Every student faces just one problem and that is not finding updated study material. Applicants are always confused about where to buy real SAP C\_ACDET\_2506 Dumps Questions and prepare for the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C\_ACDET\_2506) exam in less time. Nowadays everyone is interested in getting the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C\_ACDET\_2506) certificate because it has multiple benefits for SAP career.

## SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li> </ul>

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Which of the following languages is used to define defaults on fields within Ariba?

- A. Javascript
- B. Ariba expression language**
- C. ABAP
- D. Python programming language

**Answer: B**

### NEW QUESTION # 14

Who leads Suite Integration activities?

- A. SAP Support
- B. Customer Success Manager
- C. Partner/Customer Functional Lead
- D. SAP Deployment Lead**

**Answer: D**

Explanation:

The SAP Deployment Lead is responsible for leading Suite Integration activities across SAP Ariba solutions.

This role acts as the primary coordinator and facilitator for integration efforts, ensuring smooth data flow, process alignment, and technical synchronization between sourcing, procurement, contracts, and other modules in the Ariba suite. The Deployment Lead works closely with the customer's functional teams, partners, and technical specialists to manage integration scope, timelines, and troubleshooting.

SAP Support typically provides post-go-live assistance but does not lead integration planning. Functional leads focus on configuration and business processes but lack overarching integration responsibility. Customer Success Managers focus on adoption and satisfaction rather than technical integration.

Therefore, the Deployment Lead role is critical for coordinating complex multi-solution projects and ensuring a unified suite experience.

### NEW QUESTION # 15

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Project Studio
- **B. SAP Ariba Enablement Workbook**
- C. SAP for Me
- D. SAP Cloud Application Lifecycle Management

**Answer: B**

Explanation:

The SAP Ariba Enablement Workbook is an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

### NEW QUESTION # 16

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. Subsequent migration activities follow Bluefield deployment scenario.
- **B. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.**
- C. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- D. Subsequent migration activities will require a complete reconfiguration of existing solutions.

**Answer: B**

### NEW QUESTION # 17

A French translation of a custom field label needs to be updated. Where do you update it?

- A. Field Configuration + Label
- B. Layout tab
- **C. AML & Translations Upload**
- D. Customization Manager - Views

**Answer: C**

Explanation:

SAP Ariba handles translations for custom field labels, help tips, and validation messages through the AML & Translations Upload mechanism. Administrators export the translation JSON or spreadsheet file, update the French (or other language) entries, and then re-import the updated file to apply translations.

Field Configuration + Label (C) sets the base language label but does not manage translations for other languages. The Customization Manager Views and Layout tabs are unrelated to translation management.

This method centralizes translation management and supports multiple languages consistently across the application.

### NEW QUESTION # 18

.....

For one thing, the most advanced operation system in our company which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. For another thing, with the online app version of our C\_ACDET\_2506 actual exam, you can just feel free to practice the questions in our training materials on all kinds of electronic devices.
