When you first contacted us with EAEP2201 quiz torrent, you may be confused about our EAEP2201 exam question and would like to learn more about our products to confirm our claims. We have a trial version for you to experience. If you encounter any questions about our EAEP2201 learning materials during use, you can contact our staff and we will be happy to serve for you. Maybe you will ask if we will charge an extra service fee. We assure you that we are committed to providing you with guidance on EAEP2201 Quiz torrent, but all services are free of charge. As for any of your suggestions, we will take it into consideration, and effectively improve our EAEP2201 exam question to better meet the needs of clients. In the process of your study, we have always been behind you and are your solid backing. This will ensure that once you have any questions you can get help in a timely manner.

Esri Enterprise Administration Professional 2201 Sample Questions (Q30-Q35):

NEW QUESTION # 30
A GIS analyst creates a layer in ArcGIS Pro that must be published to the ArcGIS Enterprise portal as a web service that supports editing. The analyst does not have a connection to the ArcGIS Server where the service must be published.
What action should the analyst perform?

- A. Change the privileges on their user role to allow publishing
- B. Upload the layer to the portal as a layer package file and add it to a web map
- C. Create a service definition file to be published by a portal administrator

Answer: B

NEW QUESTION # 31
An organization wants to use the standard feature analysis tools available in ArcGIS Enterprise to create hosted feature layers for planning and design.
Which data store is required for this work?

- A. Relational data store
- B. File-based geodatabase
- C. Tile cache data store
- D. Spatiotemporal big data store

Answer: A

Explanation:
The standard feature analysis tools in ArcGIS Enterprise (e.g., buffer, overlay, aggregate points) require hosted feature layers, which depend on the relational data store (a component of ArcGIS Data Store). The relational data store is the default location for hosting feature layers.
From ArcGIS Enterprise documentation:
"To use the standard spatial analysis tools and create hosted feature layers, the ArcGIS Data Store (relational) must be configured and set as the default hosting location."
* Option A (spatiotemporal big data store) is used for real-time and big data feeds, not standard analysis.
* Option C supports cached tiles, not feature layers.
Reference: ArcGIS Enterprise - Configuring the Relational Data Store for Hosting Feature Layers

NEW QUESTION # 32
An ArcGIS administrator executes a script to silently upgrade all components of ArcGIS Enterprise version
10.6.1 to version 10.9.1. The upgrade completes without logging any errors.
When the administrator logs in, the following message appears: "Members in your organization were assigned the Standard (Temporary) or Lite (Temporary) user types. No users can log in to the Portal." What is causing these issues?

- A. The portal has no internet access, and the Software Authorization Wizard could not connect to Esri to validate the new license file.

- B. The organization has level 2 members and the new license file used for the upgrade now has more than one compatible user type.
- C. The Portal for ArcGIS upgrade process requires a restart of the Portal for ArcGIS service when adding additional user types.

Answer: B

Explanation:
During the upgrade from ArcGIS Enterprise 10.6.1 to 10.9.1, user type licensing is enforced. If the new license file includes more than one compatible user type (e.g., Creator and GIS Professional), existing members without a specified user type may be assigned temporary user types like "Standard (Temporary)" or
"Lite (Temporary)." These temporary assignments prevent users from logging in until valid user types are manually assigned.
This issue is not related to internet access (Option B) or the need to restart services (Option C).
Reference Source:ArcGIS Enterprise documentation on user type licensing during upgrades

NEW QUESTION # 33
After upgrading ArcGIS Enterprise, an administrator observes that some items, groups, and users are missing in the portal. What should the administrator check first?

- A. Portal for ArcGIS index status
- B. That the ArcGIS Data Stores are validating
- C. Portal for ArcGIS service status

Answer: A

Explanation:
After upgrading, it's essential toreindexthe portal to ensure that all items, groups, and users are correctly displayed. The administrator should check thePortal for ArcGIS index statusto verify if the reindexing process has completed successfully. Incomplete or failed reindexing can result in missing content within the portal.
Reference Source:ArcGIS Enterprise documentation on common problems and solutions after upgrading

NEW QUESTION # 34
A user must create groups, edit features, and create web apps. This user will also create print layouts, charts, and animations using ArcGIS Pro. The organization has noadditional add-on licenses.
Which user type should be configured for this user?

- A. Editor
- B. Creator
- C. GIS Professional

Answer: C

Explanation:
TheGIS Professionaluser type includes access toArcGIS Pro, which is required for creating print layouts, charts, animations, and conducting advanced analysis. It also includes capabilities such as creating groups, editing features, and creating web apps within the ArcGIS Enterprise portal-without needing additional add- on licenses.
TheCreatoruser type supports most web GIS tasks butdoes not include ArcGIS Prounless an add-on license is assigned.
TheEditoruser type is the most limited and is intended for editing existing content only, not for creating or managing groups or web applications.
