

# Enhance your Exam Preparation by using Real UiPath UiPath-ADAv1 Questions

What's more, part of that DumpsTests UiPath-ADAv1 dumps now are free: [https://drive.google.com/open?id=1aQkqPtEaEYQosafRFWrDzp\\_HpqMEWvDr](https://drive.google.com/open?id=1aQkqPtEaEYQosafRFWrDzp_HpqMEWvDr)

In order to serve you better, we have a complete system for you if you choose us. We offer you free demo for UiPath-ADAv1 exam materials for you to have a try, so that you can have a better understanding of what you are going to buy. If you are quite satisfied with UiPath-ADAv1 exam materials and want the complete version, you just need to add them to cart and pay for it. You can receive the download link and password within ten minutes for UiPath-ADAv1 Training Materials, and if you don't receive, you can contact with us, and we will solve the problem for you. We also have after-service stuff, if you have any questions about UiPath-ADAv1 exam materials, you can consult us.

## UiPath UiPath-ADAv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Logging: The section provides insights into interpreting robot execution logs and adhering to logging best practices, ensuring effective issue identification and resolution.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>PDF Automation: The section focuses on data extraction from native and scanned PDFs, including single and multiple document scenarios.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Object Repository: This topic covers the creation, publication, and consumption of UI Libraries, including the use of static and dynamic descriptors, offering a structured approach to UI element management.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>Email Automation: This topic covers retrieving emails via IMAP</li><li>POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages.</li></ul>

Topic 8	<ul style="list-style-type: none"> <li>Integration Service: The section introduces Integration Service, explaining its purpose and demonstrating the use of connectors and triggers in automation projects to interact with external systems.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>UI Automation: Here, the topic explains how UI Automation works and offer guidance on using the Modern Recorder and associated activities. It also covers UI synchronization and the configuration of static and dynamic descriptors.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Data Manipulation: This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through DataTables.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Variables and Arguments: This topic introduces data types and delves into creating, managing, and utilizing variables, arguments, and global constants</li> <li>variables. It also clarifies the distinctions between these concepts, ensuring a comprehensive understanding of data handling in automation projects.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>Platform Knowledge: The section provides an overview of UiPath's product suite, including Studio and Robot variants, Orchestrator, and Integration Service, showcasing their unique contributions. It also emphasizes the benefits of Academy, Forum, and Marketplace in the UiPath ecosystem.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>Workflow Analyzer: Here, the topic introduces the Workflow Analyzer tool, explaining its use for project analysis and validation, and providing guidance on configuring its settings.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>Orchestrator: This topic covers the definition of Orchestrator entities, tenant entities, and folder entities, along with their respective functionalities. It also provides practical guidance on robot provisioning, workspace management, role assignments, and logging features.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>Studio Interface: Here, the topic guides users through installing Studio Community Edition and connecting to Orchestrator. It covers profile differences, backstage view options, compatibility modes, and package management. Additionally, it offers an in-depth exploration of the Studio interface and its various elements.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>Excel Automation: The section delves into Excel Automation, showcasing the use of modern Excel activities and workbook-level operations.</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>Business Knowledge: This topic covers the fundamental concepts of business process automation, highlighting its value proposition. It also explores key ideas related to business processes, offering a comprehensive understanding of this domain.</li> </ul>
Topic 18	<ul style="list-style-type: none"> <li>Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation.</li> </ul>
Topic 19	<ul style="list-style-type: none"> <li>Debugging: Here, we explore various debugging techniques, including debug modes, actions, and ribbon options. It also guides users through setting breakpoints, utilizing debugging panels, and optimizing performance with profile execution.</li> </ul>
Topic 20	<ul style="list-style-type: none"> <li>Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development.</li> </ul>

To meet the needs of users, and to keep up with the trend of the examination outline, our products will provide customers with latest version of our products. Our company's experts are daily testing our UiPath-ADAv1 study guide for timely updates. So we solemnly promise the users, our products make every effort to provide our users with the latest learning materials. As long as the users choose to purchase our UiPath-ADAv1 Exam Dumps, there is no doubt that he will enjoy the advantages of the most powerful update.

Most importantly, these continuously updated systems are completely free to users. As long as our UiPath-ADAv1 learning material updated, users will receive the most recent information from our UiPath-ADAv1 learning materials. So, buy our products immediately!

## UiPath Automation Developer Associate v1 Exam Sample Questions (Q60-Q65):

### NEW QUESTION # 60

Which LINQ method is used to filter data in a List or Data Table based on a condition?

- A. OrderBy
- B. GroupBy
- C. Where
- D. Select

**Answer: C**

Explanation:

Explanation

The Where method is used to filter data in a List or Data Table based on a condition. It returns a new collection that contains only the elements that satisfy the condition<sup>1</sup>2. The other methods are used for different purposes: OrderBy for sorting, GroupBy for grouping, and Select for projecting<sup>3</sup>.

