

# Esri EAPA\_2025 Latest Dumps Sheet, EAPA\_2025 New Exam Bootcamp

Our study material is not same as other dumps or study tools, it not only has good quality but also has cheap price. We have most professional team to compiled and revise EAPA\_2025 exam question, in order to try our best to help you pass the exam and get a better condition of your life and your work. Moreover, only need to spend 20-30 is it enough for you to grasp whole content of EAPA\_2025 practice materials that you can pass the exam easily, this is simply unimaginable.

Compared with products from other companies, our EAPA\_2025 practice materials are responsible in every aspect. After your purchase of our EAPA\_2025 exam braindumps, the after sales services are considerate as well. We have considerate after sales services with genial staff. They are willing to solve the problems of our EAPA\_2025 training guide 24/7 all the time. If you have any question that you don't understand, just contat us and we will give you the most professional advice immediately.

## EAPA\_2025 New Exam Bootcamp | Exam EAPA\_2025 Course

Perhaps you still feel confused about our ArcGIS Pro Associate 2025 test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our EAPA\_2025 Exam Questions. As you can see, our system is so powerful and intelligent. What most important it that all knowledge has been simplified by our experts to meet all people's demands. All of our assistance is free of charge. We are happy that our small assistance can change you a lot. You don't need to feel burdened. Remember to contact us!

### Esri EAPA\_2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Edit Features and Organize Workflows: This section of the exam measures skills of GIS Analyst and evaluates your competency in editing geospatial features through snapping, templates, sketch tools, performing quality control, and managing simple tasks including map layouts and bookmarks.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Automate Workflows: This section of the exam measures skills of GIS Specialist and examines your ability to build and manage models using ModelBuilder, construct geoprocessing workflows, chain together tools, and automate repeatable GIS tasks effectively.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Create and Share Maps and Layouts: This section of the exam measures skills of GIS Specialist and includes creating polished maps—designing layouts, inserting elements like scale bars, legends, titles, and sharing outputs via print, PDF, or packages for collaboration.</li> </ul>

## Esri ArcGIS Pro Associate 2025 Sample Questions (Q54-Q59):

### NEW QUESTION # 54

A GIS specialist creates a model tool to allow others to run analysis on their own data. When users open the model tool, they are unable to configure input data or output location.

How should the specialist expose this functionality to users?

- A. Right-click the tool in the model > Create Variable > From Parameter
- B. Right-click the model variables > Parameter
- C. Right-click the model variables > Open > Properties

**Answer: B**

Explanation:

To make variables editable by users when running a model, you must right-click the model variables and check "Parameter." This exposes the variable as an input or output parameter in the tool interface.

\* Create Variable > From Parameter (Option A) is used when building the model, not when exposing variables.

\* Open > Properties (Option C) accesses variable properties but does not expose parameters for tool users.

Therefore, the correct answer is B.

-

### NEW QUESTION # 55

A GIS specialist has a feature class of flights that contains information such as origin city, destination city, and the length of time that the flight was delayed. The specialist needs to display this information in a chart and aggregate the delayed time as an average.

- A. Box plot
- B. Scatter plot
- C. Matrix heat chart

**Answer: C**

Explanation:

ArcGIS Pro's Matrix Heat Chart is designed for visualizing relationships between two categorical fields—such as origin and destination cities—and summarizing a numeric field, like delay time, using aggregate functions (e.g., mean). This type of chart aligns perfectly with the requirement:

\* It allows you to set Column to the destination city and Row to the origin city.

\* Then choose the Number field as delay time and the Aggregation method as "Mean" to calculate average delay.

\* The chart displays each origin#destination pair as a cell, color-coded by the calculated average delay.

Official documentation highlights this example explicitly:

"Create a matrix heat chart to identify the flights that have the highest average arrival delay time between origin and destination city by setting the following properties... Aggregation-Mean; Number-DelayTime" Other chart types don't fit the requirement:

\* Box plots are used to display distributions and identify outliers; it doesn't aggregate by category pairs.

\* Scatter plots show relationships between numeric variables on a continuous axis—not suitable for categorical city#pair aggregation.

Therefore, the most appropriate choice for summarizing average journey delay by city pairs is the Matrix Heat Chart (C).

### NEW QUESTION # 56

A GIS analyst receives a dataset of precipitation change over the past five years, by country, for the entire world. The analyst is creating a map that will display this information. A requirement of the map is to preserve the area of each country.

Which projection should be used?

- A. Mercator
- B. Robinson
- **C. Equal Earth**

**Answer: C**

Explanation:

The Equal Earth projection is specifically designed to preserve area across the globe, making it ideal for thematic mapping of global datasets like precipitation change by country. It balances accurate area representation with a visually pleasing appearance for world maps.

\* Mercator (Option A) preserves angles but distorts area, especially near the poles.

\* Robinson (Option C) is visually pleasing for world maps but distorts both shape and area.

Therefore, the correct answer is B.

-

#### NEW QUESTION # 57

A GIS analyst is creating a spatial map series based on the name field for a given feature. The analyst wants to automate the map sheet's title based on that feature name.

Which tag using dynamic text will provide the desired result?

- A. Layout Name
- **B. Page Name**
- C. Map Name

**Answer: B**

Explanation:

The Page Name dynamic text tag references the current index feature's value (such as the feature name field) when creating a spatial map series. This allows the title to update automatically based on the feature used for each map sheet.

\* Layout Name (Option A) references the name of the layout itself.

\* Map Name (Option C) references the map's name, not the page name from the map series.

Therefore, the correct answer is B.

-

#### NEW QUESTION # 58

In ArcGIS Pro, a GIS analyst adds a mosaic dataset to a map and notices that the entire mosaic area is covered with a black and white checkerboard.

Which tool should the analyst use to make the images visible in the map as part of the mosaic dataset?

- A. Define Overviews
- **B. Repair Mosaic Dataset Paths**
- C. Build Pyramids

**Answer: B**

Explanation:

The black-and-white checkerboard indicates that the mosaic dataset cannot locate the source rasters. Repair Mosaic Dataset Paths allows the analyst to correct the file paths if the rasters have been moved or renamed, thus restoring visibility.

\* Define Overviews (Option A) creates reduced-resolution overviews for fast display but does not fix broken paths.

\* Build Pyramids (Option B) builds pyramids for raster display performance but also requires valid data paths first.

Therefore, the correct answer is C.

#### NEW QUESTION # 59

.....

Additionally, all operating systems also support this format. The third format is the desktop EAPA\_2025 Practice Exam software. It

is ideal for users who prefer offline ArcGIS Pro Associate 2025 (EAPA\_2025) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.
