We can make sure that if you purchase our NSE5_FSM-6.3 exam questions, you will have the right to enjoy our perfect after sale service and the high quality products. So do not hesitate and buy our NSE5_FSM-6.3 study guide, we believe you will find surprise from our exam products. And not only you can enjoy the service before you pay for our NSE5_FSM-6.3 learning guide, you can also have the right to have free updates for one year after your purchase.

Fortinet NSE5_FSM-6.3 Certification Exam is a comprehensive exam that comprises multiple-choice questions. To pass the exam, one needs to demonstrate a thorough understanding of the FortiSIEM 6.3 solution, its features, and how to use them to monitor and manage network security effectively. Fortinet NSE 5 - FortiSIEM 6.3 certification exam is an excellent way to validate one's skills in the field of network security and increase their employability.

Fortinet NSE5_FSM-6.3 Exam is designed for IT professionals who have experience working with FortiSIEM solutions and want to validate their skills and knowledge in this area. It is also suitable for networking professionals who want to expand their knowledge and skills in network security, security event and log management, and compliance reporting. Participants who pass the exam will receive the Fortinet NSE 5 - FortiSIEM 6.3 certification, which is recognized by employers and industry professionals worldwide.

NSE5_FSM-6.3 Test Fee - NSE5_FSM-6.3 High Passing Score

It is well known, to get the general respect of the community needs to be achieved by acquiring knowledge, and a harvest. Society will never welcome lazy people, and luck will never come to those who do not. We must continue to pursue own life value, such as get the test NSE5_FSM-6.3 Certification, not only to meet what we have now, but also to constantly challenge and try something new and meaningful.

Fortinet NSE5_FSM-6.3 (Fortinet NSE 5 - FortiSIEM 6.3) Exam is a certification exam that is designed for professionals who want to validate their skills and knowledge in using the FortiSIEM platform. FortiSIEM is a security information and event management (SIEM) platform that enables organizations to detect and respond to security threats in real-time. The Fortinet NSE5_FSM-6.3 Exam Tests the candidate's ability to configure and manage the FortiSIEM platform, as well as their understanding of SIEM concepts and best practices.

Fortinet NSE 5 - FortiSIEM 6.3 Sample Questions (Q17-Q22):

NEW QUESTION # 17

Refer to the exhibit.

```
[root@FSM_NSE5 bin]# ./phLicenseTool --collect license_req.dat
[PH_GENERIC_DEBUG]: [eventSeverity]=LM_DEBUG, [procName]=<unknown>, [fileName]=phMiscUtils.cpp,
[lineNumber]=992, [phLogDetail]=Interface eth0 ip = 192.168.69.109
License information collected to the output file: license_req.dat
```

An administrator is investigating a FortiSIEM license issue.

The procedure is for which offline licensing condition?

- A. The procedure is for offline license validation.
- **B. The procedure is for offline license registration.**
- C. The procedure is for offline license debug.
- D. The procedure is for offline license verification.

Answer: B

Explanation:

Offline Licensing in FortiSIEM: FortiSIEM provides mechanisms for offline licensing to accommodate environments without direct internet access.

License Tool Command: The command ./phLicenseTool --collect license_req.dat is used to collect license information necessary for offline registration.

Procedure Analysis: The exhibit shows the output of this command, which indicates the collection of license information to a file named license_req.dat.

Offline License Registration: This collected data file is then typically uploaded to the FortiSIEM support portal or provided to the FortiSIEM support team for processing and generating a license file.

References: FortiSIEM 6.3 Administration Guide, Licensing section, details the procedures for both online and offline license registration, including the use of the phLicenseTool for offline scenarios.

NEW QUESTION # 18

Which FortiSIEM feature must you use to produce a report on which FortiGate devices in your environment are running which firmware version?

- A. Run a CMDB report
- **B. Run a query using the Inventory tab.**
- C. Run a baseline report.
- D. Run an analytic search.

Answer: B

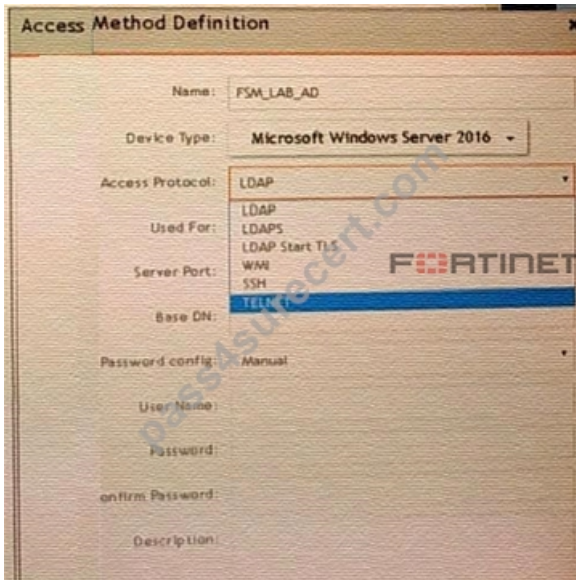

Explanation:

* Feature Overview: FortiSIEM provides several tools for querying and reporting on device information within an environment.