How to use LINQ [Basic to Advanced] in UiPath event description, Introduction section

### NEW QUESTION # 61

A developer defines new log fields using the Add Log Fields activity. When will the custom log fields stop being added to the robot execution logs?

- A. When a Log Message activity is executed with Log Level = Warn or higher.
- B. When the first Log Message activity is executed.
- C. When an Exception is caught and handled.
- D. When a Remove Log Fields activity is used to remove them.

**Answer: D**

Explanation:

Explanation

The Add Log Fields activity adds custom log fields to the Robot Execution Logs for every Log Message execution throughout the entire workflow<sup>1</sup>. The custom log fields will persist until a Remove Log Fields activity is used to remove them<sup>2</sup>. The other options are not correct.

### NEW QUESTION # 62

A developer has opened a pre-existing workflow that utilizes UI Automation within Google Chrome, but the Google Chrome extension has not been installed on their computer.

What steps should the developer take to install the Google Chrome extension from UiPath Studio?

Instructions: Drag the Description found on the left and drop it on the correct Step Sequence found on the right.

Description	Step Sequence
Click, "UiPath Extensions".	Step 1
Navigate to "Home" and click, "Tools"	Step 2
Open Google Chrome and click the "Enable extension" pop-up	Step 3
Click the "Install" button for Google Chrome.	Step 4

**Answer:**

Explanation:

Description	Step Sequence
Click, "UiPath Extensions".	Step 1
Navigate to "Home" and click, "Tools"	Step 2
Open Google Chrome and click the "Enable extension" pop-up	Step 3
Click the "Install" button for Google Chrome.	Step 4

Explanation:

Correct Step Sequence:

- \* Navigate to "Home" and click "Tools"
- \* Click "UiPath Extensions"
- \* Click the "Install" button for Google Chrome
- \* Open Google Chrome and click the "Enable extension" pop-up
- \* Step 1: First, navigate to the Home tab in UiPath Studio and click on Tools to access the extension settings.
- \* Step 2: Then, select UiPath Extensions to find available extensions for different browsers.
- \* Step 3: Click on the Install button for Google Chrome to start the installation.
- \* Step 4: Finally, open Google Chrome, and a pop-up will appear asking to enable the extension-this step ensures the extension is active.

### NEW QUESTION # 63

A developer wants to retrieve the value of a column from a DataRow object. Which activity can be used?

- A. For Each Row in Data Table
- B. Get from Collection
- C. Get Row Item
- D. Lookup Data Table

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The Get Row Item activity is used to retrieve a specific column value from a DataRow object.

Step-by-Step Execution Guide: Retrieving a Column Value

Scenario:

A bot is processing an Excel sheet with customer records:

ID

Name

Email

1

```

Alice
alice@example.com
2
Bob
bob@example.com
1## Use Read Range to store data in a DataTable (dt_Customers).2## Use a For Each Row activity to iterate through rows.3##
Use Get Row Item to extract the "Email" column value.
For Each row In dt_Customers
    email = row.Item("Email").ToString()
    Log Message: email ' Outputs customer emails
Next
Real-World Use Case: Extracting Order Data from a Database
# A bot is processing customer orders from an SQL database.
* Retrieves orders into a DataTable.
* Uses Get Row Item to extract:
* Order Number
* Total Price
* Customer Email
* Uses the extracted data to send email confirmations.
# This ensures smooth automation of order processing!
Why the other options are incorrect?
# B. Get from Collection - Used for retrieving values from dictionaries, not DataRows.
# C. For Each Row in Data Table - Iterates through rows, but does not retrieve specific column values.
# D. Lookup Data Table - Used for searching values in a table, not retrieving a column from a row.
# Reference:
* UiPath Documentation: Get Row Item Activity
* UiPath Academy: DataTable Manipulation

```

#### NEW QUESTION # 64

Which logging level includes the following information by default?

1. Execution Started log entry - generated every time a process is started.
  2. Execution Ended log entry - generated every time a process is finalized.
  3. Transaction Started log entry - generated every time a transaction item is obtained by the robot from Orchestrator.
  4. Transaction Ended log entry - generated every time the robot sets the transaction status to either Success or Failed.
  5. Activity Information log entry - generated every time an activity is started, faulted or finished inside a workflow.
  6. Arguments and Variables Information log entry - show values of the variables and arguments that are used.
- A. Trace
  - **B. Verbose**
  - C. Critical
  - D. Information

**Answer: B**

Explanation:

The Verbose logging level includes all the information that is logged by the other levels, plus the values of the variables and arguments that are used in the process<sup>1</sup>. By default, the Verbose level includes the following log entries<sup>2</sup>:

Execution Started

Execution Ended

Transaction Started

Transaction Ended

Activity Information

Arguments and Variables Information
