

Enhance your Exam Preparation by using Real Palo Alto Networks NetSec-Pro Questions

P.S. Free & New NetSec-Pro dumps are available on Google Drive shared by TorrentValid: https://drive.google.com/open?id=1KtT-eGtnbO4PPQB51i-eMM0pO-YSW_iQ

However, you should keep in mind that to get success in the NetSec-Pro certification exam is not a simple and easy task. A lot of effort, commitment, and in-depth Palo Alto Networks Network Security Professional (NetSec-Pro) exam questions preparation is required to pass this NetSec-Pro Exam. For the complete and comprehensive Palo Alto Networks Network Security Professional (NetSec-Pro) exam dumps preparation you can trust valid, updated, and NetSec-Pro Questions which you can download from the TorrentValid platform quickly and easily.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 2	<ul style="list-style-type: none">• GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.

Topic 3	<ul style="list-style-type: none"> • Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

Buy Palo Alto Networks NetSec-Pro TorrentValid Exam Questions Today Save Time and Money

The clients can use the shortest time to prepare the exam and the learning only costs 20-30 hours. The questions and answers of our NetSec-Pro Exam Questions are refined and have simplified the most important information so as to let the clients use little time to learn. The client only need to spare 1-2 hours to learn our Palo Alto Networks Network Security Professional study question each day or learn them in the weekends. Commonly speaking, people like the in-service staff or the students are busy and don't have enough time to prepare the exam. Learning our Palo Alto Networks Network Security Professional test practice dump can help them save the time and focus their attentions on their major things.

Palo Alto Networks Network Security Professional Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which subscription sends non-file format-based traffic that matches Data Filtering Profile criteria to a cloud service to render a verdict?

- A. Advanced WildFire
- **B. Enterprise DLP**
- C. Advanced URL Filtering
- D. SaaS Security Inline

Answer: B

Explanation:

Enterprise DLP uses cloud analysis to inspect and classify sensitive data in non-file-based formats (e.g., in-line data streams, SaaS communications).

"Enterprise DLP inspects data in non-file-based traffic flows, forwarding suspicious data patterns to the cloud for classification and verdicts." (Source: Enterprise DLP Overview) The other services focus on file-based scanning (WildFire), URL access control (Advanced URL Filtering), or inline SaaS application controls (SaaS Security Inline).

NEW QUESTION # 35

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- **A. Strata Cloud Manager (SCM)**
- B. Prisma Cloud dashboard
- C. Service connection firewall
- **D. Strata Logging Service**

Answer: A,D

Explanation:

Threat logs for Prisma Access mobile users can be reviewed in both Strata Cloud Manager (SCM) and Strata Logging Service. Prisma Cloud and service connection firewalls are not directly tied to mobile user traffic logs.

"Prisma Access logs are available in the Strata Cloud Manager and can also be sent to the Strata Logging Service for detailed analysis and threat visibility." (Source: Prisma Access Administration Guide)

NEW QUESTION # 36

An administrator wants to implement additional Cloud-Delivered Security Services (CDSS) on a data center NGFW that already has one enabled. What benefit does the NGFW's single-pass parallel processing (SP3) architecture provide?

- A. It allows for traffic inspection at the application level.
- B. It allows additional security inspection devices to be added inline.
- C. There will be no additional performance degradation.
- D. There will be only a minor reduction in performance.

Answer: D

Explanation:

The SP3 architecture of Palo Alto NGFWs ensures that additional security services (CDSS) only cause a minor reduction in performance, as traffic is inspected once in a single pass.

"The single-pass parallel processing (SP3) architecture performs application identification and security enforcement simultaneously in one pass, resulting in only minor performance impacts when enabling multiple security services." (Source: SP3 Architecture) Unlike traditional multi-pass engines, SP3 architecture optimizes performance while delivering comprehensive security.

NEW QUESTION # 37

An NGFW administrator is updating PAN-OS on company data center firewalls managed by Panorama. Prior to installing the update, what must the administrator verify to ensure the devices will continue to be supported by Panorama?

- A. All devices are in the same template stack.
- B. Panorama is running the same or newer PAN-OS release as the one being installed.
- C. Device telemetry is enabled.
- D. Panorama is configured as the primary device in the log collecting group for the data center firewalls.

Answer: B

Explanation:

The firewall must be running a PAN-OS version that is supported by Panorama. This means that Panorama must be running the same or a newer PAN-OS version as the one being installed on the firewalls to maintain compatibility.

"Before you upgrade the firewall, ensure that Panorama is running the same or a later PAN-OS version than the firewall. Panorama must always be at the same or a higher version to maintain compatibility." (Source: Panorama Admin Guide - Upgrade Process)

NEW QUESTION # 38

How does Advanced WildFire integrate into third-party applications?

- A. Through customized reporting configured in NGFWs
- B. Through playbooks automatically sending WildFire data
- C. Through Strata Logging Service
- D. Through the WildFire API

Answer: D

Explanation:

Advanced WildFire supports direct integrations into third-party security tools through the WildFire API, enabling automated threat intelligence sharing and real-time verdict dissemination.

"WildFire exposes a RESTful API that third-party applications can leverage to integrate WildFire's analysis results and threat intelligence seamlessly into their own security workflows." (Source: WildFire API Guide) The API provides:

- * Verdict retrieval
- * Sample submission
- * Report retrieval

"Use the WildFire API to submit samples, retrieve verdicts, and obtain detailed analysis reports for integration with your existing security infrastructure." (Source: WildFire API Use Cases)