- * Inventory Tab: The Inventory tab is specifically designed to display detailed information about devices, including their firmware versions.
- * Query Functionality: Within the Inventory tab, you can run queries to filter and display devices based on specific attributes, such as the firmware version for FortiGate devices.
- * Report Generation: By running a query in the Inventory tab, you can produce a report that lists the FortiGate devices and their corresponding firmware versions.
- * Reference: FortiSIEM 6.3 User Guide, Inventory Management section, explains how to use the Inventory tab to query and report on device attributes.

NEW QUESTION # 19

Refer to the exhibit.

A FortiSIEM administrator wants to collect both SIEM event logs and performance and availability metrics (PAM) events from a Microsoft Windows server. Which protocol should the administrator select in the Access Protocol drop-down list so that FortiSIEM will collect both SIEM and PAM events?

- A. WMI
- B. LDAPS
- C. TELNET
- D. LDAP start TLS

Answer: A

Explanation:

Collecting SIEM and PAM Events: To collect both SIEM event logs and Performance and Availability Monitoring (PAM) events from a Microsoft Windows server, a suitable protocol must be selected.

WMI Protocol: Windows Management Instrumentation (WMI) is the appropriate protocol for this task.

* SIEM Event Logs: WMI can collect security, application, and system logs from Windows devices.

* PAM Events: WMI can also gather performance metrics, such as CPU usage, memory utilization, and disk activity.

Comprehensive Data Collection: Using WMI ensures that both types of data are collected efficiently from the Windows server.

References: FortiSIEM 6.3 User Guide, Data Collection Methods section, which details the use of WMI for collecting various types of logs and performance metrics.

NEW QUESTION # 20

An administrator is using SNMP and WMI credentials to discover a Windows device. How will the WMI method handle this?

- A. WMI method will collect only DNS logs.
- B. WMI method will collect only DHCP logs.
- C. WMI method will collect security, application, and system events logs.
- D. WMI method will collect only traffic and IIS logs.

Answer: D

Explanation:

WMI Method: Windows Management Instrumentation (WMI) is a set of specifications from Microsoft for consolidating the management of devices and applications in a network.

Log Collection: WMI is used to collect various types of logs from Windows devices.

* Security Logs: Contains records of security-related events such as login attempts and resource access.

* Application Logs: Contains logs generated by applications running on the system.

* System Logs: Contains logs related to the operating system and its components.

Comprehensive Data Collection: By using WMI, FortiSIEM can gather a wide range of event logs that are crucial for monitoring and analyzing the security and performance of Windows devices.

References: FortiSIEM 6.3 User Guide, Data Collection Methods section, which details the use of WMI for collecting event logs from Windows devices.

NEW QUESTION # 21

Refer to the exhibit.

Event Receive Time	Reporting IP	Event Type	User	Source IP	Application Category
09:12:11	10.10.10.10	Failed Logon	Ryan	1.1.1.1	Web App
09:12:56	10.10.10.11	Failed Logon	John	5.5.5.5	DB
09:15:56	10.10.10.10	Failed Logon	Ryan	1.1.1.1	Web App
09:20:01	10.10.10.10	Failed Logon	Paul	3.3.2.1	Web App
10:10:43	10.10.10.11	Failed Logon	Ryan	1.1.1.15	DB
10:45:08	10.10.10.11	Failed Logon	Wendy	1.1.1.6	DB
11:23:33	10.10.10.10	Failed Logon	Ryan	1.1.1.15	DB
12:05:52	10.10.10.10	Failed Logon	Ryan	1.1.1.1	Web App

It events are grouped by Event Type and User attributes in FortiSIEM. how many results will be displayed?

- A. Four results will be displayed.
- B. Eight results will be displayed.
- C. Two results will be displayed.
- D. No results will be displayed.

Answer: A

Explanation:

Grouping Events in FortiSIEM: Grouping events by specific attributes allows administrators to aggregate and analyze data more efficiently.

Grouping Criteria: In this case, the events are grouped by "Event Type" and "User" attributes.

Unique Combinations: To determine the number of results displayed, identify the unique combinations of the "Event Type" and "User" attributes in the provided data.

* Failed Logon by Ryan (appears multiple times but is one unique combination)

* Failed Logon by John

* Failed Logon by Paul

* Failed Logon by Wendy

Unique Groupings: There are four unique groupings based on the given data: "Failed Logon" by "Ryan", "John", "Paul", and "Wendy".

References: FortiSIEM 6.3 User Guide, Event Management and Reporting sections, which explain how events are grouped and reported based on selected attributes.
