NEW QUESTION # 305

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices.

What should you do first?

- A. Create a configuration profile.
- **B. Link your managed Google Play account to Intune.**
- C. Configure the Partner device management settings.
- D. Add a certificate connector.

Answer: B

NEW QUESTION # 306

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant.

You have a Microsoft 365 subscription

You plan to use Windows Autopilot to deploy new Windows devices.

You plan to create a deployment profile.

You need to ensure that The deployment meets the following requirements:

* Devices must be joined to AD DS regardless of their current working location.

* Users in the marketing department must have a line-of-business (LOB) app installed during the deployment.

The solution must minimize administrative effort.

What should you do for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Devices must be joined to AD DS regardless of their current working location:

The marketing department users must have an LOB app installed during the deployment:

Microsoft

Install the Intune connector for Active Directory.
 Deploy Always On VPN.
Install the Intune connector for Active Directory.
 Modify the Autopilot deployment profile.
 Edit the Co-management settings in Intune.

Modify the Autopilot deployment profile.
Modify the Autopilot deployment profile.
 Create a Microsoft Intune app deployment.
 Create a device configuration profile in Intune.

Answer:

Explanation:

Devices must be joined to AD DS regardless of their current working location:

The marketing department users must have an LOB app installed during the deployment:

Microsoft

Install the Intune connector for Active Directory.
 Deploy Always On VPN.
Install the Intune connector for Active Directory.
 Modify the Autopilot deployment profile.
 Edit the Co-management settings in Intune.

Modify the Autopilot deployment profile.
Modify the Autopilot deployment profile.
 Create a Microsoft Intune app deployment.
 Create a device configuration profile in Intune.

Explanation:

Answer Area

Devices must be joined to AD DS regardless of their current working location:

The marketing department users must have an LOB app installed during the deployment:

Microsoft

Install the Intune connector for Active Directory.

Modify the Autopilot deployment profile.

NEW QUESTION # 307

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain.

You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Azure service to provision:

Action to perform on the computers:

Microsoft

Log Analytics
 An Azure Storage account
 Azure Cosmos DB
 Azure SQL Database
Log Analytics

Install the Azure Monitor Agent
Create a collector-initiated subscription
 Install the Azure Monitor Agent
 Enroll in Microsoft Intune
 Register to Azure AD
