Esri EAPA_2025 PDF Questions-Turn Your Exam Fear Into Confidence

When preparing for the test EAPA_2025 certification, most clients choose our products because our EAPA_2025 learning file enjoys high reputation and boost high passing rate. Our products are the masterpiece of our company and designed especially for the certification. Our EAPA_2025 latest study question has gone through strict analysis and verification by the industry experts and senior published authors. The clients trust our products and treat our products as the first choice. So the total amounts of the clients and the sales volume of our EAPA_2025 learning file is constantly increasing.

Esri EAPA_2025 Exam Syllabus Topics:

Topic	Details

Topic 1	Manage and Create Geospatial Data: This section of the exam measures skills of GIS Analyst and covers the creation, organization, and management of both vector and attribute data including proper handling of coordinate systems, schema modifications, and metadata practices.
Topic 2	Perform Analysis and Query Data: This section of the exam measures skills of GIS Specialist and focuses on applying geoprocessing tools to analyze spatial data, running attribute and spatial queries, using overlays, proximities, summaries, and working with environment settings for automated workflows.
Topic 3	Automate Workflows: This section of the exam measures skills of GIS Specialist and examines your ability to build and manage models using ModelBuilder, construct geoprocessing workflows, chain together tools, and automate repeatable GIS tasks effectively.
Topic 4	Use Raster and Imagery Data: This section of the exam measures skills of GIS Analyst and tests your ability to work with rasters and imagery including mosaic datasets, raster functions like NDVI, mosaic methods, exporting rasters, and managing raster analysis environments.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q75-Q80):

NEW QUESTION #75

A GIS analyst is working with LAS data with 17 million points on the map. The points are too big and cover the underlying areas completely. The analyst needs to change the dimensions of the points.

Which action should the analyst take to meet this requirement?

- A. Increase the point density
- B. Decrease the display limit
- C. Decrease the symbol scale

Answer: C

Explanation:

Symbol scale determines the size of points when displayed. When LAS points appear too large, decreasing the symbol scale (making symbols smaller) will reduce the visual footprint of each point and prevent them from obscuring underlying map content.

- * Increasing point density (Option A) adds more points but doesn't reduce size.
- * Decreasing display limit (Option B) reduces how many points are drawn but does not solve the issue of size.
- * Decreasing symbol scale directly reduces the size of each point.

Therefore, the correct answer is C.

NEW OUESTION # 76

A GIS analyst pulls in an image service from ArcGIS Online, which should contain a slope map, a hillshade map, an aspect map, a contour map, and a terrain map. However, the analyst only sees the terrain map. How should the analyst access the other maps?

- A. Switch to a different processing template in the layer properties
- B. Change the source in the layer properties
- C. Change band orders under symbology

Answer: A

Explanation:

Many image services include multiple processing templates that provide different visualizations (e.g., slope, hillshade, aspect). The analyst can switch between these templates within the layer properties to access the various derivative products.

- * Changing band order (Option A) affects multi-band imagery but won't expose separate processing templates.
- * Changing the source (Option C) changes the entire dataset rather than switching between available templates. Therefore, the correct answer is B.

NEW QUESTION #77

A GIS analyst is creating a spatial map series based on the name field for a given feature. The analyst wants to automate the map sheet's title based on that feature name.

Which tag using dynamic text will provide the desired result?

- A. Page Name
- B. Layout Name
- C. Map Name

Answer: A

Explanation:

The Page Name dynamic text tag references the current index feature's value (such as the feature name field) when creating a spatial map series. This allows the title to update automatically based on the feature used for each map sheet.

- * Layout Name (Option A) references the name of the layout itself.
- * Map Name (Option C) references the map's name, not the page name from the map series.

Therefore, the correct answer is B.

NEW QUESTION # 78

Which workflow should be used to share a map as a TIFF file?

- A. Share > Export Map
- B. Share > Capture To Clipboard
- C. Share > Print Map

Answer: A

Explanation:

Export Map under the Share tab provides options to export maps into various formats, including TIFF, PDF, PNG, JPEG, and others. This is the standard workflow for creating a high-quality raster file suitable for sharing and archiving.

- * Print Map (Option A) is for sending the map directly to a printer.
- * Capture To Clipboard (Option C) copies the current map extent as an image to the clipboard for temporary use, not for file creation.

Therefore, the correct answer is B.

-

NEW QUESTION #79

A GIS analyst has a feature class and a non-spatial table stored in the same geodatabase. The analyst needs to create a composite relationship to ensure data integrity.

Which association type should the analyst apply?

- A. Relationship class
- B. Attribute join
- C. Spatial join

Answer: A

Explanation:

A relationship class defines a permanent association between a feature class and a table or between two feature classes in a geodatabase. Composite relationship classes enforce referential integrity, ensuring that related records remain consistent (e.g., when a parent record is deleted, related child records are also removed).

- * Attribute join (Option A) is temporary and does not enforce integrity.
- * Spatial join (Option B) requires spatial relationships and applies only between spatial datasets.
- * Relationship class (Option C) allows managing relationships between spatial and non-spatial tables with referential integrity. Therefore, the correct answer is C.

-

NEW QUESTION # 80

.....

With all the questons and answers of our EAPA_2025 study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our EAPA_2025 practice questions. As long as you make up your mind on this EAPA_2025 Exam, you can realize their profession is unquestionable. And you will be surprised to find the high-quality of our EAPA_2025 exam braindumps.
