnergyRuntimeSalesCustomerCommunityUser sample permission set to customer community users.

- C. A consultant should create new permission sets to grant appropriate access to all required objects.
- D. A consultant should assign an EnergyRuntimeB2CSales sample permission set to the Guest User profile and an EnergyRuntime82CSalesCustomerCommunityUser sample permission set to customer community users.

Answer: D

Explanation:

For the Customer Acquisition Management application to support unauthenticated self-serve portal users, the correct configuration of permission sets is crucial. The EnergyRuntimeB2CSales sample permission set designed for Guest User profiles enables unauthenticated users to interact with necessary parts of the application without compromising security or functionality. Additionally, the EnergyRuntimeB2CSalesCustomerCommunityUser permission set provides authenticated community users with appropriate access rights, ensuring a seamless user experience across both authenticated and unauthenticated scenarios.

Reference = The setup and configuration of these permission sets are discussed in the Salesforce Energy and Utilities Cloud security and user management documentation, ensuring applications like Customer Acquisition Management are accessible yet secure.
